

NEUBERGER INTRINSIC VALUE FUND

SUMMARY PROSPECTUS

Class A Shares (NINAX), Class C Shares (NINCX), Institutional Class Shares (NINLX)

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders, and other information about the Fund (including the Fund's SAI) online at: for Class A shares, <http://www.nb.com/equityfunds/a>; for Class C shares, <http://www.nb.com/equityfunds/c>; or for Institutional Class shares, <http://www.nb.com/equityfunds/institutional>. You can also get this information at no cost by calling 877-628-2583 (Class A and Class C) or 800-366-6264 (Institutional Class), or by sending an e-mail request to fundinfo@nb.com. You can also get this information from your financial intermediary or any financial intermediary authorized to sell the Fund's shares. The Fund's prospectus and SAI, each dated December 18, 2025 (as each may be amended or supplemented), are incorporated herein by reference.

GOAL

The Fund seeks long-term growth of capital.

FEES AND EXPENSES

These tables describe the fees and expenses that you may pay if you buy, hold or sell shares of the Fund. Under the Fund's policies, you may qualify for initial sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Neuberger funds. Certain financial intermediaries have sales charges and/or policies and procedures regarding sales charge waivers applicable to their customers that differ from those described below. More information about these and other discounts is available from your financial intermediary, in "Sales Charge Reductions and Waivers" on page 213 in the Fund's prospectus, and in Appendix A to the Fund's prospectus. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

	Class A	Class C	Institutional Class
Shareholder Fees (fees paid directly from your investment)			
Maximum initial sales charge on purchases (as a % of offering price)	5.75	None	None
Maximum contingent deferred sales charge (as a % of the lower of original purchase price or current market value) ¹	None	1.00	None
Annual Fund Operating Expenses (expenses that you pay each year as a % of the value of your investment)			
Management fees	1.02	1.02	0.91
Distribution and/or shareholder service (12b-1) fees	0.25	1.00	None
Other expenses	0.06	0.05	0.05
Total annual operating expenses	1.33	2.07	0.96

¹ For Class A shares, a contingent deferred sales charge ("CDSC") of 1.00% applies on certain redemptions made within 18 months following purchases of \$1 million or more made without an initial sales charge. For Class C shares, the CDSC is eliminated one year after purchase.

Expense Example

The expense example can help you compare costs among mutual funds. The example assumes that you invested \$10,000 for the periods shown, that you redeemed all of your shares at the end of those periods, that the Fund earned a hypothetical 5% total return each year, and that the Fund's expenses were those in the table. For Class A and Institutional Class shares, your costs would be the same whether you sold your shares or continued to hold them at the end of each period. Actual performance and expenses may be higher or lower.

	1 Year	3 Years	5 Years	10 Years
Class A	\$703	\$972	\$1,262	\$2,084
Class C (assuming redemption)	\$310	\$649	\$1,114	\$2,400
Class C (assuming no redemption)	\$210	\$649	\$1,114	\$2,400
Institutional Class	\$ 98	\$306	\$ 531	\$1,178

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12% of the average value of its portfolio.

Neuberger Quality Equity Fund

Neuberger Small Cap Growth Fund

Supplement to the Summary Prospectuses, Prospectuses and Statement of Additional Information, each dated December 18, 2025, as amended and supplemented

BB0184_0726

The following change applies to the Summary Prospectuses, Prospectuses and Statement of Additional Information for Neuberger Genesis Fund, Neuberger Intrinsic Value Fund, Neuberger Multi-Cap Opportunities Fund, Neuberger Quality Equity Fund and Neuberger Small Cap Growth Fund (each a “Fund” and together, the “Funds”).

The Board of Trustees of Equity Funds (“Board”) approved stock splits and reverse stock splits of the issued and outstanding shares of certain classes of each Fund (collectively, the “Stock Split”). The Stock Split will be completed for certain classes of the Funds as outlined in the chart below after the close of business on September 11, 2026. As a result of the Stock Split, for each share of each affected class of each Fund a shareholder currently holds, the shareholder will receive a proportional number of shares of the same class of the respective Fund with the same aggregate dollar value. Thus, the total dollar value of an investment in a Fund will be unchanged and each shareholder will continue to own the same percentage (by value) of the Fund immediately following the Stock Split as the shareholder did immediately prior to the Stock Split. The Stock Split will not be a taxable event, nor does it have an impact on any Fund’s holdings or its performance.

