## FOR THE YEAR ENDED 31 DECEMBER 2025

## 12. FINANCIAL INSTRUMENT DISCLOSURES

In pursuing its investment objectives the Company invests in transferable securities with the aim of spreading risk. Investments in equities and fixed income securities expose the Company to varying risks including market, liquidity and credit/counterparty risks. A description of the specific risks and the policies for managing these risks are included below. In addition, consequences of political, social, economic, diplomatic changes, or public health condition may have disruptive effects on market prices or fair valuations of foreign investments. Fair value is determined in accordance with the methodology outlined in the Statement of Significant Accounting Policies. The Schedules of Investments of the Portfolios at the year-end are representative of the type of investments held during the year.

**Market Risk**

Market risk embodies the potential for both losses and gains and includes price risk, interest rate risk and foreign currency risk.

All security investments present a risk of loss of capital. The Manager and Sub-Investment Managers moderate this risk through a careful selection of securities and other financial instruments within specified limits. The Company's overall market positions are monitored on a daily basis by the Portfolio's Manager and are reviewed on a quarterly basis by the Board of Directors. The Company's equity and debt securities and trading derivative financial instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments.

**(a) Price Risk**

Price risk is the risk that the fair values of securities decrease as a result of changes in the levels of the indices and the values of individual securities. The trading price risk exposure arises from the Company's investment portfolios.

The majority of the Company's investments are listed on recognised exchanges or traded on regulated markets as per the Prospectus. As at 31 December 2025 and 31 December 2024, a 10% increase in security prices would have increased the Net Assets and the Changes in Net Assets of each Portfolio as outlined in the table below. An equal change in the opposite direction would have decreased the Net Assets by an equal but opposite amount.

Other price risk is the risk that the value of the instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual instrument, its issuer or all factors affecting all instruments traded in the market. As the majority of the Company's financial instruments are carried at fair value with fair value changes recognised in the Profit and Loss Account changes in market conditions will directly affect Net Gain/(Loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss.

Price risk is managed by the Manager by investing in a diversified range of securities in different markets.

**FOR THE YEAR ENDED 31 DECEMBER 2025**
**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**
**(b) Foreign Currency Risk**

The Net Asset Value per share of a Portfolio will be computed in the base currency of the relevant Portfolio, whereas the investments held for the account of that Portfolio may be acquired in other currencies. The base currency value of the investments of a Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within established limits.

At 31 December 2025 and 31 December 2024, had the base currency of the relevant Portfolio strengthened by 5% in relation to all currencies, with all other variables held constant, Net Assets and the Change in Net Assets per the Profit and Loss Account would have (decreased) increased as outlined in the table below.

| Portfolio                                               | Currency | 31 December 2025 | % of Net Assets | 31 December 2024 | % of Net Assets |

\* Portfolio liquidated during the current or prior reporting year.

A 5% weakening of the base currency of the relevant Portfolio against the above currencies would have resulted in an equal but opposite effect on the above financial statement amounts to the amounts shown above, on the basis that all other variables remain constant. The foreign currency risk exposure has been calculated on the Net Assets of the Portfolio that are denominated in a currency which is not the base currency of the relevant Portfolio. The Manager deems 5% to be a reasonable rate for foreign currency shift.

**FOR THE YEAR ENDED 31 DECEMBER 2025**
**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**
**(c) Interest Rate Risk**

The Portfolios may hold investments in fixed interest bearing securities. Any change to the interest rate for particular securities may result in income either increasing or decreasing. Prices of securities held will be impacted by domestic rates of interest. The Portfolio's performance therefore will depend in part on its ability to anticipate and respond to such fluctuations in market interest rates. The Managers and Sub-Investment Managers manage this risk by way of duration and yield curve analysis to establish and monitor duration positioning and yield curve structure.

