Equity Markets

The S&P 500 slipped -0.87% in October, which on its own reads like a quiet month. It was anything but. The index is still up 11.77% year-to-date, but beneath the surface leadership rotated hard. The Nasdaq-100 dropped -6.63% to finish 9.5% below its 52-week high. Meanwhile the equal-weight S&P 500 gained 5.0%, a 5.9 percentage point gap over its cap-weighted sibling. The share of S&P 500 members above their 50-day moving average jumped from 21% to 61%, so the index got worse while the market underneath got healthier.

The catalyst was scrutiny of the AI buildout, not a weaker earnings picture. About 60% of S&P 500 companies had reported by October 30, with blended third-quarter earnings growth of 30.2% and 82% of companies beating estimates. The forward price-to-earnings ratio slid to 18.7x, below its five-year average of 19.8x. Investors simply began asking who pays for the infrastructure, and focused on capital spending, financing costs and free cash flow, with leveraged names such as CoreWeave feeling the pressure.

The macro backdrop stayed mixed. The Fed held its target range at 3.75% to 4.00% on October 28 following September's hike, third-quarter GDP grew at a 3.4% annual rate, and September payrolls added just 22,000 jobs against an 84,000 consensus as unemployment ticked up to 4.2%. Inflation ran at 3.7%, and Brent crude finished near $118 a barrel with the Iran conflict and attacks near the Strait of Hormuz keeping a supply premium in place. Gold (-6.8%), silver (-18.7%) and Bitcoin (-7.4%) all fell. Midterm elections on November 3 added another topic for investors to debate.

Internationally, October offered diversification within the month but not on the headline. MSCI EAFE slipped -0.74%, while MSCI Emerging Markets fell -8.05%. The emerging market sell-off was concentrated in technology-heavy Asia, with Korea (-15.6%) and Taiwan (-8.4%) exposed to the same AI capital spending debate, and Brazil (-12.0%) dropping after the presidential election result. Year-to-date, the ranking is tight. Emerging markets are still ahead at 13.45%, followed by the Nasdaq-100 (12.98%), the S&P 500 (11.77%) and EAFE (9.52%). That is notable for emerging markets after their worst month of the year, and it reinforces that the opportunity set has been wider than any single U.S. index.

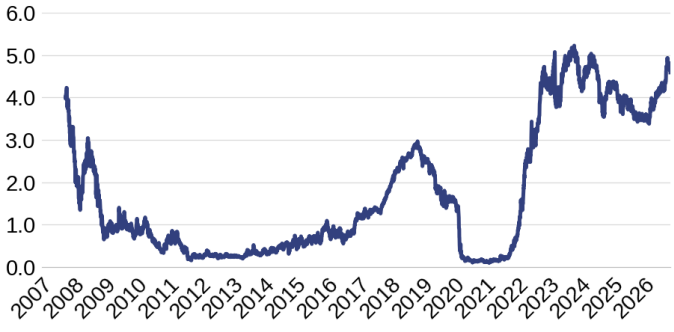

Fixed Income Markets

Bonds recovered much of September's rate shock. The 10-year Treasury yield touched 5.36% early in the month, then fell about 36 basis points to finish at 4.93%, while the 2-year yield dropped about 30 basis points to 4.59%. The 3-month bill barely moved at 4.08%. The Fed held its target range at 3.75% to 4.00% on October 28, and with inflation at 3.7% (2.6% core), markets still see roughly a 75% chance of another 25 basis point hike at the December 9 meeting. Mortgage rates remain a pressure point, as the 30-year rate reached 7.40% intra-month, its highest since November 2023, and finished near 7.24%. Yields fell despite sticky inflation and solid growth because safe-haven buying during the equity sell-off met crowded positioning at the highs and a growing worry that long-term rates had moved beyond what the economy could carry.

The Bloomberg U.S. Aggregate Bond Index returned 2.44% for the month, trimming its year-to-date loss to -0.54%. The Bloomberg U.S. Corporate High Yield Index lagged at 0.30% but is up 0.40% for the year. The roughly 215 basis point gap is a rates story and a risk-appetite story. Investment grade carries more duration, so it rode the rally in Treasuries. High yield has less duration to monetize and is more tied to the health of leveraged borrowers, and October's stress in the AI-related debt market, along with a -1.0% decline in euro high yield on French concerns, kept investors from reaching for yield. In a month of economic uncertainty, investors chose quality and duration over carry, and bonds reclaimed their role as ballast after falling alongside stocks in September.