The Stock Split will be carried out in accordance with a stock split ratio calculated to result in net asset values per share (“NAVs”) that better align the share class prices of each of the Funds. The ratios, which are based on the NAVs of each respective Fund’s various classes as of July 14, 2026, are shown in the table below.

The shares of each Fund impacted by the Stock Split will be offered, sold, and redeemed on a Stock Split-adjusted basis beginning on the first business day following the Stock Split. Each Fund will affect the Stock Split after the close of business on September 11, 2026. Each shareholder’s next account statement after the Stock Split is completed will reflect the Stock Split.

Reason for the Stock Split

The Board approved the Stock Split in order to bring the NAVs of the classes of each Fund into better alignment with one another. The Stock Split is designed to reduce the variance between the NAVs in order for shares of each respective class of each respective Fund to have approximately the same NAV. This is intended to reduce marketplace confusion and bring greater uniformity to the ratio of capital gains to the NAVs across the classes of each affected Fund.

FUND CLASS	STOCK SPLIT RATIO (OLD TO NEW)
Genesis Fund Advisor Class	1:0.9623
Genesis Fund Class E	1:1.0062
Genesis Fund Investor Class	1:0.9953
Genesis Fund Institutional Class	1:1.0000 (i.e., no split)
Genesis Fund R6 Class	1:1.0000 (i.e., no split)
Genesis Fund Trust Class	1:0.9895
Intrinsic Value Fund Class A	1:0.9684
Intrinsic Value Fund Class C	1:0.9067
Intrinsic Value Fund Institutional Class	1:1.0000 (i.e., no split)
Intrinsic Value Fund Class R6	1:1.0090
Multi-Cap Opportunities Fund Class A	1:0.9926
Multi-Cap Opportunities Fund Class C	1:0.9131
Multi-Cap Opportunities Fund Class E	1:1.0000 (i.e., no split)
Multi-Cap Opportunities Fund Institutional Class	1:1.0000 (i.e., no split)
Quality Equity Fund Class A	1:0.9930
Quality Equity Fund Class C	1:0.9394
Quality Equity Fund Class E	1:1.0045
Quality Equity Fund Institutional Class	1:1.0000 (i.e., no split)

PRINCIPAL INVESTMENT STRATEGIES

To pursue its goal, the Fund invests mainly in common stocks of small- and mid-capitalization companies, which it defines as those companies with a total market value between \$50 million and \$10 billion at the time the Fund first invests in them. The Fund may continue to hold or add to a position in a stock after the company's market value has increased above or decreased below this range.

The Fund's strategy consists of using a bottom-up, research driven approach to identify stocks of companies that are available at market prices below the Portfolio Managers' estimate of their intrinsic value and that the Portfolio Managers believe have the potential for appreciation in value over time. The Portfolio Managers' estimate of a company's intrinsic value represents their view of the company's true, long-term economic value, the market's view of which may be currently distorted by market inefficiencies. The intrinsic value estimate represents what the Portfolio Managers believe a company could be worth if it is acquired, if its profitability returns to its long-term average level, or if its valuation moves in line with those companies that the Portfolio Managers see as its publicly traded peers.

The Portfolio Managers believe that while markets are often efficient, certain investment opportunities tend to be mispriced due to market inefficiencies. For example, market inefficiencies may exist at times in the small capitalization segment of the market due to a lack of widely available research on these companies. The Portfolio Managers attempt to exploit these market inefficiencies and look for opportunities to invest in companies they believe to be undervalued, such as companies with the following characteristics:

- **Complex Companies:** These companies typically have multiple lines of business that are in different industries or sectors and/or that have different growth rates and profitability characteristics.
- **Cyclical Companies:** These companies typically have ebbs and flows in their business depending on demand patterns for their products, the length of product cycles, or other transient factors.
- **Companies in a Period of Interrupted Growth:** Typically, these are companies in attractive, high growth markets that have suffered what the Portfolio Managers believe is a temporary setback and/or are in transition to a more mature, lower growth business model that focuses more on current earnings than on rapid growth.