The Company has forty-five Portfolios as at the year ended 31 December 2025. Of the Portfolios, seventeen are Portfolios where the majority of the assets and liabilities of the Portfolio is invested in equity securities and are non-interest bearing. As a result, these Portfolios are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

At year end, the Portfolios set out in the table below invested primarily in fixed income and floating rate instruments and are therefore exposed to the effects of fluctuations in the prevailing level of market interest rates on their respective financial position and cash flows.

Based on the Portfolios' compositions as at 31 December 2025 and 31 December 2024, had interest rates fallen by 0.50% with all other variables held constant, it is estimated that Net Assets and the Change in Net Assets per the Profit and Loss Account would have increased by approximately the values outlined in the table below. A 0.50% rise in rates would have resulted in an equal but opposite effect.

## (d) Credit/Counterparty Risk

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Company. It is the Company's policy to enter into financial instruments with a diversity of creditworthy counterparties. Therefore, the Company does not expect to incur material credit losses on its financial instruments. The Manager performs assessments of the credit quality of trading counterparties used by the Company. This assessment includes, at minimum, an initial and annual credit review based on financial and/or third-party ratings data. Counterparties used for forwards and other OTC derivatives are subject to heightened monitoring, which includes in-depth credit reviews considering third-party ratings and/or factors such as capital adequacy, asset quality, management quality, earnings, and liquidity. The Manager also follows news regarding the financial sector to monitor industry trends as well as events that may directly impact specific counterparties.

The Company's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that counterparties fail to perform their obligations as at 31 December 2025 and 31 December 2024 in relation to each class of recognised financial assets, other than derivatives, is the carrying amount of those assets as indicated in the Balance Sheet.

Transactions involving derivative financial instruments are usually with counterparties with whom the Portfolio has signed master netting agreements. Master netting agreements provide for the net settlement of contracts with the same counterparty in the event of default. The credit risk associated with derivative financial assets subject to a master netting arrangement is eliminated only to the extent that financial liabilities due to the same counterparty will be settled after the assets are realised. Risk is also managed by collateral being immediately available to the Company without recourse to counterparty in the event of default of counterparty.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ("BBH") are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Company. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. As at 31 December 2025, all cash and bank balances held on overnight deposit were with third party institutions, as outlined in Note 3. Cash and Cash Equivalents, that have a long term credit rating which is investment grade as issued by Standard & Poor's (31 December 2024: same). BBH has a long term credit rating of A+ (31 December 2024: A+) as issued by Fitch.

The Depositary must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Depositary, Brown Brothers Harriman Trustee Services (Ireland) Limited ("BBHTS") must ensure the ownership of each asset and the location of documents of title for each asset.

**FOR THE YEAR ENDED 31 DECEMBER 2025**
**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**
**(d) Credit/Counterparty Risk (continued)**

The key risk for the Company remains Credit Risk i.e. that the Manager buys a loan or bond of a particular issuer and it does not perform as expected and either defaults on a payment or experiences a significant drop in the secondary market value.

To mitigate this risk, the Manager carries out independent due diligence on each borrower, and has a focus on stable, performing credits that evidence strong track records through previous economic cycles. Additionally, the size of an issuer is also considered and the Manager continues to favour the larger issuers in the market, defined by having debt issuance greater than \$500m. These issuers tend to have broader syndicates, which can aid liquidity in the secondary market. As well as screening out the smaller issuers the Manager also excludes highly cyclical industries and companies with limited earning visibility from its Investment Process.

Once a particular investment has been made, the Manager monitors it. A range of relevant data is reviewed on an ongoing basis for each investment, including, but not limited to, key financial drivers, commodity prices, stock prices, regulatory developments, financial results, press releases and management commentary to identify any indicators of credit deterioration.

To manage this risk further, the Board ensures that the Manager operates in accordance with the investment limits and restrictions policy determined by the Board. The Directors monitor the implementation and results of the investment process with the Manager at each Board meeting and monitor risk factors in respect of each Portfolio.

