PORTFOLIO UPDATE

Through September, the portfolio has approved 100 private equity investments alongside 65 leading managers, who we believe are well positioned to drive value and improve these businesses. During the month, the portfolio made one new investment and added capital to an existing portfolio company:

- **Technology Company #1** (existing) is an enterprise data analytics and AI platform which we first invested in earlier this year.
- **Technology Company #2** (new) is a payments platform.

Since inception, the portfolio's performance has been mostly driven by company-level appreciation tied to business fundamentals and sponsor execution of value-creation plans, rather than by one-time discount capture. Our direct investment approach emphasizes high-conviction, hand-selected investments in growing businesses, with a focus on long-term alpha generation through rigorous underwriting, ongoing monitoring, and active engagement with our leading sponsors.

With 94% of the portfolio invested within the past two years, the weighted-average hold period is one year. We believe lead sponsors remain in the early stages of executing their value-creation plans, leaving meaningful room for further growth. As of September 30, 2026, the current private equity portfolio is valued at a 1.3x gross multiple of invested capital.

Deal flow remains robust, fueled by the strength and network of relationships across the $170+ billion Neuberger Private Markets platform. We believe we are invested in high-quality, resilient companies that we are excited to own today, tomorrow, and in the future.
