What were the Fund's costs for the year? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class E	\$14	0.13%

How did the Fund perform last year?

The Fund generated strong performance for the period. Positive returns for U.S. equities were supported by economic and earnings growth, stabilizing inflation, pro-business U.S. government policy initiatives, and the prospect of lower interest rates. Robust returns were evident across the portfolio as the Fund realized positive returns in various sectors, industries, and market capitalizations. This demonstrated the benefit of the Fund's flexible investment approach. Select holdings in the Health Care and Materials sectors detracted in part due to challenging operating environments.

The graph shows how a hypothetical investment in the Fund changed in value over the period and for the amount indicated above, and compares it with a broad-based market index and, if applicable, an additional index. The graph and table do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the sale of Fund shares. The performance prior to Class E's inception date of January 11, 2022 is that of the Fund's Institutional Class, which had higher expenses than Class E so its performance typically would have been lower than that of Class E. **Results represent the Fund's past performance, which is not a good predictor of how the Fund will perform in the future.** For current performance, please visit www.nb.com/performance.