In seeking to identify these types of companies, the Portfolio Managers perform an initial screening to identify those companies that have stock prices that are trailing the performance of the overall market and that the Portfolio Managers believe are attractive relative to current cash flows. Next, the Portfolio Managers establish an estimate of a company's intrinsic value. The Portfolio Managers will invest in a company's stock on the basis of the company's discount to the Portfolio Managers' estimate of intrinsic value and the Portfolio Managers' belief in its potential for appreciation over time. In addition, the Portfolio Managers may invest in anticipation of a catalyst, such as a merger, liquidation, spin off, or management change. The Portfolio Managers will typically visit a company and interview its management team to help understand management's incentives (such as equity ownership in the company and compensation plans), the merits of its strategic plan, and other factors that have the potential to increase the value of the company's stock. The Portfolio Managers also integrate governance factors into the investment process. They seek to invest in companies that have effective and independent boards composed of diverse, and currently active, CEOs and other C-level executives. They look for companies where management and shareholder interests are aligned (often through high ownership of the company by management), with long-term incentive plans and CEO and management compensation and succession plans in place. The Portfolio Managers also seek out companies that have full transparency and disclosure, effective capital deployment strategies and value enhancing merger and acquisition policies. When appropriate, the Portfolio Managers may engage with portfolio companies on a variety of topics, including governance, strategy and financing in an effort to enhance shareholder value. The Portfolio Managers may also engage with portfolio companies on financially material environmental and social issues.

The Portfolio Managers establish an intrinsic value for a company's stock when it is purchased and then continue to evaluate the company's stock price versus their estimate of its intrinsic value to determine whether to maintain, add to, reduce or eliminate the position. The Portfolio Managers typically reduce or eliminate a position in a company's stock if the stock's price appreciates and the company's discount to their estimate of its intrinsic value narrows. The Portfolio Managers' decision to reduce or eliminate a position in a particular stock may also be driven by their belief that another company's stock has a wider discount to their estimate of its intrinsic value. Changes in a company's management or corporate strategy, or the failure of a company to perform as expected, may also cause the Portfolio Managers to reduce or eliminate a position in that company's stock.

As part of their fundamental investment analysis the Portfolio Managers consider environmental, social and governance factors they believe are financially material to individual investments, where applicable. This includes seeking to identify and engage with issuers where the Portfolio Managers believe an improvement in a financially material environmental, social and governance factor may enhance shareholder value. Accordingly, this may result in the Fund making an investment in a company with one or more

financially material environmental, social and governance risks at the time of investments. While consideration of financially material environmental, social and governance factors is inherently subjective and may be informed by both internally generated and third-party metrics, data and other information, the Portfolio Managers believe that the consideration of financially material environmental, social and governance factors, alongside traditional financial metrics, may enhance the Fund's overall investment process. The consideration of environmental, social and governance factors does not apply to certain instruments, such as certain derivative instruments, other registered investment companies, cash and cash equivalents and environmental, social and governance factors may not be deemed financially material to other investments. The consideration of environmental, social and governance factors as part of the investment process does not mean that the Fund pursues a specific "impact" or "sustainable" investment strategy.

The Fund may invest in restricted securities, including private placements, which are securities that are subject to legal restrictions on their sale and may not be sold to the public unless registered under the applicable securities law or pursuant to an applicable exemption.

At times, the Portfolio Managers may emphasize certain sectors that they believe will benefit from market or economic trends.

PRINCIPAL INVESTMENT RISKS

Most of the Fund's performance depends on what happens in the stock market, the Portfolio Managers' evaluation of those developments, and the success of the Portfolio Managers in implementing the Fund's investment strategies. The market's behavior can be difficult to predict, particularly in the short term. There can be no guarantee that the Fund will achieve its goal. The Fund may take temporary defensive and cash management positions; to the extent it does, it will not be pursuing its principal investment strategies.

The actual risk exposure taken by the Fund in its investment program will vary over time, depending on various factors including the Portfolio Managers' evaluation of issuer, political, regulatory, market, or economic developments. There can be no guarantee that the Portfolio Managers will be successful in their attempts to manage the risk exposure of the Fund or will appropriately evaluate or weigh the multiple factors involved in investment decisions, including issuer, market and/or instrument-specific analysis, valuation and financially material environmental, social and governance factors.