The securities that BBH holds in custody include equities, fixed income securities, participatory notes, asset backed securities and REITS. All securities that BBH holds in custody (as global sub-custodian for and on behalf of BBHTS for further benefit of its underlying clients) are segregated from BBH's own assets, whether they are held in BBH's vault, in segregated accounts on the books of their sub-custodians, or in an account maintained at a central securities depository. BBH maintains segregated accounts per client on its own books as well as on the books of the sub-custodian in the local market, where this is possible. As Depositary, BBHTS must also ensure non-cash assets are held on a fiduciary basis through BBH's network of global sub-custodians.

BBH's sub-custodians are required by contract with BBH and generally by operation of law to segregate the securities of custody clients from the general banking assets of the sub-custodian.

BBH performs both initial and ongoing due diligence reviews on the sub-custodians within its global custody network through its Network Management Group. Such reviews include an assessment of service level standards, management expertise, market information, custody operations, reporting and technology capabilities at the sub-custodian, as well as reviews in relation to their reputation and standing in the market and their ongoing commitment to providing custody services.

Service level agreements are put in place with each sub-custodian, as well as the usual contractual arrangements, and these are reviewed on a regular basis through service review meetings, including on-site due diligence meetings.

Regular financial analysis of all sub-custodians is carried out by BBH's Risk and Credit Group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing.

The Manager monitors the Company's risk in accordance with UCITS guidelines and reports to the Board of Directors on a periodic basis.

The Company invests in debt instruments that may receive a credit rating from a well-known rating agency. The credit ratings in the tables below are calculated as a percentage of fixed income securities, where there is a significant proportion of that Portfolio held as fixed income. A debt instrument is considered Investment Grade by Standard & Poor's and Fitch if its credit rating is BBB- or higher and by Moody's if its credit rating is Baa3 or higher. As at 31 December 2025 and 31 December 2024 the exposures by credit rating for each applicable Portfolio were as follows:

## (e) Liquidity Risk

The main liquidity risks of the Company are associated with the need to satisfy Shareholders' requests for redemptions. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the relevant Portfolio's Net Asset Value per Share at the time of redemption. This risk is mitigated by the Company primarily investing in securities listed or traded on the recognised markets in OECD member states and other countries thus assets comprise principally of realisable securities, which can be readily sold, except investments categorised as Level 3 of the fair value hierarchy as disclosed in Note 12 (f). Additionally, if there are any collateral arrangements in place with a counterparty, this will limit the extent to which liabilities may be extended to the Company. Moreover, as outlined in Note 19, a committed liquidity facility is available to the Company.

*Financial Liabilities*

The maturity grouping is based on the remaining period from the end of the reporting period to the contractual maturity date. When the counterparty has a choice of when the amount is paid, the liability is allocated to the earliest on which the Company can be required to pay.

As at 31 December 2025 and 31 December 2024, all payables were due within one month. Please refer to Schedules for Investments for details of maturity dates of derivative financial liabilities. Liabilities other than derivative financial liabilities are due within one month.

## (f) Fair Value of Investments

FRS 102 Section 11.27 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities;

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data (unobservable inputs). Pricing inputs are unobservable for the investment and include situations where there is little, if any market activity for the instrument. The inputs into the determination of fair value require significant management judgement or estimation. As observable prices are not available for these securities, the Portfolios would have used valuation techniques to derive the fair value if applicable.

## FOR THE YEAR ENDED 31 DECEMBER 2025

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (f) Fair Value of Investments (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. For example, if a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measure is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement in considering the factors specific to the asset or liability.

Determining what constitutes observable inputs requires significant judgment by the Manager. The Manager considers observable inputs to be market data that is readily available, supported by market transactions, not proprietary, regularly distributed, transparent, verifiable, reliable, based on consensus, and provided by independent sources actively involved in the relevant market.

The value of the Portfolios' investments in equity securities, exchange-traded funds, warrants, exchange-traded options purchased and written, for which market quotations are available, is generally determined by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price ("NOCP") provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of participatory notes is determined by obtaining valuations from independent pricing services based on the underlying equity security and applicable exchange rate (Level 1 inputs).

