

Neuberger Intrinsic Value Fund

TICKER: Institutional Class: NINLX, Class A: NINAX, Class C: NINCX, Class R6: NRINX

PORTFOLIO MANAGERS: Benjamin H. Nahum, James McAree and Amit Solomon, PhD

PORTFOLIO SPECIALIST: Haik Kevorkian

Performance Highlights

In February, the Institutional Class of the Neuberger Intrinsic Value Fund (the “Fund”) underperformed the Russell 2000 Value Index (“R2V”). For the year to date, the Fund is in positive territory but lags the R2V.

Major US equity indices finished the month with mixed results. In February, market leadership flipped with investors shifting out of big tech mega cap stocks as AI enthusiasm cooled and rotated into more cyclical and defensive sectors.

Market Context

In February, sector leadership turned defensive and cyclical. The Utilities sector led amid inflation concerns, Energy surged as oil prices rose due to supply risks, and Materials rallied supported by global manufacturing demand. The Industrials and Consumer Staples sectors also posted solid gains while growth sectors struggled with Technology and Consumer Discretionary both down. Financials also declined due to rate volatility pressures. Software stocks dropped sharply as investors reassessed AI-related valuation risks.

Portfolio Review

For the month, the Fund’s underperformance was due mainly to stock selection, particularly in Energy and Infotech. In the Energy sector, shares of Tetra Technologies dropped sharply. Despite a solid 4Q earnings report and a reasonable 2026 outlook, the significantly lower revenue guidance from zinc bromine customer EOSE (utility scale stationary batteries) and the lack of an Oasis desalinated water order weighed on the stock. In Infotech, both Kyndryl and Rambus were down due to stock specific issues which have since been resolved. Kyndryl delayed its financial filing and fired its CEO due to an accounting issue that appears to have been fixed while Rambus was impacted by an intermittent supply issue due to a fault at one of their partner facilities which has since been corrected.

The negative impact of stock selection was offset somewhat by strong sector allocation, mostly from our underweight in Financials and overweight in Infotech. Despite the overall negative impact from stock selection, there were some strong performers. In Energy, Technip’s 4Q earnings report was better than expected. This, combined with strong orders, increased sub-sea backlog, market expansion and the possibility that the sub-sea cycle could be longer than expected, contributed to the strong performance. In Infotech, Ciena continues to benefit from rising expectations about its growing role in scaling AI data centers and IPGP reported solid 4Q and FY 2025 results. The improving industrial backdrop could be a catalyst for a strong 2026.

We continued to trim some of our strong performing names in February and redeployed the capital into existing holdings with more attractive risk/reward profiles. We also added three new names to the portfolio in February – a healthcare company that designs, manufactures, sells and distributes professional dental products and technologies, an Industrials company engaged in the

distribution of hardware and home improvement products, and a healthcare company that provides life sciences services including genomics, cryogenic storage, automation, and informatics.

BEST AND WORST PERFORMERS FOR FEBRUARY 2026¹

Best Performers	Worst Performers
IPG Photonics Corp	Kyndryl Holdings Inc.
Ciena Corporation	Ormat Tech Inc.
Resideo Technologies, Inc..	TETRA Technologies Inc.
Acadia Healthcare Company, Inc.	Cleveland-Cliffs Inc.
TechnipFMC plc	Rambus Inc.

1. Reflects the best and worst performers for year to date, in descending order, based on individual security performance and portfolio weighting in the Fund. Positions listed may include securities that are not held in the Fund as of 02/28/2026. Specific securities identified and described do not represent all of the securities purchased, sold or recommended for the Fund. It should not be assumed that any investments in securities identified and described were or will be profitable.

Outlook

We anticipate continued market volatility in the near term. Market concerns include tariff repercussions following the Supreme Court’s International Emergency Economic Powers Act (IEEPA) decision and geopolitical risks in Iran. The Supreme Court struck down the Administration’s broad reciprocal tariffs implemented last year. While President Trump announced a new 15% global tariff under Section 122 of the Trade Act of 1974, these tariffs are set to expire in late July unless Congress extends them. Oil prices jumped following the coordinated US-Israeli air strikes on Iran due to the risk of supply disruptions. A prolonged conflict could lead to higher energy prices and increased inflation lowering the probability for near-term Federal Reserve (“Fed”) rate cuts. The transition to new Fed leadership further complicates this issue.