The Fund is a mutual fund, not a bank deposit, and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. The value of your investment may fall, sometimes sharply, and you could lose money by investing in the Fund.

Each of the following risks, which are described in alphabetical order and not in order of any presumed importance, can significantly affect the Fund's performance. The relative importance of, or potential exposure as a result of, each of these risks will vary based on market and other investment-specific considerations.

Catalyst Risk. Investing in companies in anticipation of a catalyst carries the risk that the catalyst may not happen as anticipated, or the market may react to the catalyst differently than expected.

Issuer-Specific Risk. An individual security may be more volatile, and may perform differently, than the market as a whole.

Liquidity Risk. From time to time, the trading market for a particular investment in which the Fund invests, or a particular type of instrument in which the Fund is invested, may become less liquid or even illiquid. Illiquid investments frequently can be more difficult to purchase or sell at an advantageous price or time, and there is a greater risk that the investments may not be sold for the price at which the Fund is carrying them. Certain investments that were liquid when the Fund purchased them may become illiquid, sometimes abruptly. Additionally, market closures due to holidays or other factors may render a security or group of securities (e.g., securities tied to a particular country or geographic region) illiquid for a period of time. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities. Market prices for such securities or other investments may be volatile. During periods of substantial market volatility, an investment or even an entire market segment may become illiquid, sometimes abruptly, which can adversely affect the Fund's ability to limit losses.

Unexpected episodes of illiquidity, including due to market or political factors, instrument or issuer-specific factors and/or unanticipated outflows or other factors, may limit the Fund's ability to pay redemption proceeds within the allowable time period. To meet redemption requests during periods of illiquidity, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions.

Market Volatility Risk. Markets may be volatile and values of individual securities and other investments, including those of a particular type, may decline significantly in response to adverse issuer, political, regulatory, market, economic or other

developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. If the Fund sells a portfolio position before it reaches its market peak, it may miss out on opportunities for better performance.

Private Placements and Other Restricted Securities Risk. Private placements and other restricted securities, including securities for which Fund management has material non-public information, are securities that are subject to legal and/or contractual restrictions on their sales. These securities may not be sold to the public unless certain conditions are met, which may include registration under the applicable securities laws. As a result of the absence of a public trading market, the prices of these securities may be more difficult to determine than publicly traded securities and these securities may involve heightened risk as compared to investments in securities of publicly traded companies. Private placements and other restricted securities may be illiquid, and it frequently can be difficult to sell them at a time when it may otherwise be desirable to do so or the Fund may be able to sell them only at prices that are less than what the Fund regards as their fair market value. Transaction costs may be higher for these securities. In addition, the Fund may get only limited information about the issuer of a private placement or other restricted security.

Recent Market Conditions. Both U.S. and international markets have experienced significant volatility in recent years. As a result of such volatility, investment returns may fluctuate significantly. National economies are substantially interconnected, as are global financial markets, which creates the possibility that conditions in one country or region might adversely impact issuers in a different country or region. However, the interconnectedness of economies and/or markets may be diminishing or changing, which may impact such economies and markets in ways that cannot be foreseen at this time.

Some countries, including the U.S., have adopted more protectionist trade policies, which is a trend that appears to be continuing globally. Slowing global economic growth, the rise in protectionist trade policies, inflationary pressures, changes to some major international trade and security agreements, risks associated with the trade and security agreement between countries and regions, including the U.S. and other foreign nations, political or economic dysfunction within some countries or regions, including the U.S., and dramatic changes in consumer sentiment, commodity prices and currency values could affect the economies and markets of many nations, including the U.S., in ways that cannot necessarily be foreseen at the present time and may create significant volatility in the markets. In addition, these policies, including the impact on the U.S. dollar, may decrease foreign demand for U.S. assets, which could have a negative impact on certain issuers and/or industries.