The value of the Portfolios' investments in debt securities is determined primarily by obtaining valuations from independent pricing services based on available mid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). If there is more than one quote security available, security is classified as Level 2. In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Portfolios:

*Corporate Bonds.* Inputs used to value corporate debt securities generally include relevant credit information, observed market movements, sector news, US Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities, and reference data, such as market research publications, when available ("Other Market Information").

*Convertible Bonds.* Inputs used to value convertible bonds (including CoCos) generally include underlying stock data, conversion premiums, listed bond and preferred stock prices and Other Market Information, which may include benchmark curves, trade execution data, and sensitivity analysis, when available.

*U.S. Treasury Obligations.* Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and Other Market Information.

*U.S. Government Agency Securities.* Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

*Asset-Backed Securities and Mortgage-Backed Securities.* Inputs used to value asset-backed securities and mortgage-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

*High Yield Securities.* Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

*Emerging Markets Debt and Foreign Government Securities.* Inputs used to value emerging markets debt and foreign government securities generally include dealer quotes, bond market activity, discounted cash flow models, and other relevant information such as credit spreads, benchmark curves and Other Market Information.

## FOR THE YEAR ENDED 31 DECEMBER 2025

**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)****(f) Fair Value of Investments (continued)**

*Collateralised Loan Obligations (CLOs).* The value of collateralised loan obligations is primarily determined by cash flow data, relevant loan pricing data and market conditions, and research from market participants and trading desks (Level 2 or 3 inputs).

The value of term loans is determined primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of insurance linked securities is determined by the Manager primarily by obtaining valuations from independent third-party pricing services based on mid quotations (Level 2 or 3 inputs).

The value of futures contracts is determined by obtaining valuations from independent pricing services at the settlement price at the market close (Level 1 inputs).

The value of forward foreign currency contracts is determined by obtaining valuations from independent pricing services based on actual traded currency rates on independent pricing services' networks, along with other traded and quoted currency rates provided to the pricing services by leading market participants (Level 2 inputs).

The value of credit default swaps is determined by obtaining valuations from independent pricing services using a model that considers a number of factors, which may include default probabilities, credit curves, recovery rates and cash flows (Level 2 or 3 inputs).

The value of inflation swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying inflation rates including forward inflation expectation rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying forward inflation curve and reference rate (Level 2 inputs).

The value of interest rate swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the local overnight index swap rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of total return swaps is determined by obtaining valuations from independent pricing services using the underlying asset and stated benchmark interest rate (Level 2 inputs).

The value of cross currency swaps is determined by obtaining valuations from independent pricing services based on present value of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of volatility swaps is determined primarily by obtaining valuations from independent pricing services and is based on a predetermined volatility level versus the actual amount of volatility realised over a period data of the reference asset (Level 2 or 3 inputs).

The value of variance swaps is determined primarily by obtaining valuations from independent pricing services and is based on the historical realised and expected future variance (or fair variance) of the reference asset (Level 2 or 3 inputs).

The value of correlation swaps is determined primarily by obtaining valuations from independent pricing services and is based on the difference in the realised correlation and a fixed correlation value (Level 2 or 3 inputs).

The value of contracts for difference ("CFD") is determined primarily by obtaining valuations from independent pricing services, which are based on references to the underlying asset and the stated reference rate (Level 2 or 3 inputs).

The value of swaptions is determined by obtaining valuations from independent pricing services or counterparty pricing source (Level 2 inputs).

Option contracts that are traded over-the-counter are generally valued on the basis of quotations provided by broker dealers or prices provided by independent pricing services who use a series of techniques including simulated pricing models and/or curve fitting (bootstrapping), which aids in determining the present value of the contracts. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, credit curves, volatility surfaces, and exchange rates (Level 2 inputs).

