FUND OBJECTIVE

The fund aims to achieve a target average return of 3% over the benchmark before fees over a market cycle (typically 3 years) from investing primarily in a portfolio of Japanese equity holdings that comply with the sustainable criteria, as detailed in the "Sustainable Investment Criteria" section in the prospectus.

The fund invests the majority of its assets in equity securities (shares) of small and mid sized companies that are publically traded, conduct most of their business in Japan or are headquartered in Japan, and are listed or traded on recognised markets globally.

The fund invests across all economic sectors in both small and mid-capitalisation companies which are those that are valued at less than 1 trillion Japanese Yen at the time of purchase.

RISK CONSIDERATIONS

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Concentration Risk: The fund's investments may be concentrated in a small number of investments and its performance may therefore be more variable than the performance of a more diversified fund.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Derivatives Risk: The Fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the Fund's leverage significantly which may cause large variations in the value of your share. (Investors should note that the Fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI)). Certain investment risks apply in relation to the use of FDI. The use of leverage can amplify both gains and losses, which may result in a significant or a total loss of the fund's value in adverse market conditions.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

Sustainable Risk: The fund may focus on investments in companies that relate to certain sustainable development themes and demonstrate adherence to environmental, social and corporate governance practices. This may mean the universe of securities from which the fund can invest in may be smaller than that of other funds and may underperform the market as a result.

For full information on these and other risks, please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.