The Federal Reserve and certain foreign central banks have started to lower interest rates, though economic or other factors, such as inflation, could stop such changes. It is difficult to accurately predict the pace at which interest rates might change, the timing, frequency or magnitude of any such changes in interest rates, or when such changes might stop or again reverse course. Additionally, various economic and political factors could cause the Federal Reserve or other foreign central banks to change their approach in the future and such actions may result in an economic slowdown both in the U.S. and abroad. Unexpected changes in interest rates could lead to significant market volatility or reduce liquidity in certain sectors of the market. Deteriorating economic fundamentals may, in turn, increase the risk of default or insolvency of particular issuers, negatively impact market value, cause credit spreads to widen, and reduce bank balance sheets. Any of these could cause an increase in market volatility, reduce liquidity across various markets or decrease confidence in the markets.

Regulators in the U.S. have adopted a number of changes to regulations involving the markets and issuers, some of which apply to the Fund. The full effect of such regulations is not currently known and certain changes to regulation could limit the Fund's ability to pursue its investment strategies or make certain investments, may make it more costly for it to operate, or adversely impact performance. Additionally, it is possible that such regulations could be further revised or rescinded, which creates material uncertainty on their impact to the Fund.

Advancements in technology, including advanced development and increased regulation of artificial intelligence, may adversely impact market movements and liquidity. As artificial intelligence is used more widely, which can occur relatively rapidly, the profitability and growth of certain issuers and industries may be negatively impacted in ways that cannot be foreseen and could adversely impact its performance.

Tensions, war, or open conflict between nations, such as between Russia and Ukraine, in the Middle East, or in eastern Asia could affect the economies of many nations, including the United States. The duration of ongoing hostilities and any sanctions and related events cannot be predicted. Those events present material uncertainty and risk with respect to markets globally and the performance of the Fund and its investments or operations could be negatively impacted.

High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. There is no assurance that the U.S. Congress will act to raise the nation's debt ceiling; a failure to do so could cause market turmoil and substantial investment risks that cannot now be fully predicted. Unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy.

Global climate change can have potential effects on property and security values. Certain issuers, industries and regions may be adversely affected by the impact of climate change in ways that cannot be foreseen. The impact of legislation, regulation and international accords related to climate change, including any direct or indirect consequences that may not be foreseen, may negatively impact certain issuers, industries and regions.

Redemption Risk. The Fund may experience periods of large or frequent redemptions that could cause the Fund to sell assets at inopportune times, which could have a negative impact on the Fund's overall liquidity, or at a loss or depressed value. Redemption risk is greater to the extent that one or more investors or intermediaries control a large percentage of investments in the Fund and the risk is heightened during periods of declining or illiquid markets. Large redemptions could hurt the Fund's performance, increase transaction costs, and create adverse tax consequences.

Sector Risk. From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors or sub-sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political or regulatory events.

Small- and Mid-Cap Companies Risk. At times, small- and mid-cap companies may be out of favor with investors. Compared to larger companies, small- and mid-cap companies may depend on a more limited management group, may have a shorter history of operations, less publicly available information, less stable earnings, and limited product lines, markets or financial resources. The securities of small- and mid-cap companies are often more volatile, which at times can be rapid and unpredictable, and less liquid than the securities of larger companies and may be more affected than other types of securities by the underperformance of a sector, during market downturns, by adverse publicity and investor perceptions, by interest rate changes and by government regulation.

Value Stock Risk. Value stocks are those stocks whose stock prices, whether based on earnings, book value, or other financial measures, do not reflect their full economic opportunities. Value stocks may remain undervalued for extended periods of time, may decrease in value during a given period, may not ever realize what the portfolio management team believes to be their full value or intrinsic value, or the portfolio management team's assumptions about intrinsic value or potential for appreciation may be incorrect. This may happen, among other reasons, because of a failure to anticipate which stocks or industries would benefit from changing market or economic conditions or investor preferences.

A summary of the Fund's additional principal investment risks is as follows:

Risk of Increase in Expenses. A decline in the Fund's average net assets during the current fiscal year due to market volatility or other factors could cause the Fund's expenses for the current fiscal year to be higher than the expense information presented in "Fees and Expenses."