The value of repurchase and reverse repurchase agreements is determined by the Manager primarily by obtaining valuations from independent pricing services, which are evaluated at par (Level 2 inputs) in line with market conventions.

## FOR THE YEAR ENDED 31 DECEMBER 2025

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (f) Fair Value of Investments (continued)

The Manager has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment funds are valued using the respective fund's daily calculated net asset value ("NAV") per share (Level 2 inputs), when available.

If a valuation is not available from an independent pricing service, or if the Manager has reason to believe that the valuation received does not represent the amount a Portfolio might reasonably expect to receive on a current sale in an orderly transaction, the Manager seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not available, the security is valued using methods the Board of Directors has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security.

Inputs and assumptions considered in determining the fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of the security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers and/or pricing services; information obtained from the issuer and/or analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

The value of the Portfolios' investments in foreign securities is generally determined using the same valuation methods and inputs as other Portfolio investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into US dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange ("NYSE") is open for business. The Board of Directors has approved the use of ICE Data Pricing & Reference Data LLC ("ICE") to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that a Portfolio could expect to receive for those securities or on days when foreign markets are closed and US markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). The Board of Directors has also approved the use of ICE to evaluate the prices of foreign debt securities as of the time as of which a Portfolio's share price is calculated. ICE utilizes benchmark spread and yield curves and evaluates available market activity from the local close to the time as of which a Portfolio's share price is calculated (Level 2 inputs) to assist in determining prices for certain foreign debt securities.

In the case of both foreign equity and foreign debt securities, in the absence of precise information about the market values of these foreign securities as of the time as of which a Portfolio's share price is calculated, the Board of Directors has determined on the basis of available data that prices adjusted or evaluated in this way are likely to be closer to the prices a Portfolio could realise on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

The following tables show financial investments at the levels of fair value hierarchy:

**Absolute Return Multi Strategy\*****Financial Instruments at Fair Value through Profit or Loss**

\* Level 3 Term Loans were valued based on a single quotation obtained from a dealer. Management has considered whether reasonably possible alternative assumptions would result in materially different fair values for these Level 3 investments and has concluded that such changes would not be material to the financial statements. All other Level 3 investments were valued in accordance with procedures approved by the Board of Directors.

## Quantitative Information about Level 3 Fair Value measurements:

| Investment type  | Fair Value as at<br>31 December 2024<br>US\$ | Level Valuation<br>approach | Significant<br>unobservable input(s) | Input<br>value/range | Weighted average <sup>(a)</sup> | Impact to valuation from<br>increase in input <sup>(b)</sup> |
|------------------|----------------------------------------------|-----------------------------|--------------------------------------|----------------------|---------------------------------|--------------------------------------------------------------|
| Preferred Equity | 6,584,306                                    | Income Approach             | Credit Yield Spread                  | 3.15%                | 3.15%                           | Decrease                                                     |

<sup>(a)</sup> The weighted average disclosed in the table above were weighted by relative fair value.

<sup>(b)</sup> Represents the expected directional change in the fair value of the Level 3 investments that would result from an increase or decrease in the corresponding input. Significant changes in these inputs could result in significantly higher or lower fair value measurements.

\* Level 3 Term Loans were valued based on a single quotation obtained from a dealer. Management has considered whether reasonably possible alternative assumptions would result in materially different fair values for these Level 3 investments and has concluded that such changes would not be material to the financial statements. All other Level 3 investments were valued in accordance with procedures approved by the Board of Directors.

\* Level 3 Term Loans were valued based on a single quotation obtained from a dealer. Management has considered whether reasonably possible alternative assumptions would result in materially different fair values for these Level 3 investments and has concluded that such changes would not be material to the financial statements. All other Level 3 investments were valued in accordance with procedures approved by the Board of Directors.

|                                    | Level 1<br>US\$ | Level 2<br>US\$ | Level 3<br>US\$ |
|------------------------------------|-----------------|-----------------|-----------------|

\* Level 3 Term Loans were valued based on a single quotation obtained from a dealer. Management has considered whether reasonably possible alternative assumptions would result in materially different fair values for these Level 3 investments and has concluded that such changes would not be material to the financial statements. All other Level 3 investments were valued in accordance with procedures approved by the Board of Directors.

