NB CROSSROADS PRIVATE MARKETS ACCESS FUND LLC

STATEMENT OF ADDITIONAL INFORMATION
April 30, 2021

Institutional Class Shares
Class A-1 Shares
Class A-2 Shares

NB Crossroads Private Markets Access Fund LLC (the “Fund”) is a non-diversified, closed-end management investment company with limited operating history. This Statement of Additional Information (“SAI”) relating to the Shares does not constitute a prospectus, but should be read in conjunction with the Prospectus relating thereto dated April 30, 2021. This SAI, which is not a prospectus, does not include all information that a prospective investor should consider before purchasing Shares, and investors should obtain and read the Prospectus prior to purchasing such Shares. A copy of the Prospectus may be obtained without charge by calling (212) 476-8800. You may also obtain a copy of the Prospectus on the SEC’s website at http://www.sec.gov. Capitalized terms used but not defined in this SAI have the meanings ascribed to them in the Prospectus.

References to the Investment Company Act, or other applicable law, will include any rules promulgated thereunder and any guidance, interpretations or modifications by the SEC, SEC staff or other authority with appropriate jurisdiction, including court interpretations, and exemptive, no-action or other relief or permission from the SEC, SEC staff or other authority.
ADDITIONAL INVESTMENT POLICIES

The investment objective and the principal investment strategies of the Fund, as well as the principal risks associated with such investment strategies, are set forth in the Prospectus. Certain additional information regarding the investment program of the Fund is set forth below.

Fundamental Policies

The Fund has adopted restrictions and policies relating to the investment of the Fund’s assets and its activities. Certain of the restrictions are fundamental policies of the Fund and may not be changed without the approval of a majority of the Fund’s outstanding voting securities (as defined by the Investment Company Act). For this purpose, under the Investment Company Act, the vote of a “majority of the outstanding voting securities of the Fund” means the vote, at an annual or special meeting of the Shareholders duly called, (i) of 67% or more of the Shares represented at such meeting, if the holders of more than 50% of the outstanding Shares are present in person or represented by proxy or (ii) of more than 50% of the outstanding Shares, whichever is less. No other policy is a fundamental policy of the Fund, except as expressly stated.

The Fund’s fundamental investment restrictions are as follows:

1. The Fund will not invest 25% or more of the value of its total assets in the securities (other than U.S. Government securities) of issuers engaged in any single industry. For the avoidance of doubt, this 25% limitation on investment in a single industry does not restrict or limit: (i) the Fund’s authority to invest 25% or more of the value of its total assets in Portfolio Funds; or (ii) the Fund’s ability to invest in U.S. Government securities or such other securities as may be excluded for this purpose under the Investment Company Act.

2. The Fund will not borrow money, except to the extent permitted by the Investment Company Act.

3. The Fund will not issue senior securities, except to the extent permitted by the Investment Company Act.

4. The Fund will not underwrite securities of other issuers, except insofar as the Fund may be deemed an underwriter under the Securities Act in connection with the disposition of its portfolio securities.

5. The Fund will not make loans of money or securities to other persons, except through purchasing fixed-income securities, lending portfolio securities or entering into repurchase agreements in a manner consistent with the Fund’s investment policies.

6. The Fund will not purchase or sell physical commodities or commodity contracts, except to the extent permitted under the Investment Company Act, the rules and regulations thereunder and any applicable exemptive relief or unless otherwise acquired as a result of the ownership of securities or instruments, but this restriction shall not prohibit the Fund from purchasing and selling foreign currency, options, swaps, futures and forward contracts and other financial instruments and contracts, including those related to indexes, and options on indices, and may invest in commodity pools and other entities that purchase and sell commodities and commodity contracts. For purposes of the limitation on commodities, the Fund does not consider foreign currencies or forward contracts to be physical commodities.

