

Neuberger Large Cap Value Fund*

TICKER: Institutional Class: NBPIX, Class A: NPNAX, Class C: NPNCX, Class R6: NRLCX, Class R3: NPNRX, Investor Class: NPRTX, Trust Class: NBPTX, Advisor Class: NBPBX

PORTFOLIO MANAGERS: Eli M. Salzmann and David Levine, CFA

Performance Highlights

For the second quarter of 2026, the Neuberger Large Cap Value Fund's (the "Fund") Institutional Class posted a return of 12.19% (net of fees) and underperformed its benchmark, the Russell 1000 Value Index, (the "benchmark") which returned 13.84%¹. For June, the Fund's Institutional Class posted a return of 1.86% (Net of fees) and underperformed the benchmark which returned 2.24%¹. Performance for all share classes can be found on page 3.

Market Overview

In the second quarter, the Russell 1000 Index gained 15.14%. Nine out of the eleven sectors within the Russell 1000 Index delivered positive returns.

Equities rebounded sharply in the second quarter, as markets looked through much of the uncertainty that weighed on performance in March and reflected a broader recovery across the capitalization spectrum. The rebound was supported by resilient corporate earnings, renewed strength in AI-related capital spending, and a recovery in risk appetite as investors became more optimistic about a potential resolution to the Middle East conflict.

The macro backdrop remained mixed. Economic activity was resilient in the U.S., with composite PMI data remaining expansionary, but inflation pressures remained a concern. While oil prices eased meaningfully after the U.S.-Iran Memorandum of Understanding, the impact of prior energy supply constraints remained evident in inflation data and central bank expectations. The Federal Reserve ("Fed") held rates steady during the quarter, but by quarter-end, markets were pricing in two potential rate hikes in 2026.

During the quarter, small-cap equities, as represented by the Russell 2000 Index, outperformed large caps, as represented by the Russell 1000 Index, returning 21.49% and 15.14%, respectively. The Russell Midcap Index advanced 13.83%. Growth stocks bested value stocks, as the Russell 1000 Growth Index climbed 16.74% compared to the Russell 1000 Value Index, which added 13.84%. The same dynamic occurred in mid- to small-capitalization markets. The Russell 2000 Growth Index outgained the Russell 2000 Value Index by 25.71% versus 17.19%. The Midcap Growth Index rose 14.55% while the Russell Midcap Value Index added 13.40%.

Portfolio Review

The Fund slightly underperformed the benchmark in June 2026 and in the second quarter. The Fund's sector allocation and security selection were both marginally negative to relative performance.

From a sector allocation standpoint, the Fund benefited from an underweight in Communication Services. Relative performance was negatively impacted by an overweight in Energy and Materials.

In terms of security selection, the Fund's relative performance benefited from its holdings in Technology stocks. The Fund's security selection in Materials negatively impacted its relative performance.

Outlook

The U.S. economy is navigating an uncertain environment, yet encouraging signs appear to be emerging. While labor market momentum has moderated and participation remains under pressure, recent data highlight resilience in consumer spending and improvements in several activity indicators. The Fed began to ease in late 2025, though the pace and extent remain a point of debate within the central bank and with a new Fed Chairman further uncertainty exists with a view on less communication and guidance is more. Despite headwinds, selective opportunities continue to emerge. Corporate balance sheets remain healthy, and capital expenditure plans, while moderated, have not been shelved. We believe we are in the early days of a handoff from a growth led market to a value led market with accelerating economic growth and valuation spreads being very wide. Given the current geopolitical situation there are many things in flux that we are watching. We continue to emphasize areas where we see dislocations and valuation opportunities - particularly among companies trading at low multiples of normalized earnings with clear fundamental catalysts. With recent market volatility there have been many valuation changes that we are evaluating – materials, energy and healthcare remain our largest overweights.

*Prior to December 18, 2025, the Fund included "Neuberger Berman" in place of "Neuberger" in its name.

