OVERVIEW

- Fundamentally driven large cap equity strategy with a dynamic approach to growth investing through a quality lens
- Focus on high-quality, moated businesses with strong cash flow and profitable earnings, committed to finding companies that can potentially disrupt the status quo and transform industries
- Utilize an Economic Value Added (EVA) framework to identify companies the team believes are generating sustainable, value-creating growth
- Experienced portfolio management team with an average of over 25 years in the investment management industry
- Team is dedicated to continuously improving the investment process by incorporating new tools to enhance traditional fundamental analysis

INVESTMENT PERFORMANCE

As of September 30, 2026

	Annualized Returns							Expense Ratio[1]	
	QTD	YTD	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception*	Gross	Net
Regular NAV	2.20	7.74	8.39	-	-	-	13.31	2.83	0.44
Market Price	2.34	7.78	8.53	-	-	-	13.40		
Russell 1000 Growth Index[2]	0.92	6.30	7.50	-	-	-	13.64		

Performance data quoted represent past performance, which is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original costs. Results are shown on a "total return" basis and include reinvestment of all dividends and capital gain distributions. Current performance may be lower or higher than the performance data quoted. For current performance data, including current to the most recent month end, please visit nb.com/ETFs.
*Fund inception date was 12/18/2024. Return information shown for less than one year is cumulative, not annualized. The Fund is new and has limited performance history that should not be relied on.
Past performance, particularly for brief periods of time, are not indicative of future results. The **Market Price** is the official closing price as of the closing time of the NYSE Arca (typically 4 p.m., Eastern time). **Net Asset Value (NAV)** is determined at the close of each business day, and represents the dollar value of one share of the Fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. ETF investors should not expect to buy or sell shares at NAV.

SECTOR BREAKDOWN (%)[5]

	Fund	Benchmark
Information Technology	44.1	56.4
Communication Services	17.5	16.5
Consumer Discretionary	9.8	7.2

