USD I Accumulating Class 30 December 2022

## MORNINGSTAR RATING™

\*\*\*\*

#### **FUND OBJECTIVE**

To increase the value of your shares through a combination of growth and income from investments in real estate securities.

The fund invests predominantly in securities issued by US Real Estate Investment Trusts (REITs) and does not invest directly in real estate. REITs are companies or trusts that invest mainly in income-producing real estate. They may invest broadly or specialise in a particular sector such as offices, industrial buildings or shopping centres.

#### **MANAGEMENT TEAM**

Steve Shigekawa

Senior Portfolio Manager

USD I Accumulating Class 30 December 2022

#### **RISK CONSIDERATIONS**

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

**Real Estate Risk:** Real estate investments, including Real Estate Investment Trust Securities ("REITs") or similar structures, are subject to volatility and additional risks, and the share value may decline due to events affecting the real estate industry. The properties held by REITs could fall in value for a variety of reasons, such as declines in rental income, poor property management, environmental liabilities, uninsured damage, increased competition, or changes in real estate tax laws. There is also a risk that REIT stock prices overall will decline over short or even long periods because of rising interest rates.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

**Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

**Derivatives Risk:** The fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the fund's leverage significantly which may cause large variations in the value of your share. Investors should note that the fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI). There are certain investment risks that apply in relation to the use of FDI. The fund's use of FDI can involve significant risks of loss.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

For full information on the risks please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

Some share classes listed are subject to restrictions, please refer to the fund's prospectus for further details.

Investors who subscribe in a currency different from their local currency should note that the costs may increase or decrease as a result of currency and exchange rate fluctuations. The annual yield figure quoted is the distribution yield, calculated by multiplying the dividend by pay periods, dividing by the net asset value (NAV) of the last distribution date and then multiplying by 100%. It is for reference only and is not indicative of the return of the Fund's future dividend to be received by investors.