¹ The Russell 1000 Index measures the performance of the 1,000 largest companies in the Russell 3000 Index (which measures the performance of the 3,000 largest U.S. companies based on total market capitalization). The Russell 1000 Index represents approximately 92% of the total market capitalization of the Russell 3000 Index. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values.

Data Source: FactSet

We remain underweight technology and consumer discretionary and staples, where we see a combination of higher valuations and greater uncertainty around the durability of earnings in a slower and more competitive environment. Overall, we believe a patient, research-driven, valuation-disciplined approach is well suited to an environment of mixed macro signals and wider dispersion, and we expect near-term volatility to create additional opportunities to add to high-conviction ideas.

Performance data quoted represent past performance, which is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Results are shown on a "total return" basis and include reinvestment of all dividends and capital gains distributions. Current performance may be higher or lower than the performance given. For current performance data, including current to the most recent month end, please visit www.nb.com/performance.

Average annual total returns with sales charge reflect deduction of current maximum initial sales charge of 5.75% for Class A shares and applicable contingent deferred sales charges ("CDSC") for Class C shares. The maximum CDSC for Class C shares is 1%, which is reduced to 0% after 1 year.

The inception date of Neuberger Large Cap Value Fund Class R6 was 1/18/19, performance prior to that date is of the Investor Class. The inception date of Class A, Class C and Class R3 was 6/21/10. The inception dates for the Institutional, Investor, Trust and Advisor Classes were 6/7/06, 1/20/75 (when Neuberger Berman Management Inc. first became investment adviser to Large Cap Value Fund), 8/30/93 and 8/16/96, respectively. The inception date used to calculate benchmark performance is that of the Investor Class.

	Gross/Net Expenses (%)
Institutional Class	0.60
Class A	0.97
Class C	1.72
Class R6	0.50
Class R3	1.24
Investor Class	0.75
Trust Class	0.95
Advisor Class	1.10

Gross expense represents the total annual operating expenses that shareholders pay (after the effect of fee waivers and/or expense reimbursement). The Fund's investment manager has contractually undertaken to waive and/or reimburse certain fees and expenses of the Fund so that the total annual operating expenses are capped (excluding interest, brokerage commissions, acquired fund fees and expenses, taxes including any expenses relating to tax reclaims, dividend and interest expenses relating to short sales, and extraordinary expenses, if any; through 08/31/2029 for Institutional Class at 0.70%, 1.11% for Class A, 1.86% for Class C, 1.36% for Class R3, 0.60% for Class R6, 1.50% for Trust and Advisor Classes - each as a % of average net assets). As of the Fund's most recent prospectuses, the Manager was not required to waive or reimburse any expenses pursuant to this arrangement. Absent such arrangements, which cannot be changed without Board approval, the returns may have been lower. Information as of the most recent prospectuses dated December 18, 2025, as amended, restated and supplemented.

An investor should consider the Fund's investment objectives, risks and fees and expenses carefully before investing. This and other important information can be found in the Fund's prospectus and summary prospectus, which you can obtain by calling 877.628.2583. Please read the prospectus and summary prospectus carefully before making an investment.

Past performance is not indicative of future results. This material is not intended to address every situation, nor is it intended as a substitute for the legal, tax, accounting or financial counsel of your professional advisors with respect to your individual circumstances. This material is based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are as of the date herein and are subject to change without notice. This material is not intended to be a formal research report and should not be construed as an offer to sell or the solicitation of an offer to buy any security.

This material is general in nature and is not directed to any category of investors and should not be regarded as individualized, a recommendation, investment advice or a suggestion to engage in or refrain from any investment-related course of action. Neuberger is not providing this material in a fiduciary capacity and has a financial interest in the sale of its products and services. Investment decisions and the appropriateness of this material should be made based on an investor's individual objectives and circumstances and in consultation with his or her advisors. Investing in companies in anticipation of a catalyst carries the risk that the catalyst may not happen as anticipated, or the market may react to the catalyst differently than expected. To the extent that the Fund invests in securities or other instruments denominated in or indexed to foreign currencies, changes in currency exchange rates could adversely impact investment gains or add to investment losses. Foreign securities involve risks in addition to those associated with comparable U.S. securities.

