Neuberger Global Senior Floating Rate Income Fund

FUND OBJECTIVE

The fund targets income generation whilst seeking to preserve investors' capital.

The fund's managers seek to achieve this objective by investing in a portfolio of below investment grade North American and European Union senior secured corporate loans with selective use of senior secured bonds, diversified by both borrower and industry.

There can be no assurance that the fund will achieve its investment objective.

Current Portfolio Yield is a market-value weighted average of the current yields of the holdings in the portfolio, calculated as the coupon (base rate plus spread) divided by current price. The calculation does not take into account any fund expenses or sales charges paid, which would reduce the results. The Current Yield for the fund will fluctuate from month to month. The Current Yield should be regarded as an estimate of the fund's rate of investment income, and it may not equal the realised distribution rate for each share class. You should consult the fund's prospectus for additional information about the fund's dividends and distributions policy. **Past performance is not a reliable indicator of future results.**

*The ongoing charge figure (which includes the management fee) is an annual charge based on expenses for the period ending 31 December 2025.

Some share classes listed are subject to restrictions, please refer to the fund's prospectus for further details.
Investors who subscribe in a currency different from their local currency should note that the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Before subscribing please refer to the Prospectus.

For a full glossary of terms, please refer to **www.nb.com/glossary**

Hedged Share Class. Hedged share classes which are designated in a currency other than the base currency of the fund, are hedged into the base currency. For details please refer to the prospectus.

Fund price is as of the date of the factsheet. Please note that the last distribution quoted is the dividend payout per share on the relevant share class's last distribution date which varies
(monthly, weekly, quarterly, semi-annually or annually) and may be different from the date of the factsheet.

The annual yield figure quoted is the distribution yield, calculated by multiplying the dividend by pay periods, dividing by the net asset value (NAV) of the last distribution date and then multiplying by 100%. It is for reference only and is not indicative of the return of the Fund's future dividend to be received by investors.

In respect of distributing share classes, the Directors of the Company may at their discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value (NAV) of the relevant shares. Dividends are not paid for all share classes and are not guaranteed. A positive distribution yield does not imply a positive return, and some share classes listed are subject to further restrictions. Please refer to the Fund's prospectus for further details.

RISK CONSIDERATIONS

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the fund.

Interest Rate Risk: The risk of interest rate movements affecting the value of fixed-rate bonds.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

Derivatives Non-Complex Risk: The fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the fund's assets and the Investment Manager will ensure that the fund's use of derivatives does not materially alter the overall risk profile of the fund. Please refer to the Prospectus for a full list of the types of derivative that the fund may utilise.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

For full information on these and other risks, please refer to the fund prospectus.

This Fund meets the requirements of Article 8 of the SFDR. Further information is available in the Fund's offering documents and at www.nb.com

Neuberger Berman Investment Funds II ICAV (the "**ICAV**"), an umbrella type Irish collective asset-management vehicle with variable capital and segregated liability between Sub-funds. The ICAV was originally incorporated as a variable capital public limited company and converted to an Irish collective asset-management vehicle on 1 September 2025 and registered in Ireland under the Irish Collective Asset-management Vehicles Act, 2015 (the "**ICAV Act**"). The ICAV is authorised by the Central Bank pursuant to the ICAV Act as a Qualifying Investor AIF. Neuberger Berman Asset Management Ireland Limited may decide to terminate the arrangements made for the marketing of its funds in all or a particular country.

See prospectus for eligibility criteria. Investors should be aware that investment in the ICAV carries with it the potential for above average risk and is only suitable for people who are in a position to take such risks. The value of Shares may go down as well as and up investors may not get back any of the amount invested. The difference at any one time between the issue and repurchase price of Shares means that an investment in the ICAV should be viewed as medium to long-term. Investment in the ICAV should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors.

Investors should be aware that the Directors may declare dividends out of capital in respect of the Distributing Classes and that in the event that they do, the capital of such Shares will be eroded, such distributions will be achieved by forgoing the potential for future capital growth and that this cycle may be continued until all capital in respect of the Shares is depleted. Investors in the Distributing Classes should also be aware that the payment of distributions out of capital by the ICAV may have different tax implications for them to distributions of income and you are therefore recommended to seek tax advice in this regard.
