KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of Neuberger Berman Investment Funds plc, which is an investment company incorporated under the laws of Ireland and authorised as a UCITS umbrella fund by the Central Bank of Ireland.
- The Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments with a focus on downside protection.
- Dividend policy:
 - o Accumulating shares: No dividends will be paid.
 - o Distributing shares: Dividends will be declared on a quarterly basis (and paid within 30 Business Days thereafter) or, in respect of (Monthly) Distributing Classes, shall be declared on or prior to the last Business Day of each month (and paid within three Business Days thereafter) at the discretion of the Directors.

Refer to "THE COMPANY", "THE PORTFOLIOS" and "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- The Portfolio will invest in debt securities and money market instruments issued by governments and their agencies and corporations worldwide. Securities will be listed,

dealt or traded on Recognised Markets without any particular focus on any one industrial sector. Securities may be rated investment grade or below by a Recognised Rating Agency. On an ancillary basis, the Portfolio may hold preferred stocks issued by public or corporate issuers. • The Manager and the Sub-Investment Manager will employ a flexible investment approach that tactically allocates, either directly or indirectly through the use of FDI, among fixed income sectors to adapt to changing market conditions. • The Portfolio's net market exposure may vary in time and range from a maximum net long position of 200% to a maximum net short position of 0% of the NAV of the Portfolio. • The maximum proportion of the Portfolio's NAV that can be subject to total return swaps is 30%. The expected proportion of the Portfolio's NAV that will be subject to total return swaps is 5%. • Repo Contracts may be used subject to the conditions and limits set out in the Prospectus. • Under normal market conditions, the Manager anticipates that the Portfolio's average interest rate duration will be within a range of +/- 3 years of the duration of the Benchmark and (ii) the Portfolio seeks to maintain an average credit quality rating of investment grade. • The Portfolio will not utilise securities lending or margin lending. • The Portfolio may use FDIs for investment purposes, efficient portfolio management purposes and/or hedging purposes. The Portfolio may be leveraged up to approximately 550% of its NAV as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. • The Portfolio may or may be expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques. Parties Involved	
WHO ARE YOU INVESTING WITH? • You are investing in Neuberger Berman Investment Funds plc, an umbrella fund of which the Portfolio is a sub-fund. • The manager is Neuberger Berman Asset Management Ireland Limited and the sub-investment managers are Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Europe Limited. • The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.	Refer to "THE COMPANY", "MANAGEMENT", "OTHER PARTIES" and "INSOLVENCY OF THE PARTIES" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Refer to "RISK FACTORS" of the Singapore Prospectus for further information on the risk of the product.
Market and Credit Risks	
• Fixed Income Securities and Downgrade Risk – Fixed income securities are subject to credit risk and price volatility. Fixed income securities are also exposed to the risk of being downgraded, which can cause a significant drop in the value of the Portfolio. The Manager or Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.	

• Lower Rated Securities Risk – The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such high yield securities or may be able to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities at certain times. • Credit and Sovereign Debt Risk – The Portfolio may invest in government/sovereign/corporate fixed income securities. Corporate issuers of fixed income securities may fail to meet their interest repayments, or repay debt, which may result in the Portfolio suffering temporary or permanent losses. Investment in sovereign debts issued or guaranteed by governments may involve a high degree of risk, as default can occur if the government or sovereign entity is not able or willing to repay the principal and/or interest when due. • Risks Associated with Collateralised and/or Securitised Products – The Portfolio may invest in collateralised and/or securitised products, which may be prone to substantial price volatility, and subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the return of the securities • Currency Risk – The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. The currency exchange rates of Emerging Market Countries tend to be more volatile than those of more developed countries. As the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk. • Currency Hedging Risk – Currency hedging instruments may involve the risk of a default by a counterparty. • Risks Related to Downside Protection Strategy – By seeking to provide downside risk management, Portfolio may be precluded from fully capturing the upside in rising markets.		
Liquidity Risks		
• The Portfolio is not listed in Singapore and you can redeem only on Dealing Days – There is no secondary market for the Portfolio. The Portfolio may be unable to sell an investment readily at its fair market value. This may affect the value of the Portfolio and in extreme market conditions, its ability to meet redemption requests upon demand. Your right to redeem may be suspended or deferred under certain circumstances.		
Product-Specific Risks		
• Risks relating to the use of FDI – FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of the Portfolio's NAV. • High Leverage Risk – The Portfolio may have a net leveraged exposure of over 100% of its NAV as a result of its use of FDI, and may result in a significant or a total loss of the Portfolio. • Risks relating to dividend payment – Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment which may result in an immediate decrease in the NAV of the relevant shares. An investment in high yield securities does not necessarily imply high dividend distribution for all share classes.		
FEES AND CHARGES		
WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT? Payable directly by you – You will need to pay the following fees and charges:		Refer "FEES AND CHARGES" of the Singapore Prospectus for further information

VALUATIONS AND EXITING FROM THIS INVESTMENT																				
HOW OFTEN ARE VALUATIONS AVAILABLE? The NAV per share in respect of each Dealing Day is normally available on www.nb.com on the following Business Day. HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COST IN DOING SO? • The Company does not offer a right to cancel subscriptions into the Portfolio, but you should check if your Singapore distributor will allow you to do so. You can exit the Portfolio by submitting your redemption form to the Singapore distributor from whom you had originally purchased your shares. • Shares may be redeemed on any Dealing Day. • Redemption proceeds will normally be made to Singapore distributors within 10 Business Days and you should check with your Singapore distributor when you can expect to receive your redemption proceeds. • The redemption price of your shares is determined as follows: - o If your redemption form is received by the Administrator before 11 a.m. (Irish time) on a Dealing Day, your Shares will normally be redeemed at their NAV as of that Dealing Day. - o If your redemption form is received by the Administrator after 11 a.m. (Irish time) on a Dealing Day, your Shares will normally be redeemed at their NAV as of the next Dealing Day. (Please confirm with your Singapore distributor the applicable Singapore cut-off time for receiving your redemption form in order for your Shares to be redeemed at their NAV as of a particular Dealing Day) • The redemption proceeds that you will receive will be the redemption price per share multiplied by the number of shares redeemed, less any charges. An example is as follows: <table><tr><td><u>1,000 shares</u></td><td>x</td><td><u>\$1.10</u></td><td>=</td><td><u>\$1,100</u></td><td>-</td><td><u>\$0</u></td><td>=</td><td><u>\$1,100</u></td></tr><tr><td>Redemption request</td><td></td><td>Redemption Price</td><td></td><td>Gross Redemption Proceeds</td><td></td><td>Redemption Charge*</td><td></td><td>Net Redemption Proceeds</td></tr></table>		<u>1,000 shares</u>	x	<u>\$1.10</u>	=	<u>\$1,100</u>	-	<u>\$0</u>	=	<u>\$1,100</u>	Redemption request		Redemption Price		Gross Redemption Proceeds		Redemption Charge*		Net Redemption Proceeds	Refer to "SUBSCRIPTION FOR SHARES - Cancellation of Subscription", "REDEMPTION OF SHARES" and "OBTAINING PRICE INFORMATION IN SINGAPORE" of the Singapore Prospectus for further information on valuation and exiting from the product.