The Fund may engage in active and frequent trading and may have a high portfolio turnover rate, which may increase the Fund's transaction costs, may adversely affect the Fund's performance and may generate a greater amount of capital gain distributions to shareholders than if the Fund had a low portfolio turnover rate. An individual security may be more volatile, and may perform differently, than the market as a whole. Markets may be volatile and values of individual securities and other investments, including those of a particular type, may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity.

Compared to smaller companies, large-cap companies may be unable to respond as quickly to changes and opportunities and may grow at a slower rate. Compared to larger companies, midcap companies may depend on a more limited management group, may have a shorter history of operations, less publicly available information, less stable earnings, and may have limited product lines, markets or financial resources. The securities of mid-cap companies are often more volatile and less liquid than the securities of larger companies and may be more affected than other types of securities by the underperformance of a sector, during market downturns, or by adverse publicity and investor perceptions.

The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. If a call is applied at an inappropriate time or market conditions or trends are judged incorrectly, the use of options may lower the Fund's return. There can be no guarantee that the use of options will increase the Fund's return or income. Both U.S. and international markets have experienced significant volatility in recent years. As a result of such volatility, investment returns may fluctuate significantly. National economies are substantially interconnected, as are global financial markets, which creates the possibility that conditions in one country or region might adversely impact issuers in a different country or region. However, the interconnectedness of economies and/or markets may be diminishing or changing, which may impact such economies and markets in ways that cannot be foreseen at this time. It is difficult to accurately predict the pace at which interest rates might change, the timing, frequency or magnitude of any such changes in interest rates, or when such changes might stop or again reverse course. Additionally, various economic and political factors could cause the Federal Reserve or other foreign central banks to change their approach in the future and such actions may result in an economic slowdown both in the U.S. and abroad. Unexpected changes in interest rates could lead to significant market volatility or reduce liquidity in certain sectors of the market.

The Fund may experience periods of large or frequent redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value.

Real estate investment trust (REIT) and other real estate company securities are subject to risks similar to those of direct investments in real estate and the real estate industry in general. From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Securities lending involves a possible delay in recovery of the loaned securities or a possible loss of rights in the collateral should the borrower fail financially. The Fund could also lose money if the value of the collateral decreases. Value stocks may remain undervalued or may decrease in value during a given period, may not ever realize what the portfolio management team believes to be their full value, or the portfolio management team's assumptions about intrinsic value or potential for appreciation may be incorrect.

The Fund and its service providers, and your ability to transact with the Fund, may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. It is not possible for the Manager or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Risk is an essential part of investing. No risk management program can eliminate the Fund's exposure to adverse events. These and other risks are discussed in more detail in the Fund's prospectus. Please refer to the Fund's current prospectus for a complete discussion of the Fund's principal risks.

The Russell 1000® Value Index measures the performance of those Russell 1,000 companies with lower price-to-book ratios and lower forecasted growth values. Effective after the market close on March 21, 2025, FTSE Russell is implementing a capping methodology to all Russell U.S. Style Indices including this one. Any individual company weights in the index greater than 22.5% will be capped, and the sum of all individual companies that have an index weight greater than 4.5% will be capped to a 45% aggregate weight in the index. This will be applied quarterly going forward, but historical index returns will not be restated. Please note that indices do not take into account any fees, expenses or taxes of investing in the individual securities that they track, and that individuals cannot invest directly in any index. Data about the performance of this index is prepared or obtained by the Manager and include reinvestment of all dividends and capital gain distributions. The Fund may invest in many securities not included in the above-described index.

The "Neuberger Berman" and "Neuberger" name and logo and "Neuberger Berman Investment Advisers LLC" name are registered service marks of Neuberger Berman Group LLC.

The individual fund names in this piece are either service marks or registered service marks of Neuberger Berman Investment Advisers LLC, an affiliate of Neuberger Berman BD LLC, distributor, member FINRA.
