What were the Fund's costs for the year? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class E	\$2	0.02%

How did the Fund perform last year?

Over the past twelve months the small cap market has been quite volatile, with investors reacting strongly to a series of policy announcements and macroeconomic data points. For much of the period, highly speculative companies, many of which we believe are lower quality, materially outperformed and the stocks in our high-quality focused Fund, were generally out of favor. Consequently, during the period, the Fund posted a negative return and lagged the Russell 2000® Index (the Index).

Performance Attribution

Top Contributors

- ↑ Our lack of exposure to biotechnology firms, which are present in the Index and down sharply, added value
- ↑ Overweight positions in the Industrials and IT sectors versus the Index

Top Detractors

- ↓ A number of Fund holdings declined for company specific reasons (primarily IT and Health Care names)

The graph shows how a hypothetical investment in the Fund changed in value over the period and for the amount indicated above, and compares it with a broad-based market index and, if applicable, an additional index. The graph and table do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the sale of Fund shares. The performance prior to Class E's inception date of January 11, 2022 is that of the Fund's Investor Class, which had higher expenses than Class E so its performance typically would have been lower than that of Class E. **Results represent the Fund's past performance, which is not a good predictor of how the Fund will perform in the future.** For current performance, please visit www.nb.com/performance.