## Quantitative Information about Level 3 Fair Value measurements:

| Investment type | Fair Value as at 31<br>December 2025<br>US\$ | Level Valuation<br>approach | Significant<br>unobservable input(s)              | Input<br>value/range | Weighted average <sup>(a)</sup> | Impact to valuation from<br>increase in input <sup>(b)</sup> |
|-----------------|----------------------------------------------|-----------------------------|---------------------------------------------------|----------------------|---------------------------------|--------------------------------------------------------------|
| Common Stock    | 1,376,597                                    | Market Approach             | Enterprise value/Revenue<br>multiple (EV/Revenue) | 8.5x                 | 8.5x                            | Increase                                                     |

<sup>(a)</sup> The weighted average disclosed in the table above were weighted by relative fair value.

<sup>(b)</sup> Represents the expected directional change in the fair value of the Level 3 investments that would result from an increase or decrease in the corresponding input. Significant changes in these inputs could result in significantly higher or lower fair value measurements.

\* Portfolio liquidated on 28 March 2025.

\*\* Portfolio liquidated on 17 December 2025.

\*\*\* Portfolio liquidated on 8 February 2024.

**FOR THE YEAR ENDED 31 DECEMBER 2025****15. CURRENCY TRANSLATION ADJUSTMENT (CONTINUED)**

A notional currency adjustment of US\$ 850,195,999 (31 December 2024: US\$ (329,834,723)) arose from the translation of the opening Net Assets, the Profit and Loss Accounts and the Statements of Changes in Net Assets Attributable to Redeemable Participating Shares. The method of translation has no effect on the value of the net assets attributable to the individual Portfolios.

**16. SOFT COMMISSIONS ARRANGEMENTS**

The Manager and connected persons have entered into soft commission arrangements with brokers in respect of research products in limited instances, subject to its receiving best execution to support the investment decision process.

The types of research received includes all standard forms of research, including but not limited to current and historical data concerning particular companies, industries and the financial economy as a whole, as well as information and opportunities, risks and trends, and analysis involving special situations. The Manager considers these arrangements are to the benefit of the Portfolios and has satisfied itself that it obtains best execution on behalf of the Portfolios.

**17. SEGREGATED LIABILITY**

The Company has multiple Portfolios and further Portfolios may be created in the future. With the approval of the Company's Shareholders, by way of a special resolution passed on 3 November 2006, the Company adopted segregated liability between its Portfolios. As at that date, each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner, liquidator nor will any other person have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio.

**18. EFFICIENT PORTFOLIO MANAGEMENT**

The Company may employ investment techniques and instruments relating to transferable securities and/or other financial instruments including financial derivative instruments under the conditions and within the limits laid down by the Central Bank, provided that such instruments are used for efficient portfolio management purposes (i.e. hedging, reducing risks or cost, or increasing capital or income returns) or investment purposes. Techniques and instruments utilised may only be used in accordance with the investment objectives of the relevant Portfolio.

At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into securities lending transactions ("Securities Lending Agreements"), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the "Instruments/Asset Classes" section of the relevant Supplement for the Portfolio. Any such securities lending transactions may be used for efficient portfolio management purposes.

Securities Lending Agreements are transactions through which a Portfolio lends its securities to another party, the borrower, which is contractually obliged to return equivalent securities at the end of an agreed period. While securities are on loan, the borrower pays the Portfolio (i) a loan fee and (ii) any income from the securities.

As of 31 December 2025 and 31 December 2024, the Company did not engage in any securities lending.

