Effective 4 August 2026, the fund's name was updated to reflect the firm's rebranding from Neuberger Berman or NB to Neuberger.
The fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The Benchmark is used for performance comparison purposes. The fund's investment policy restricts the extent to which the fund's holdings may deviate from the benchmark, but the fund is not exclusively limited to the securities of the benchmark.
Fund performance data covers 28 August to 30 September due to a Fund valuation holiday on 31 August. Benchmark data covers 31 August to 30 September.

[1]Performance to latest month end. YTD - Year to Date, SI - Since Inception. 12 month period based on month end NAVs.

[2]Returns for these periods are cumulative.

[3]Returns are annualised for periods longer than one year.

[4]Returns from 31 October 2014 to latest month end.

[5]Performance for the current calendar year is the year to date.

Fund performance is representative of the USD A (Monthly) Distributing Class and has been calculated to account for the deduction of fees. Investors who subscribe in a currency other than the base currency of the fund should note that returns may increase or decrease as a result of currency fluctuations. **Fund performance does not take account of any commission or costs incurred by investors when subscribing for or redeeming shares.** Where a benchmark is shown, the benchmark shown is provided in the base currency of the fund and therefore may not be a fair representative comparison to the hedged currency share class shown. The difference in the currency exposure and currency fluctuations in an unhedged benchmark may cause an unintended differential in any performance or risk comparison.

Credit quality ratings are based on the ICE Bank of America ("ICE BofA") Master High Yield Index composite ratings. The ICE BofA composite ratings are updated once a month on the last calendar day of the month based on information available up to and including the third business day prior to the last business day of the month. The ICE BofA composite rating algorithm is based on an average of the ratings of three agencies (to the extent rated). Generally the composite is based on an average of Moody's, S&P and Fitch. For holdings that are unrated by the ICE BofA Index composite, credit quality ratings are based on S&P's rating. Holdings that are unrated by S&P may be assigned an equivalent rating by the investment manager. No NRSO has been involved with the calculation of credit quality and the ratings of underlying portfolio holdings should not be viewed as a rating of the portfolio itself. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.

*The ongoing charge figure (which includes the management fee) is an annual charge based on expenses for the period ending 31 December 2025.

**The ongoing charge figure (which includes the management fee) is an annual charge based on estimated expenses.

Some share classes listed are subject to restrictions, please refer to the fund's prospectus for further details.
Investors who subscribe in a currency different from their local currency should note that the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Before subscribing please refer to the Prospectus.

For a full glossary of terms, please refer to **www.nb.com/glossary**

Hedged Share Class. Hedged share classes which are designated in a currency other than the base currency of the fund, are hedged into the base currency. For details please refer to the prospectus.

Fund price is as of the date of the factsheet. Please note that the last distribution quoted is the dividend payout per share on the relevant share class's last distribution date which varies
(monthly, weekly, quarterly, semi-annually or annually) and may be different from the date of the factsheet.

The annual yield figure quoted is the distribution yield, calculated by multiplying the dividend by pay periods, dividing by the net asset value (NAV) of the last distribution date and then multiplying by 100%. It is for reference only and is not indicative of the return of the Fund's future dividend to be received by investors.

In respect of distributing share classes, the Directors of the Company may at their discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value (NAV) of the relevant shares. Dividends are not paid for all share classes and are not guaranteed. A positive distribution yield does not imply a positive return, and some share classes listed are subject to further restrictions. Please refer to the Fund's prospectus for further details.

RISK CONSIDERATIONS

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Emerging Markets Risk: Emerging markets are likely to bear higher risk due to a possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions which may lead to lower liquidity. **The NAV of the fund may experience medium to high volatility due to lower liquidity and the availability of reliable information, as well as due to the fund's investment policies or portfolio management techniques.**

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the fund.

Interest Rate Risk: The risk of interest rate movements affecting the value of fixed-rate bonds.

Derivatives Non-Complex Risk: The fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the fund's assets and the Investment Manager will ensure that the fund's use of derivatives does not materially alter the overall risk profile of the fund. Please refer to the Prospectus for a full list of the types of derivative that the fund may utilise.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

Concentration Risk: The fund's investments may be concentrated in a small number of investments and its performance may therefore be more variable than the performance of a more diversified fund.

For full information on these and other risks, please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

Neuberger Berman Investment Funds plc (the "Fund") is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities under the European Communities ("UCITS") Regulations 2011 (S.I. 352 of 2011) of Ireland, as amended. Neuberger Berman Asset Management Ireland Limited may decide to terminate the arrangements made for the marketing of its funds in all or a particular country.

This document is presented solely for information purposes and nothing herein constitutes investment, legal, accounting or tax advice, or a recommendation to buy, sell or hold a security.

This document is addressed to professional clients only, this includes, advisors, institutional investors, consultants, intermediaries and qualified investors.

We do not represent that this information, including any third party information, is accurate or complete and it should not be relied upon as such.

No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of any investment, and should consult its own legal counsel and financial, actuarial, accounting, regulatory and tax advisers to evaluate any such investment.

It should not be assumed that any investments in securities, companies, sectors or markets identified and described were or will be profitable. Investors may not get back the full amount invested.

The fees and charges paid by the Fund will reduce the return on your investment.

All information is current as of the date of this material and is subject to change without notice.

The fund described in this document may only be offered for sale or sold in jurisdictions in which or to persons to which such an offer or sale is permitted. The fund can only be promoted if such promotion is made in compliance with the applicable jurisdictional rules and regulations. This document and the information contained therein may not be distributed in the US.

Indices are unmanaged and not available for direct investment.

Past performance is not a reliable indicator of current or future results. The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred by investors when subscribing for or redeeming shares.

Please note that any dividends/interest which the Fund may receive may be subject to withholding tax. The benchmark does not take into account the effects of tax and the deduction is therefore not reflected in the benchmark return illustrated herein. The investment objective and performance benchmark is a target only and not a guarantee of the Fund performance. The index is unmanaged and cannot be invested in directly. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. The investments of each portfolio may be fully hedged into the portfolio's base currency: this may reduce currency risks but may also expose the portfolio to other risks such as the default of a counterparty.

Monthly and weekly Distributing Classes will distribute out of income and may also be paid out of capital. Payments from capital will erode the overall value of an investor's portfolio. Investors in these classes should be aware that the payment out of capital may have different tax implications from distributions of income and should seek tax advice. In respect of the C, C1, C2, E and B share classes a contingent deferred sales charge may be payable to the Investment Manager in line with the provisions of the Fund's prospectus.

Following a redemption request, the Fund will seek to make payments within 3 business days of the dealing day, otherwise redemption proceeds will be paid within 10 business days, unless dealing has been temporarily suspended in accordance with the Fund prospectus.

Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.

Investment in the fund should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.