Operational and Cybersecurity Risk. The Fund and its service providers, and your ability to transact with the Fund, may be negatively impacted due to operational matters arising from, among other problems, human errors, processing and communications errors, counterparty and third-party disruptions or errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow an unauthorized party to gain access to fund assets, customer data, or proprietary information, or cause the Fund or its service providers, as well as the securities trading venues and their service providers, to suffer data corruption or lose operational functionality, including those related to critical functions. Cybersecurity incidents can result from deliberate attacks or unintentional events. It is not possible for the Manager or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Artificial Intelligence. The Fund and its service providers, including its adviser, may utilize artificial intelligence ("AI") technologies, including machine learning models and generative AI, to improve operational efficiency and in connection with research. In addition, counterparties used by the Fund may utilize AI in their business activities. While the Manager

may restrict certain uses of AI tools, the Fund and its adviser are not in a position to control the use of AI in third-party products or services. The use of AI introduces numerous potential challenges and the use of AI can lead to reputational damage, legal liabilities, and competitive disadvantages, as well as negatively impact business operations, which may occur with or without mismanagement in the use of the AI. AI requires the collection and processing of substantial amounts of data, which poses risks of data inaccuracies, incompleteness, and inherent biases, and which can degrade the technology's effectiveness and reliability. Such data can include proprietary information, the use of which by AI may be unauthorized and subject to potential liability. Rapid technological advancements further complicate risk predictions, and competitors who adopt AI more swiftly may gain a competitive edge. The complexity and opacity of AI systems raise significant accountability and ethical concerns. AI has enhanced the ability of threat actors to amplify the potency, scale, and speed of cybersecurity attacks. AI's role in increasing automation raises concerns about job displacement and may lead to economic and social disruptions. The unpredictable nature of AI's impact on market dynamics complicates traditional risk assessment models, making it challenging to identify risks and opportunities using historical data. Legal and regulatory frameworks governing AI's use, particularly concerning data privacy and protection, are evolving rapidly. These changes could materially alter how AI is used, which may negatively impact the Fund.

Risk Management. Risk is an essential part of investing. No risk management program can eliminate the Fund's exposure to adverse events; at best, it may only reduce the possibility that the Fund will be affected by such events, and especially those risks that are not intrinsic to the Fund's investment program. The Fund could experience losses if judgments about risk prove to be incorrect.

Valuation Risk. The Fund may not be able to sell an investment at the price at which the Fund has valued the investment. Such differences could be significant, particularly for illiquid securities and securities that trade in relatively thin markets and/or markets that experience extreme volatility. If market or other conditions make it difficult to value an investment, the Fund may be required to value such investments using more subjective methods, known as fair value methodologies. Using fair value methodologies to price investments may result in a value that is different from an investment's most recent price and from the prices used by other funds to calculate their NAVs. The Fund uses pricing services to provide values for certain securities and there is no assurance that the Fund will be able to sell an investment at the price established by such pricing services. The Fund's ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents.

PERFORMANCE

The following bar chart and table provide an indication of the risks of investing in the Fund. The bar chart shows how the Fund's performance has varied from year to year, as represented by the performance of the Fund's Institutional Class. The returns in the bar chart do not reflect any applicable sales charges. If sales charges were reflected, returns would be lower than those shown. The table below the bar chart shows what the returns would equal if you averaged out actual performance over various lengths of time and compares the returns with the returns of a broad based market index and additional indices. The broad-based market index is required by regulation. The additional index or indices have characteristics relevant to the Fund's investment strategy. The indices are described in "Descriptions of Indices" in the prospectus. Unlike the returns in the bar chart, the returns in the table reflect the maximum applicable sales charges.

As of May 7, 2010, the Fund became the successor to DJG Small Cap Value Fund L.P., an unregistered limited partnership ("DJG Fund"); DJG Fund was the successor to The DJG Small Cap Value Fund, an unregistered commingled investment account ("DJG Account"). The performance after September 12, 2008 is that of DJG Fund and the performance from July 8, 1997 (the Fund's commencement of operations) to September 11, 2008 is that of DJG Account. On May 7, 2010, the DJG Fund transferred its assets to the Fund in exchange for the Fund's Institutional Class shares. The investment policies, objectives, guidelines and restrictions of the Fund are in all material respects equivalent to those of DJG Fund and DJG Account (the "Predecessors"). As a mutual fund registered under the Investment Company Act of 1940, the Fund is subject to certain restrictions under the 1940 Act and the Internal Revenue Code to which the Predecessors were not subject. Had the Predecessors been registered under the 1940 Act and been subject to the provisions of the 1940 Act and the Code, their investment performance may have been adversely affected. The performance information reflects the actual expenses of the Predecessors.