IMPORTANT RISK DISCLOSURE

The composition, characteristics, sectors, and holdings of the Fund are as of the period shown and are subject to change without notice. The benchmark is the Russell 1000 Growth Index.
1. Net expense ratio represents the total annual operating expenses that shareholders pay (after the effect of fee waivers and/or expense reimbursements). The Fund's investment manager has contractually undertaken to waive and/or reimburse certain fees and expenses of the Fund so that the total annual operating expenses (excluding interest, brokerage commissions, acquired fund fees and expenses, taxes including any expenses relating to tax reclaims, dividend and interest expenses relating to short sales, and extraordinary expenses, if any) of the Fund are limited to 0.43% of average net assets until 8/31/2027 (after taking into account the Fee Waiver discussed below) and 0.56% of average net assets from 9/1/2027 to 8/31/2029 and may not be terminated during its term without the consent of the Board of Trustees. The Fund has agreed that it will repay the Manager for fees and expenses waived or reimbursed for the Fund provided that repayment does not cause annual Operating Expenses to exceed the expense limitation in place at the time the fees were waived and/or the expenses were reimbursed, or the expense limitation in place at the time the Fund repays the Manager, whichever is lower. Any such repayment must be made within three years after the year in which the Manager incurred the expense. Information as of the most recent prospectus dated 12/18/2025, as amended and supplemented. The Manager has contractually undertaken to waive its management fee by 0.13% of the Fund's average daily net assets ("Fee Waiver"). The undertaking lasts until 8/31/2027 and may not be terminated during its term without the consent of the Board of Trustees. The Fee Waiver is not subject to repayment under the expense limitation arrangement described above and will not reduce expenses below the expense limitation arrangement described above. Please see the Fund's current prospectus for additional details.
2. The **Russell 1000 Growth Index** measures the performance of the large cap growth segment of the US equity universe. It includes those Russell 1000 companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 years). The Index is reconstituted annually to ensure the represented companies continue to reflect growth characteristics. Effective after the market close on March 21, 2025, FTSE Russell implemented a capping methodology to all Russell U.S. Style Indices. Any individual company weights in the index greater than 22.5% will be capped, and all individual companies that have an index weight greater than 4.5% will be capped to a 45% aggregate weight in the index. This will be applied quarterly going forward, but historical Index returns will not be restated. Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and individuals cannot invest directly in an index. **Past performance does not guarantee future results.** Please note that indices do not take into account any fees and expenses of investing in the individual securities that they track, and that individuals cannot invest directly in any index. Data about the performance of indices are prepared or obtained by Neuberger Berman and include reinvestment of all dividends and capital gain distributions. The Fund may invest in many securities not included in the above-described indices.
3. **Forward P/E ratio** is calculated by dividing the current price of the stock by its forecasted 12 months earnings per share. **Earnings Per Share (EPS)** is calculated by dividing total earnings by the weighted average number of common shares outstanding. EPS can be actual (trailing), estimated for the current year, or estimated for the coming year. Negative EPS indicates negative earnings. The **Long-Term Growth Rate** is calculated weekly by taking the median of all First Call contributing broker estimates of a company's projected earnings growth over a period of two to five years. The long-term growth rate is based on projections, which may or may not be realized.
4. **Beta** measures market-related risk. A beta less than 1 indicates the portfolio is less volatile than the index, while a beta greater than 1 indicates more volatility. **Standard Deviation** measures the volatility of the Fund's and Benchmark's returns. Higher deviation indicates higher volatility and risk. **Upside Capture** measures a manager's performance in up markets relative to the market by dividing the manager's return by the market's return during up periods. A value of 110 indicates the manager performs 10% better than the market. **Downside Capture** measures a manager's performance in down markets relative to the market by dividing the manager's return by the market's return during down periods. A value of 90 indicates the manager's loss is 90% of the market's loss. **Active Share** measures the percentage of fund assets that are invested differently from the benchmark. **Sharpe Ratio** measures the risk-adjusted return of a portfolio, calculated by dividing the excess return (portfolio annualized return minus the risk-free rate) by the portfolio standard deviation. A higher Sharpe Ratio indicates better performance. **Portfolio Turnover** is calculated since inception.
5. Figures are derived from FactSet as of 09/30/2026. The Global Industry Classification Standard℠ is used to derive the component economic sectors of the benchmark and the Fund. The Global Industry Classification Standard ("GICS")℠ was developed by, and is the exclusive property of, MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)," "GICS" and "GICS Direct" are service marks of MSCI and Standard & Poor's.
6. Portfolio holdings are expressed as a percentage and are calculated by taking the market value of each holding and dividing it by the Fund's NAV. Portfolio holdings are subject to change. For current portfolio holdings please download "Fund Holdings" as a CSV or PDF at nb.com/ETFs. Portfolio holdings should not be considered as investment advice or a recommendation to buy, sell or hold any particular security. It should not be assumed that an investment in the securities identified was or will be profitable.
The Fund is classified as non-diversified. As such, the percentage of the Fund's assets invested in any single issuer, or a few issuers is not limited as much as it is for a Fund classified as diversified. Investing a higher percentage of its assets in any one or a few issuers could increase the Fund's risk of loss and its share price volatility, because the value of its shares would be more susceptible to adverse events affecting those issuers. Because the prices of most growth stocks are based on future expectations, these stocks tend to be more sensitive than value stocks to bad economic news and negative earnings surprises. When these expectations are not met or decrease, the prices of these stocks may decline, sometimes sharply, even if earnings showed an absolute increase. Bad economic news or changing investor perceptions may adversely affect growth stocks across several sectors and industries simultaneously.
All ETF products are subject to risk, including possible loss of principal. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions, including adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment. An individual security may be more volatile, and may perform differently, than the market as a whole.
Unlike mutual funds, ETF shares are purchased and sold in secondary market transactions at negotiated market prices rather than at net asset value ("NAV") and as such ETFs may trade at a premium or discount to their NAV. As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. ETF shares may only be redeemed at NAV by authorized participants in large creation units. There can be no guarantee that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed. The trading of shares may incur brokerage commissions. The Fund has a limited number of Authorized Participants. To the extent they exit the business or are otherwise unable to proceed in creation and redemption transactions with the Fund and no other Authorized Participant is able to step forward to create or redeem, shares of the Fund may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting. Unexpected episodes of illiquidity, including due to market factors, instrument or issuer-specific factors and/or unanticipated outflows, could have a significant negative impact on the Fund's NAV, liquidity, and brokerage costs. To the extent the Fund's investments trade in markets that are closed when the Fund is open, premiums or discounts to NAV may develop in share prices.
The actual risk exposure taken by the Fund in its investment program will vary over time, depending on various factors including the Portfolio Managers' evaluation of issuer, political, regulatory, market, or economic developments. There can be no guarantee that the Portfolio Managers will be successful in their attempts to manage the risk exposure of the Fund or

M-000809 ©2026 Neuberger Berman LLC. All rights reserved.

will appropriately evaluate or weigh the multiple factors involved in investment decisions, including issuer, market and/or instrument-specific analysis, valuation and financially material environmental, social, and governance factors.

At times, mid- and large-cap companies may be out of favor with investors. Compared to smaller companies, large-cap companies may be unable to respond as quickly to changes and opportunities and may slower rate. The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. If a strategy is applied at an inappropriate time or market conditions or trends are judged incorrectly, the use of options may lower the Fund's return. There can be no guarantee that the use of options will increase the Fund's return or income. In addition, there may be an imperfect correlation between the movement in prices of options and the securities underlying them and there may at times not be a liquid secondary market for various options. An abrupt change in the price of an underlying security could render an option worthless.

The Fund is new with limited operating history to evaluate. New funds may not attract sufficient assets to achieve investment, trading or other efficiencies and, if the Fund does not grow in size, it will be at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV and/or a stop to trading.

Foreign securities involve risks in addition to those associated with comparable U.S. securities. Additional risks include exposure to less developed or less efficient trading markets; social, political, diplomatic, or economic instability. As a result, foreign securities may fluctuate more widely in price, and may also be less liquid, than comparable U.S. securities.

Risk is an essential part of investing. No risk management program can eliminate the Fund's exposure to adverse events.These and other risks are discussed in more detail in the Fund's prospectus. Please refer to the Fund's prospectus for a complete discussion of the Fund's principal risks.