During the year ended 31 December 2025, CLO Income, Corporate Hybrid Bond, EMD Corporate – Social and Environmental Transition, Emerging Market Debt - Hard Currency, Emerging Market Debt - Local Currency, Global Flexible Credit Income, Global High Yield Engagement, High Yield Bond, Next Generation Connectivity, Short Duration Emerging Market Debt, Short Duration High Yield Engagement, Strategic Income, Sustainable Emerging Market Debt - Hard Currency, US Equity Premium, US Large Cap Value and US Long Short Equity engaged in repurchase trading and reverse repurchase trading. Total interest income arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2025 were US\$ 23,482,497 and US\$ 450, respectively. Total interest expense arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2025 were US\$ 364 and US\$ 157,669, respectively. Direct and indirect costs associated with efficient portfolio management techniques are not readily identifiable.

During the year ended 31 December 2024, CLO Income, Corporate Hybrid Bond, EMD Corporate – Social and Environmental Transition, Emerging Market Debt - Hard Currency, Emerging Market Debt - Local Currency, Global Flexible Credit Income, Global High Yield Engagement, High Yield Bond, Short Duration Emerging Market Debt, Short Duration High Yield Engagement, Strategic Income and Sustainable Emerging Market Debt - Hard Currency engaged in repurchase trading and reverse repurchase trading. Total interest income arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2024 were US\$ 13,619,831 and US\$ 47, respectively. Total interest expense arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2024 were US\$ Nil and US\$ 69,915, respectively. Direct and indirect costs associated with efficient portfolio management techniques are not readily identifiable.

**FOR THE YEAR ENDED 31 DECEMBER 2025**
**19. LOAN FACILITY**

Since 6 October 2016, arrangements have been made with The Bank of Tokyo Mitsubishi UFJ Ltd, together with a syndicate of other banks (collectively the "Lenders") to make available a committed liquidity facility (the "Facility"), to the Company in respect of the Portfolios from the date of the execution of a credit agreement with the Bank and the proceeds of the Facility could only be used for temporary or emergency liquidity needs of the Portfolios. The Facility, in the amount of US\$ 850,000,000, was renewed on 25 September 2025 for the period of 364 days for all Portfolios.

There were no loans outstanding under the Facility at 31 December 2025 and 31 December 2024. During the year ended 31 December 2025 and the year ended 31 December 2024, none of the Portfolios utilised the loan facility.

**20. UNFUNDED LOAN COMMITMENTS**

As of 31 December 2025, the Company had the following unfunded loan commitments:

| Portfolio Name                | Security Name                     | Unfunded<br>Commitment<br>USD | Fair Value<br>USD |

**21. SIGNIFICANT EVENTS DURING THE YEAR**

With effect from 1 January 2025, MFD Secretaries Limited was appointed as a Company Secretary & Registered Office.

With effect from 1 January 2025, the Neuberger Berman Global Investment Grade Credit Fund management fee was raised from 0.10% to 0.30% on EUR I Accumulating Class.

With effect from 1 January 2025, the Neuberger Berman Next Generation Connectivity Fund management fee was reduced from 1.80% to 1.70% on USD E Accumulating Class.

A new version of the Thematic Equity Supplement to the Prospectus covering amendment relating to the misstatement of initial subscription and minimum holding amounts for the Class S category was noted by the Central Bank on 20 January 2025.

With effect from 3 February 2025, Mary Brady was appointed as Director of the Company.

With effect from 28 March 2025, Neuberger Berman China Bond Fund was terminated.

With effect from 30 June 2025, Manteio Capital LLC was appointed as a Non-Affiliated Sub-Adviser of the Company.