Implied Volatility

Volatility rose in October as the technology sell-off gathered pace, with the VIX climbing from 16.34 to 19.42, a 3.08 point (19%) increase that leaves it 30% above its year-end level of 14.95.

Cboe S&P 500 Volatility Index (VIX)

Trailing 3 Years: As of October 31, 2026 (daily)

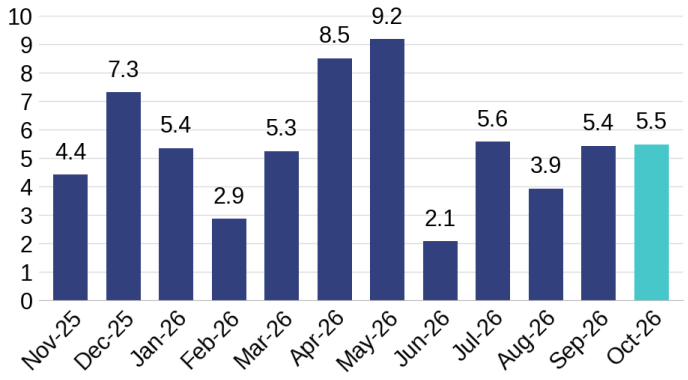

Source: Bloomberg. **Past performance is no guarantee of future results.**

The S&P 500 implied volatility premium, the spread between what options priced in and what actually played out, averaged 5.48 volatility points in October, a bit above the 5.37 point year-to-date level.

The VIX futures curve was flatter than usual at the end of the month. Near-term protection is priced richly while distant risk is not, which is a constructive backdrop for collecting premium. With oil near $118, inflation at 3.7%, a Fed that may hike again in December and questions over how the AI buildout will be financed, there is no shortage of unresolved risk. Option buyers are acknowledging that by paying for protection, and that is the environment where a systematic premium seller gets paid for taking the other side.

US Equity Premium Fund

October was a quiet month for the Fund's two engines, which together produced a 0.00% net return. The collateral portfolio contributed 0.46% from short Treasury income, while the options sleeve subtracted -0.40%. In our view the sleeve was held back by the path of the market rather than its level: indexes began the month near record highs and the sell-off accelerated into month-end, with the VIX rising more than 3 points, even though the S&P 500 finished down less than 1%.

The putwrite benchmarks had a better month, with the Cboe S&P 500 PutWrite Index returning 0.42% and the Blended PutWrite Index 0.50%, so the Fund finished 42 and 50 basis points behind. Trailing the putwrite benchmarks is the cost of being short volatility into a late-month air pocket.

The longer numbers carry the real message. Year-to-date the Fund has returned 10.08% net (8.29% from options, 2.46% from collateral), keeping decent pace with the S&P 500's 11.77% return. The Fund trails PUT year-to-date (10.36%) by 28 basis points and the Blended Index (10.99%) by 91 basis points.

Over the trailing twelve months the Fund returned 12.21%, ahead of the S&P 500's 12.11% by about 10 basis points. The Fund has done this with just over half the market sensitivity (a beta of about 0.6) and about three fifths of the volatility. In plain terms, an investor has been paid an equity-like return for carrying a fraction of the equity risk, which is the objective of buffering downside while delivering risk-efficient returns.

Outlook

The next catalysts are clear. The Fed meets on December 9, with markets pricing a roughly 75% chance of another hike, and the remaining third-quarter earnings reports will test whether the AI buildout can translate into sustainable revenue and free cash flow. In our mind, selectivity is becoming more important as the AI cycle competes for capital with elevated government borrowing at a time of high financing costs. October's stress in French sovereign bonds and parts of the AI debt market showed how quickly those pressures can surface.