Neuberger Intrinsic Value Fund Returns (%)

	Feb, 2026	4Q25	YTD	(Annualized as of 12/31/25)				Since Inception

Performance data quoted represent past performance, which is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Results are shown on a "total return" basis and include reinvestment of all dividends and capital gains distributions. Current performance may be higher or lower than the performance given. For current performance data, including current to the most recent month end, please visit www.nb.com/performance.

Average Annual Total Returns with sales charge reflect deduction of current maximum initial sales charge of 5.75% for Class A shares and applicable contingent deferred sales charges ("CDSC") for Class C shares. The maximum CDSC for Class C shares is 1%, which is reduced to 0% after 1 year.

The inception date for Neuberger Intrinsic Value Fund Class A, Class C and Institutional Class shares was 5/10/10. The inception date of Class R6 was 1/18/19. The performance data for Class R6 also includes the performance of the Fund's Institutional Class from 5/10/10 through 1/18/19. Performance prior to the date is that of the Fund's predecessor, the Neuberger Berman DJG Small Cap Value Fund L.P., an unregistered limited partnership ("DJG Fund"); DJG Fund was the successor to The DJG Small Cap Value Fund, an unregistered commingled investment account ("DJG Account"). The performance from 9/12/08 is that of the DJG Fund and the performance from 7/8/97 (the Fund's commencement of operations) to 9/11/08 is that of the DJG Account. On May 10, 2010, the DJG Fund transferred its assets to the Fund in exchange for the Fund's Institutional Class shares. The investment policies, objectives, guidelines and restrictions of the Fund are in all material respects equivalent to those of the DJG Fund and the DJG Account (the "Predecessors"). As a mutual fund registered under the Investment Company Act of 1940, the Fund is subject to certain restrictions under the 1940 Act and the Internal Revenue Code to which the Predecessors were not subject. Had the Predecessors been registered under the 1940 Act and been subject to the provisions of the 1940 Act and the Code, its investment performance may have been adversely affected. The performance information reflects the actual expenses of the Predecessors.

	Gross Expenses (%)
Institutional Class	0.96
Class A	1.33
Class C	2.07
Class R6	0.86

Gross expense represents the total annual operating expenses that shareholders pay (after the effect of any fee waivers and/or expense reimbursement). The Fund's investment manager has contractually undertaken to waive and/or reimburse certain fees and expenses of the Fund so that the total annual operating expenses are capped (excluding interest, brokerage commissions, acquired fund fees and expenses, taxes including any expenses relating to tax reclaims, dividend and interest expenses relating to short sales, and extraordinary expenses, if any) through 8/31/29 for Class A at 1.36%, Institutional Class at 1.00%, Class C at 2.11% and for Class R6 at 0.90% (each as a percentage of average net assets). Absent such arrangements, which cannot be changed without Board approval, the returns may have been lower. As of the Fund's most recent prospectuses, the Manager was not required to waive or reimburse any expenses pursuant to this arrangement. Information as of the most recent prospectus dated December 18, 2025, as amended, restated and supplemented.

An investor should consider Neuberger Intrinsic Value Fund's investment objectives, risks and fees and expenses carefully before investing. This and other important information can be found in the Fund's prospectus and summary prospectus, which you can obtain by calling 877.628.2583. Please read the prospectus and the summary prospectus carefully before making an investment.

This material is general in nature and is not directed to any category of investors and should not be regarded as individualized, a recommendation, investment advice or a suggestion to engage in or refrain from any investment-related course of action. Neuberger Berman is not providing this material in a fiduciary capacity and has a financial interest in the sale of its products and services. Investment decisions and the appropriateness of this material should be made based on an investor's individual objectives and circumstances and in consultation with his or her advisors.

