Neuberger Short Duration High Yield Engagement Fund

USD I Accumulating Class

MORNINGSTAR RATING™

★★★★

FUND OBJECTIVE

The fund seeks to generate high current income from investments in short duration bonds which meet the Sustainable Investment Criteria as described in the prospectus supplement. The fund promotes the following environmental and social characteristics:

- Contributes towards achievement of the Paris Climate Agreement in aiming to reduce the fund's carbon footprint across scope 1, 2 and material scope 3 greenhouse gas emissions, equating to a 50% reduction by 2030 relative to a 2019 baseline level and a subsequent decline to net zero by 2050.
- Contributes towards achievement of the UN Sustainable Development Goals by engaging with at least 90% of investee issuers on incremental actions that they can take within their products, services, operations or processes which are aligned with these goals (or where there is potential for increased alignment with these goals, following engagement with these companies).
- Maintains an average ESG rating for the Portfolio that is above that of the broad U.S. high yield market, as represented by the ICE / BAML U.S. High Yield Index, which will be assessed based on third party ESG scores from an established external provider.

High yield bonds have a lower credit rating because they carry a higher risk of not being paid back. High yield bonds typically offer a higher income to make them attractive to investors. Short duration high yield bonds have a shorter maturity (the date on which a bond is repaid to the investor) and a lower duration (how long it takes in years for the bond to be repaid); with low duration classified as approximately two years relative to four years for the broader high yield universe. The fund invests primarily in short duration high yield bonds issued by: US corporations or Non-US corporations which conduct a majority of their activity in the US.

RISK CONSIDERATIONS

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Emerging Markets Risk: Emerging markets are likely to bear higher risk due to a possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions which may lead to lower liquidity. **The NAV of the fund may experience medium to high volatility due to lower liquidity and the availability of reliable information, as well as due to the fund's investment policies or portfolio management techniques.**

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the fund.

Interest Rate Risk: The risk of interest rate movements affecting the value of fixed-rate bonds.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

Derivatives Risk: The Fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the Fund's leverage significantly which may cause large variations in the value of your share. (Investors should note that the Fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI)). Certain investment risks apply in relation to the use of FDI. The use of leverage can amplify both gains and losses, which may result in a significant or a total loss of the fund's value in adverse market conditions.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

For full information on these and other risks, please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

Credit quality ratings are based on the ICE Bank of America ("ICE BofA") Master High Yield Index composite ratings. The ICE BofA composite ratings are updated once a month on the last calendar day of the month based on information available up to and including the third business day prior to the last business day of the month. The ICE BofA composite rating algorithm is based on an average of the ratings of three agencies (to the extent rated). Generally the composite is based on an average of Moody's, S&P and Fitch. For holdings that are unrated by the ICE BofA Index composite, credit quality ratings are based on S&P's rating. Holdings that are unrated by S&P may be assigned an equivalent rating by the investment manager. No NRSO has been involved with the calculation of credit quality and the ratings of underlying portfolio holdings should not be viewed as a rating of the portfolio itself. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.