The key question is whether October's rotation marks a durable broadening of the market or the first stage of a wider valuation reset. We do not need to answer it. The market has plenty of strain beneath a healthy-looking surface, from energy and inflation to Fed policy and AI financing, and option markets are starting to price that in. The Fund earns its keep from option premium and short Treasury interest rather than a bet on equity direction, duration or credit spreads. October also showed why that matters: stocks fell, bonds rallied, leadership flipped and volatility climbed, and the Fund finished flat.

This Fund meets the requirements of Article 6 of the SFDR. Further information is available in the Fund's offering documents and at www.nb.com.

The KID may be obtained free of charge in Danish, Dutch, English, Finnish, French, German, Greek, Icelandic, Italian, Norwegian, Portuguese, Spanish and Swedish (depending on where the relevant sub-fund has been registered for marketing), and the prospectus and prospectus supplements may be obtained free of charge in English, French, German, Italian and Spanish, from www.nb.com/europe/literature, , from local paying agents (a list of which can be found in Annex III of the prospectus), or by writing to Neuberger Berman Investment Funds plc, c/o Brown Brothers Harriman Fund Administration Service (Ireland) Ltd, 30 Herbert Street, Dublin 2, Ireland. In the United Kingdom the key investor information document (KIID) may be obtained free of charge in English at the same address or from Neuberger Berman Europe Limited at their registered address.

Neuberger Berman Asset Management Ireland Limited may decide to terminate the arrangements made for the marketing of its funds in all or a particular country.

A summary of the investors' rights is available in English on: www.nb.com/europe/literature

For information on sustainability-related aspects pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector please visit www.nb.com/europe/literature. . When making the decision to invest in the fund, investors should take into account all the characteristics or objectives of the fund as described in the legal documents.

Notice to investors in the United Kingdom: Neuberger Berman Investment Funds plc is authorised and regulated in Ireland by the Central Bank of Ireland but is not authorised by the Financial Conduct Authority in the UK. The UK Financial Ombudsman Service (FOS) is unlikely to be able to consider complaints in relation to Neuberger Berman Investment Funds plc, its management company Neuberger Berman Asset Management Ireland Limited or its depositary Brown Brothers Harriman Trustee Services (Ireland) Limited. Any losses relating to the management company or depositary are unlikely to be covered by the UK Financial Services Compensation Scheme (FSCS). Prospective investors should consider getting financial advice before deciding to invest and should see Neuberger Berman Investment Funds plc's prospectus for more information.

Notice to investors in Switzerland: This is an advertising document. Neuberger Berman Investment Funds plc is established in Ireland as an investment company with variable capital incorporated with limited liability under Irish law, and the sub-funds are also authorised by the Swiss Financial Market Supervisory Authority (FINMA) for offering and/or advertising to non-qualified investors in and from Switzerland. The Swiss representative and paying agent is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, CH-8002 Zürich, Switzerland. The prospectus, the key investor information documents, the memorandum and articles of association and the annual and semi-annual reports are all available free of charge from the representative in Switzerland.

This document is presented solely for information purposes and nothing herein constitutes investment, legal, accounting or tax advice, or a recommendation to buy,
sell or hold a security.

We do not represent that this information, including any third-party information, is complete and it should not be relied upon as such.

DISCLOSURES

No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of any investment, and should consult its own legal counsel and financial, actuarial, accounting, regulatory and tax advisers to evaluate any such investment.

It should not be assumed that any investments in securities, companies, sectors or markets identified and described were or will be profitable. Investors may not get back the full amount invested.

Any views or opinions expressed may not reflect those of the firm as a whole. All information is current as of the date of this material and is subject to change without notice.

The fund described in this document may only be offered for sale or sold in jurisdictions in which or to persons to which such an offer or sale is permitted. The fund can only be promoted if such promotion is made in compliance with the applicable jurisdictional rules and regulations. This document and the information contained therein may not be distributed in the US. Indices are unmanaged and not available for direct investment.

An investment in the fund involves risks, with the potential for above average risk, and is only suitable for people who are in a position to take such risks. For more information please read the prospectus which can be found on our website at: www.nb.com/europe/literature.

Past performance is not a reliable indicator of future results. The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred by investors when subscribing for or redeeming shares.

The value of investments designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.

Investment in the fund should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.
