Key Risks

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the fund. This risk is greater than average for investments with a lower credit rating.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

Derivatives Risk: The Fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the Fund's leverage significantly which may cause large variations in the value of your share. (Investors should note that the Fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI)). Certain investment risks apply in relation to the use of FDI. The use of leverage can amplify both gains and losses, which may result in a significant or a total loss of the fund's value in adverse market conditions.

Emerging Markets Risk: Emerging markets are likely to bear higher risk due to a possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions which may lead to lower liquidity. The NAV of the fund may experience medium to high volatility due to lower liquidity and the availability of reliable information, as well as due to the fund's investment policies or portfolio management techniques.

Interest Rate Risk: The risk of interest rate movements affecting the value of fixed-rate bonds.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

For full information on these and other risks, please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

This Fund meets the requirements of Article 8 of the SFDR. Further information is available in the Fund's offering documents and at www.nb.com

Compliance Statement
Neuberger Berman Group LLC ("NB", "Neuberger Berman" or the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Neuberger Berman has been independently verified for the period January 1, 2011 to December 31, 2022. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Multi-Sector Credit Composite has had a performance examination for the periods January 1, 2019 to December 31, 2022. The verification and performance examination reports are available upon request.
The GIPS® firm definition was redefined effective January 1, 2011. For prior periods there were two separate firms for GIPS® firm definition purposes and such firms were independently verified for the periods January 1, 1997 to December 31, 2010 and January 1, 1996 to December 31, 2010, respectively. The Firm definition was most recently changed in 2020 to include the addition of Neuberger Berman Loan Advisers LLC and Neuberger Berman Loan Advisers II LLC, and in 2024 to include the addition of Neuberger Berman Loan Advisers IV LLC.
Definition of the Firm
The firm is currently defined for GIPS® purposes as Neuberger Berman Group LLC, ("NB", "Neuberger Berman" or the "Firm"), and includes the following subsidiaries and affiliates: Neuberger Berman Investment Advisers LLC, Neuberger Berman Europe Ltd., Neuberger Berman Asia Ltd., Neuberger Berman East Asia Ltd., Neuberger Berman Singapore Pte. Ltd., Neuberger Berman Taiwan (SITE) Ltd, Neuberger Berman Australia Ltd., Neuberger Berman Trust Company N.A., Neuberger Berman Trust Company of Delaware N.A., Neuberger Berman Canada ULC, Neuberger Berman Loan Advisers LLC, Neuberger Berman Loan Advisers II LLC and Neuberger Berman Loan Advisers IV LLC.
In December 2022, the firm decided to exclude NB Alternatives Advisers LLC from the GIPS Firm Definition.
Policies
Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
Composite Description
The Multi-Sector Credit Composite (the "Composite"), formerly known as Opportunistic Credit Fixed Income, includes the performance of all Multi-Sector Credit portfolios, with no minimum investment, managed on a fully discretionary basis by the Investment Grade Fixed Income team. The Multi-Sector Credit strategy is designed for investors who seek returns from a portfolio that has broad discretion to invest in investment grade credit sectors such as corporate bonds or securitized obligations, non-investment grade sectors such as high yield, bank loans, or emerging market bonds, and currencies with such fixed income investments predominantly invested in liquid credit opportunities. The emphasis is primarily on sector rotation and bond selection. The Composite creation and performance inception date is December 2010. A complete list of Neuberger Berman's composites is available upon request.
Primary Benchmark Description
Effective November 2020, the benchmark has been changed from a custom blended benchmark to no benchmark. Given the composite strategy's latitude to invest across the full spectrum of fixed income credit assets, the team believes there's no single index that can effectively capture the full spectrum of credit opportunities across the global fixed income universe. The retired custom blended benchmark was more representative of an aggregation of the unique benchmark solutions to client challenges across composite constituents versus a broadly representative of the composite strategy's central characteristics and investment objectives.
Reporting Currency
Valuations are computed and performance is reported in U.S. Dollars. Performance includes reinvestment of dividends and other earnings.
Fees
Composite Gross of Fee returns are the return on investments reduced by any trading expenses incurred during the period. Composite Net of Fee returns are the Gross of Fee returns reduced by model investment advisory fees of 0.55%. Composite Net of Fee returns calculated using model fees deduct 1/12th of the highest tier of the fee schedule from the monthly composite gross returns.
Presented risk measures are calculated using gross-of-fee composite returns.
To the extent that a composite contains fund(s) whereby performance is calculated based on changes in monthly NAV's, net returns reflect miscellaneous fund expenses (admin, legal, etc.) in addition to investment management fees for the portion of composite containing these vehicles.
Fee Schedule
The annual investment advisory fee, generally payable quarterly, is as follows: 0.55% on the first $50mn; 0.45% on the next $100mn; 0.40% thereafter.
Internal Dispersion
Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the Composite for the entire year. Internal dispersion is not calculated if the Composite does not contain at least 6 portfolios for the entire year.
Annualized Standard Deviation
The three-year annualized standard deviation measures the variability of the Composite and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.
Availability and Trademark Disclosures
The firm's list of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled fund descriptions are available upon request.

Additional Notes and Disclosures
Starting from September 1, 2022, Composite Net of Fee return calculations for this composite were changed from using actual investment advisory fees to using model investment advisory fees.