**FOR THE YEAR ENDED 31 DECEMBER 2025****21. SIGNIFICANT EVENTS DURING THE YEAR (CONTINUED)**

A new version of the Company's Prospectus and new Supplements to the Prospectus covering changes on relevant Portfolios were noted by the Central Bank on 1 July 2025. The Prospectus updates cover adding new share class types: LI, LA and LM; the ESG Policy has been updated and also renamed to the Stewardship and Sustainable Investing Policy; the Neuberger Berman Sustainable Exclusion Policy has been updated to include a specific 0.5% revenue threshold to the civilian firearms exclusion; adding a new risk factor: investment in "Distressed Debts" to Investment Risk section; updates to the NB ESG Quotient Ratings or Similar Proprietary In-House Ratings risk factor. The Supplements to the Prospectus updates cover benchmark changes on Neuberger Berman Global Flexible Credit Income Fund, Neuberger Berman EMD Corporate – Social and Environmental Transition Fund, Neuberger Berman Sustainable Asia High Yield Fund and the Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund; the distribution policy of the CLO Income amendment to accommodate a monthly distributing share class.

With effect from 1 August 2025, the Neuberger Berman Next Generation Connectivity Fund management fee was reduced from 1.80% to 1.70% on ZAR E Accumulating Class.

With effect from 30 September 2025, Neuberger Berman InnovAsia Fund was terminated.

A new version of the Company's Prospectus and new Supplements to the Prospectus covering changes on all Portfolios were noted by the Central Bank on 27 November 2025.

With effect from 1 December 2025, Neuberger Berman Sustainable Asia High Yield Fund was terminated.

With effect from 17 December 2025, Neuberger Berman European Sustainable Equity Fund and Neuberger Berman Global Sustainable Equity Fund were terminated.

During the year, market uncertainty remained present due to unpredictable US tariff policies, continued public criticism of the Federal Reserve Chair and concerns about the potential volatility in the US dollar and bond yields. Volatility decreased during the year, as measured by the CBOE Volatility Index (VIX), albeit there were some sharp and short-lived spikes. From a Fixed Income perspective, fiscal overreach and debt sustainability continued to dominate the debate on sovereign fixed income valuations, albeit long-term yields are now reflecting known risks. From an Equities perspective, AI remained a key driver for equity valuations, with AI market leadership to date centered on a small group of mega-cap technology companies. Regional opportunities were also evident in 2025, supported by local governance reforms and improving returns on equity, alongside a somewhat more constructive outlook for China.

Other than the above, there have been no significant events affecting the Company during the year.

**22. SIGNIFICANT EVENTS SINCE THE YEAR END**

Neuberger Berman Short Duration Income Fund launched on 5 January 2026.

With effect from 1 February 2026, the Neuberger Berman Emerging Market Debt - Local Currency Fund management fee was reduced from 0.36% to 0.25% on EUR Y and USD Y Accumulating Classes, respectively.

A new version of the Tactical Macro Fund Supplement to the Prospectus covering amendment of the initial offer period run from 17 February 2026 to 14 August 2026, and the Portfolio's expected maximum leverage increase from 450% to 3000% of its Net Assets was noted by the Central Bank on 16 February 2026.

With effect from 31 March 2026, Neuberger Berman Uncorrelated Strategies Fund was terminated.

During the period from 1 January 2026 through 14 April 2026, there were significant subscriptions and redemptions exceeding 5% of the Net Assets of the relevant Portfolio shown in the table below:

| Portfolio                                           | Currency | Subscriptions | Redemptions |
|-----------------------------------------------------|----------|---------------|-------------|
| China Equity                                        | USD      | -             | 20,440,362  |
| CLO Income                                          | USD      | 242,034,159   | 186,000,144 |
| Commodities                                         | USD      | 92,216,044    | 60,665,420  |
| Corporate Hybrid Bond                               | EUR      | 334,328,908   | 237,534,240 |
| Developed Market FMP – 2027                         | USD      | -             | 9,225,959   |
| EMD Corporate – Social and Environmental Transition | USD      | 1,445,384     | 7,303,347   |
| Emerging Market Debt - Hard Currency                | USD      | 411,942,585   | 369,459,252 |
| Emerging Market Debt - Local Currency               | USD      | 121,567,006   | 119,053,496 |
