Hedged Class.

[1] As a percentage of the Portfolio's Net Asset Value.

[2]Benchmark: ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (Total Return, Euro, Hedged). Investors should note that the Portfolio does not intend to track this index, which is included here for performance comparison purposes only. Performance returns of the benchmark are calculated in EUR.

[3]Performance returns are calculated in the currency of the relevant Share Class on (i) a NAV to NAV basis (ii) a NAV to NAV basis taking into account an assumed 5% initial sales charge and nil realisation fee indicated in the table above as "with initial sales charge", and both (i) and (ii) are calculated on the assumption that all dividends and distributions made by the relevant Share Class (if any) are reinvested, taking into account all charges which would have been payable upon such reinvestment. Share Classes which are designated in a currency other than USD are hedged into the Base Currency of the Portfolios (i.e. USD). Further details are set out in the Prospectus under the section "Share Class Hedging".

[4] Up to 5%. The initial sales charge is a percentage of the purchase price and may be charged by either the Distributor or any subdistributor.

[5] Details on the distribution policies of the Share Classes are set out in the Prospectus under the section headed "Distribution Policy". Distributing classes may pay dividends out of capital and such dividends may result in an immediate decrease in the NAV of the relevant Shares. Distributions are not guaranteed.

[6]Credit quality ratings are based on the highest rating of three agencies (to the extent rated): Moody's, S&P and Fitch. For holdings that are rated by two or only one of the three agencies, the higher rating is used. Expressed in S&P nomenclature. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.
