What is this product?

Type

The Fund is a public limited liability company (société anonyme – S.A.) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital (société d'investissement à capital variable - SICAV); and qualifies as an alternative investment fund ("AIF") within the meaning of the Luxembourg law of 12 July 2013 on alternative investment fund managers ("2013 Law"). The Fund is subject to part II of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment ("2010 Law"). The Shares offered to you are a class of shares in the Sub-Fund. The Sub-Fund is a compartment of the Fund, whose performance will depend on the performance of its portfolio as further described in the section "Objectives" below. The Sub-Fund qualifies as a European long-term investment fund ("ELTIF") within the meaning of Regulation (EU) 2015/760.

Term

The Sub-Fund has an initial term of eight years from its final closing date and such term may be extended by the board of directors of the Fund (the "Board") for up to three (3) one (1) year periods, the maximum term of the Sub-Fund thus being eleven (11) years as from the final closing date of the Sub-Fund. This product may not be fit for investors who are unable to sustain a long-term and illiquid commitment, because the life of this ELTIF may exceed 10 years. The Sub-Fund can be terminated early and liquidated in the cases set out in the prospectus of the Fund ("Prospectus") and the articles of incorporation of the Fund ("Articles"). The Manufacturer cannot terminate the Shares unilaterally. The Board may approve a partial or full compulsory redemption of your Shares, at any time, in accordance with the Articles and the Prospectus.

Objectives

The investment objective of the Sub-Fund is to generate risk-adjusted returns by selectively making direct private investments, equity and equity-like co-investments alongside top-tier private equity firms and other financial sponsors. The Sub-Fund aims to achieve long-term capital growth by building up a diversified portfolio of direct private equity co-investments. The Sub-Fund will invest across a range of private equity asset classes primarily investing in buyouts and opportunistically investing in special situations, growth capital and credit investments. These direct investments will primarily be in companies based in Europe and North America, as well as Asia and Latin America to a lesser extent. The aim is to build a highly diversified portfolio by sectors and geographic regions. The Sub-Fund will invest in a variety of situations both in new deals as well as into existing portfolio companies of lead private equity firms, targeting co-underwrite, mid-life and traditional co-investment deals. The Sub-Fund will not be limited with respect to the range or types of industries, sectors, companies, geographic regions or transactions in which it may invest.

The Sub-Fund may use leverage which, according to the gross method, is not expected to exceed 300%. This leverage is achieved by borrowing or entering into a multi-currency credit facility or other financing transaction as further described in the Sub-Fund's supplement of the Prospectus ("Supplement").

Taking into account the long-term required minimum holding period of eight (8) years, the returns for investors holding Shares will ultimately depend on the value and the performance of the Sub-Fund and the underlying investments. The Sub-Fund is actively managed and investments are not made in reference to, or constrained by, any benchmark. The Sub-Fund is permitted to use financial derivative instruments for hedging purposes only.

The Shares shall be non-distributing in the early years of the Sub-Fund's term, meaning that investment proceeds received by the Sub-Fund in the first few years of the Sub-Fund's term will be retained and reinvested by the Sub-Fund. This means that you may not receive a distribution from the Sub-Fund during the first few years of your investment. Once sufficient distributable cash is available, and such amounts are no longer reinvested, distributions will be distributed in accordance with the Prospectus. Shareholders have the right to convert some or all of their Shares into shares of another class of shares of the Sub-Fund subject to applicable investor eligibility criteria.

The Sub-Fund is classified as a financial product that promotes environmental and social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.

The Sub-Fund is a compartment of the Fund, meaning the assets and liabilities of the Sub-Fund are segregated from the other sub-funds of the Fund by law. The performance of another sub-fund of the Fund therefore has no impact on the performance of the Sub-Fund. However, the assets and liabilities of the Shares are not segregated from the assets and liabilities of the other classes of shares of the Sub-Fund.

Investors are not permitted to redeem their Shares in the Sub-Fund until the end of life of the Sub-Fund as set out in the Prospectus.

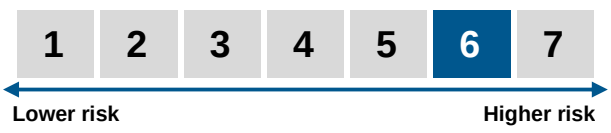
Brown Brothers Harriman (Luxembourg) S.C.A ("BBH") has been appointed as the depositary of the Fund ("Depositary"). You can obtain copies of the Prospectus (including the Supplement), the Articles and the latest annual reports and accounts of the Fund, free of charge, in English, from BBH as central administrator of the Fund ("Administrator"). Further practical information, such as the latest published prices of the Shares and other information on the Sub-Fund, can also be requested from the Administrator free of charge.

Intended retail investor

The Shares are intended for eligible retail investors who (i) have sufficient experience and theoretical knowledge to assess the risk of investing in private equity funds; (ii) are able to sustain investments in illiquid, closed-ended funds.

What are the risks and what could I get in return?

Risk Indicator



The risk indicator assumes you keep the product for 8 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as class 6 out of 7, which is a high risk class. This rates the potential losses from future performance at a high-level, and poor market conditions impact the capacity of the Sub-Fund to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The attention of investors is drawn to the fact that the Sub-Fund will invest in illiquid assets. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 8 years **Example Investment: EUR 10 000** **Scenarios**		**If you exit after 8 years**
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**	
Stress	**What you might get back after costs**	EUR 11 470
	Average return each year	1.73%
Unfavourable	**What you might get back after costs**	EUR 12 220
	Average return each year	2.54%
Moderate	**What you might get back after costs**	EUR 13 610
	Average return each year	3.93%
Favourable	**What you might get back after costs**	EUR 15 250
	Average return each year	5.41%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. This product cannot be cashed in. The scenarios presented above are based on estimated cash flows and are simulations based on estimates. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Neuberger Berman AIFM S.à r.l. is unable to pay out?

Losses are not covered by an investor's compensation or guaranteed scheme. The investor may not face a financial loss due to the default of the Manufacturer.

The Depositary will perform safekeeping duties for the Fund's assets. In the event of the insolvency of the Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10000 is invested.

	If you exit after 8 years
Total costs	EUR 2 990
Annual cost impact (*)	3.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.6% before costs and 3.9% after costs.

Composition of costs

One-off costs upon entry or exit		**If you exit after 1 year**
Entry costs	2.00% maximum of the amount you pay in when entering this investment. If you invest through a third-party the person selling you the product will inform you of the actual charge.	Up to EUR 200
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2.09% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 209
Transaction costs	0.04% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 4
Incidental costs taken under specific conditions		
Performance fees and carried interest	Impact of carried interest: 0.81% of the value of your investment per year. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	EUR 81

How long should I hold it and can I take money out early?

Recommended holding period: 8 years

The Sub-Fund is a closed-ended investment. Investors have no redemption rights at their initiative during the term of the Sub-Fund and the holding period of the Shares is therefore fixed until the end of the term of the Sub-Fund as described under the heading “Term” of this KID. An investor may transfer the Shares in accordance with the terms set out in the Prospectus (including the Supplement) and the Articles. Redeeming your Shares early may increase the risk of a loss or of receiving lower returns.

How can I complain?
