## What were the Fund's costs for the year? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class C	\$193	1.80%

## How did the Fund perform last year?

Equity markets were tumultuous but generated positive returns during the period, as investors responded to changing tariff policies, economic data, and interest rate expectations. The Fund's investment process, which seeks to identify high-quality companies, contributed to capital preservation in market downturns while participating in market rallies. The Fund's performance was aided by this approach, even though it did not own a number of the key IT outperformers that drove the S&P 500® Index's (the Index) performance this period, as these companies did not meet the Fund's quality criteria.
