What were the Fund's costs for the year? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R6	\$52	0.50%

How did the Fund perform last year?

The Fund posted a strong return but lagged the Russell 1000® Value Index (the Index) on a relative basis. Stock selection contributed while sector allocation detracted from relative performance. The largest relative contributors were an allocation to Wheaton Precious Metals and Agnico Eagle Mines. Individual stock detractors included overweights in Newmont Corp. (which was sold during the period) and Danaher Corp. We remain committed to our investment philosophy of pure value and discipline, which historically has been beneficial, particularly during this phase of the economic cycle.

The graph shows how a hypothetical investment in the Fund changed in value over the period and for the amount indicated above, and compares it with a broad-based market index and, if applicable, an additional index. The graph and table do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the sale of Fund shares. The performance prior to Class R6's inception date of January 18, 2019 is that of the Fund's Investor Class, which had higher expenses than Class R6 so its performance typically would have been lower than that of Class R6. **Results represent the Fund's past performance, which is not a good predictor of how the Fund will perform in the future.** For current performance, please visit www.nb.com/performance.
