Neuberger Emerging Markets Equity Select Fund

Important Notes

Effective September 14, 2026, the Neuberger Berman Emerging Markets Equity Fund changed name to Neuberger Emerging Markets Equity Select Fund. The fund's investment strategy changed from an actively managed emerging markets equity core/quality strategy to an actively managed emerging markets equity value strategy, implemented through a more concentrated portfolio. The revised investment approach focuses on attractively valued companies, including those that may be overlooked or underappreciated by the market, while maintaining the fund's long-term capital appreciation objective. Performance shown for periods prior to 14 September 2026 was achieved under a different investment objective and investment strategy and may not be representative of the fund's current approach.

1. The Fund invests primarily in equity and equity-linked securities which are listed or traded on recognised markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in emerging market countries; (2) are organised under the laws of and have a principal office in emerging market countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in emerging market countries.

2. The Fund invests primarily in emerging markets and therefore is subject to emerging market and concentration risks. Emerging markets may be subject to additional risks due to more uncertainties relating to their social, economic and political factors. Negative factors in the development of emerging markets may affect the value of the underlying securities. The Fund is also subject to currency, currency hedging and equity risks.

3. The Fund may use financial derivative instruments ("FDIs") for efficient portfolio management and hedging purposes. FDIs, however, will not be extensively used for investment purposes. The Fund may be subject to higher counterparty, liquidity, valuation, volatility and over-the-counter transaction risks. This may result in a significant loss of the Fund.

4. In respect of the distributing shares, the Fund aims to pay dividend on a monthly basis. However, the distribution rate is not guaranteed. The Fund may at its discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value of the relevant shares.

5. Investors should not solely rely on this document to make any investment decision. Please refer to the Prospectus for details including the risk factors before making any investment decision.

INVESTMENT OBJECTIVE