As of 12/31/25, the Fund's discount to the team's calculated intrinsic value estimate was 26 percent. Intrinsic value reflects the team's analysis and estimates. There is no guarantee that any intrinsic values will be realized; security prices may decrease regardless of intrinsic values. This estimate of intrinsic value represents what we believe a company in the portfolio could be worth if it is acquired, if its profitability normalizes to its long-term average level, if its valuation moves in line with publicly traded peers' valuations, or if other investors recognize its potential for earnings growth. Intrinsic value is not a guarantee of performance of the Fund.

The **Russell 2000® Index** is a float-adjusted market capitalization-weighted index that measures the performance of the small-cap segment of the U.S. equity market. It includes approximately 2,000 of the smallest securities in the Russell 3000® Index (which measures the performance of the 3,000 largest U.S. public companies based on total market capitalization). The index is rebalanced annually in June.

The **Russell 2000® Value Index** is a float-adjusted market capitalization-weighted index that measures the performance of the small-cap value segment of the U.S. equity market. It includes those Russell 2000® Index companies with lower price-to-book ratios and lower forecasted growth rates. The index is rebalanced annually in June. Please note that indices do not take into account any fees and expenses of investing in the individual securities that they track, and that individuals cannot invest directly in any index. Data about the performance of this index are prepared or obtained by the Manager and include reinvestment of all dividends and capital gain distributions. The Fund may invest in many securities not included in the above described indices. Effective after the market close on March 21, 2025, FTSE Russell is implementing a capping methodology to all Russell U.S. Style Indices including this one. Any individual company weights in the index greater than 22.5% will be capped, and the sum of all individual companies that have an index weight greater than 4.5% will be capped to a 45% aggregate weight in the index. This will be applied quarterly going forward, but historical index returns will not be restated.

As of 12/31/2025, the weightings of the best and worst performers mentioned indicated as a percentage of Fund net assets were: ViaSat, Inc., 4.04%; Ciena Corporation, 1.53%; Bloom Energy Corporation Class A, 0.90%; Enviri Corporation, 2.45%; Ormat Technologies, Inc., 3.43%; Criteo SA Sponsored ADR, 1.55%; Acadia Healthcare Company, Inc., 0.37%; Conduent, Inc., 0.56%; KBR, Inc., 2.08%; Alight, Inc. Class A, 0.29%.

Investing in companies in anticipation of a catalyst carries the risk that the catalyst may not happen as anticipated, possibly due to the actions of other market participants, or the market may react to the catalyst differently than expected.

An individual security may be more volatile, and may perform differently, than the market as a whole.

Private placements and other restricted securities are securities that are subject to legal and/or contractual restrictions on their sales. These securities may not be sold to the public unless certain conditions are met, which may include registration under the applicable securities laws. As a result of the absence of a public trading market, the prices of these securities may be more difficult to determine than publicly traded securities and these securities may involve heightened risk as compared to investments in securities of publicly traded companies.

High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty.

The Fund may experience periods of large or frequent redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets.

From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors.

At times, small-and mid-cap companies may be out of favor with investors. Compared to larger companies, small-and mid-cap companies may depend on a more limited management group, may have a shorter history of operations, and may have limited product lines, markets or financial resources. The securities of small-and mid-cap companies are often more volatile and less liquid than the securities of larger companies and may be more affected than other types of securities by the underperformance of a sector or during market downturns.

Value stocks may remain undervalued or may decrease in value during a given period or may not ever realize what the portfolio management team believes to be their full value or intrinsic value.

A decline in the Fund's average net assets during the current fiscal year due to market volatility or other factors could cause the Fund's expenses for the current fiscal year to be higher than the expense information presented.

The Fund and its service providers, and your ability to transact with the Fund, may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. It is not possible for the Manager or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Risk is an essential part of investing. No risk management program can eliminate the Fund's exposure to adverse events; at best, it may only reduce the possibility that the Fund will be affected by such events, and especially those risks that are not intrinsic to the Fund's investment program.