The Predecessors did not have distribution policies. The Predecessors were an unregistered limited partnership and an unregistered commingled investment account, did not qualify as regulated investment companies for federal income tax purposes and did not pay dividends or other distributions. As a result of the different tax treatment, we are unable to show the after-tax returns for the Fund prior to May 7, 2010.

For each class, the performance prior to May 7, 2010, is that of the Fund's Predecessors.

Returns would have been lower/higher if the investment adviser to the Predecessors and/or the Manager had not reimbursed/recouped certain expenses and/or waived a portion of the investment management fees during certain of the periods shown.

Past performance (before and after taxes) is not a prediction of future results. Visit www.nb.com or call 800-366-6264 for updated performance information.

YEAR-BY-YEAR % RETURNS AS OF 12/31 EACH YEAR

Best quarter: Q4 2020 38.69%
Worst quarter: Q1 2020 -30.69%
Year to Date performance as of: 09/30/2025 13.17%

AVERAGE ANNUAL TOTAL % RETURNS AS OF 12/31/2024

Intrinsic Value Fund	1 Year	5 Years	10 Years	Since Inception (7/8/1997)

Russell 2000® Index (reflects no deduction for fees, expenses or taxes)	11.54	7.40	7.82	7.91

After-tax returns are shown for Institutional Class shares only and after-tax returns for other classes may vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

INVESTMENT MANAGER

Neuberger Berman Investment Advisers LLC ("Manager") is the Fund's investment manager.

PORTFOLIO MANAGERS

The Fund is co-managed by Benjamin H. Nahum (Managing Director of the Manager), James F. McAree (Managing Director of the Manager) and Amit Solomon (Managing Director of the Manager). They have managed the Fund since its inception in 2010. Mr. Nahum served as the portfolio manager of the Fund's Predecessors from 1997 to 2010, and Mr. McAree and Mr. Solomon served as research analysts to the Fund's Predecessors from 2005 and 2002, respectively, to 2010.

BUYING AND SELLING SHARES

You may purchase, redeem (sell) or exchange shares of the Fund on any day the New York Stock Exchange is open, at the Fund's net asset value per share next determined after your order is received in proper form, subject to any applicable sales charge. Shares of the Fund generally are available only through certain investment providers, such as banks, brokerage firms, workplace retirement programs, and financial advisers. Contact any investment provider authorized to sell the Fund's shares. See "Maintaining Your Account" in the prospectus for eligibility requirements for purchases of Institutional Class shares.

For certain investors, certain shares of the Fund may be available directly from Neuberger Berman BD LLC by regular, first class mail (Neuberger Funds, P.O. Box 219189, Kansas City, MO 64121-9189), by express delivery, registered mail, or certified mail (Neuberger Funds, 801 Pennsylvania Ave, Suite 219189, Kansas City, MO 64105-1307), or by wire, fax, telephone, exchange, or systematic investment or withdrawal (call 800-877-9700 for instructions). See "Maintaining Your Account" and "Direct Investors" in the prospectus for eligibility requirements for direct purchases of shares and for instructions on buying and redeeming (selling) shares directly.

The minimum initial investment in Class A or Class C shares is \$1,000. Additional investments can be as little as \$100. These minimums may be waived in certain cases.

The minimum initial investment in Institutional Class shares is \$1 million. This minimum may be waived in certain cases.

TAX INFORMATION

Unless you invest in the Fund through a tax-advantaged retirement plan or account or are a tax-exempt investor, you will be subject to tax on Fund distributions to you of ordinary income and/or net capital gains. Those distributions generally are not taxable to such a plan or account or a tax-exempt investor, although withdrawals from certain retirement plans and accounts generally are subject to federal income tax.

PAYMENTS TO INVESTMENT PROVIDERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through an investment provider or other financial intermediary, such as a bank, brokerage firm, workplace retirement program, or financial adviser (who may be affiliated with Neuberger), the Fund and/or Neuberger Berman BD LLC and/or its affiliates may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the investment provider or other financial intermediary and its employees to recommend the Fund over another investment. Ask your investment provider or visit its website for more information.