7. The Fund will not purchase, hold or deal in real estate, except the Fund may purchase and hold securities or other instruments that are secured by, or linked to, real estate or interests therein, securities of real estate investment trusts, mortgage-related securities and securities of issuers engaged in the real estate business, and the Fund may purchase and hold real estate as a result of the ownership of securities or other instruments (including interests in Portfolio Funds).

With respect to the fundamental policy relating to concentration set forth in (1) above, the Investment Company Act does not define what constitutes “concentration” in an industry. The SEC staff has taken the position that investment of 25% or more of a fund’s total assets in one or more issuers conducting their principal activities in the same industry or group of industries constitutes concentration. It is possible that interpretations of concentration could change in the future. The policy in (1) above will be interpreted to refer to concentration as that term may be interpreted from time to time. The policy also will be interpreted to permit investment without limit in the following: securities of the U.S. Government and its agencies or instrumentalities; tax exempt securities of state, territory, possession or municipal governments and their authorities, agencies, instrumentalities or political subdivisions; and repurchase agreements collateralized by any such obligations. Accordingly, issuers of the foregoing securities will not be considered to be members of any industry. There also will be no limit on investment in issuers domiciled in a single jurisdiction or
country. Finance companies will be considered to be in the industries of their parents if their activities are primarily related to financing the activities of the parents. Each foreign government will be considered to be a member of a separate industry. With respect to the Fund’s industry classifications, the Fund currently utilizes any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the Adviser. The policy also will be interpreted to give broad authority to the Fund as to how to classify issuers within or among industries.

Unless otherwise indicated, all limitations under the Fund’s investment restrictions apply only at the time that a transaction is undertaken. Any change in the percentage of the Fund’s assets invested in certain securities or other instruments resulting from market fluctuations or other changes in the Fund’s total assets, including changes resulting from the Fund having a smaller base of assets after a repurchase offer, will not require the Fund to dispose of an investment until the Adviser determines that such disposition is in the Fund’s best interest.

The Fund’s investment objective is non-fundamental and may be changed with the approval of the Fund’s Board upon 60 days’ prior written notice to the Fund’s Shareholders.

INVESTMENT PRACTICES AND TECHNIQUES

The following information supplements the discussion of the Fund’s investment objective, policies and techniques that are described in the Prospectus. The Fund may invest in the following instruments and use the following investment techniques, subject to any limitations set forth in the Prospectus. There is no guarantee the Fund will buy all of the types of securities or use all of the investment techniques that are described herein.

BDCs and Securities of Other Investment Companies. The Fund may invest, subject to applicable regulatory limits, in the securities of other investment companies, including open-end management companies, closed-end management companies (including BDCs) and unit investment trusts. When investing in the securities of other investment companies, the Fund will be indirectly exposed to all the risks of such investment companies’ portfolio securities. In addition, as a shareholder in an investment company, the Fund would indirectly bear its pro rata share of that investment company’s advisory fees and other operating expenses. Fees and expenses incurred indirectly by the Fund as a result of its investment in shares of one or more other investment companies generally are referred to as “acquired fund fees and expenses” and may appear as a separate line item in the Fund’s prospectus fee table. For certain investment companies, such as BDCs, these expenses may be significant. The Investment Company Act imposes certain restraints upon the operations of a BDC. For example, BDCs are required to invest at least 70% of their total assets primarily in securities of private companies or thinly traded U.S. public companies, cash, cash equivalents, U.S. government securities and high quality debt investments that mature in one year or less. As a result, BDCs generally invest in less mature private companies, which involve greater risk than well-established, publicly-traded companies. In addition, the shares of closed-end management companies may involve the payment of substantial premiums above, while the sale of such securities may be made at substantial discounts from, the value of such issuer’s portfolio securities. Historically, shares of closed-end funds, including BDCs, have frequently traded at a discount to their net asset value, which discounts have, on occasion, been substantial and lasted for sustained periods of time.

Certain money market funds that operate in accordance with Rule 2a-7 under the Investment Company Act float their NAV while others seek to reserve the value of investments at a stable NAV (typically $1.00 per share). An investment in a money market fund, even an investment in a fund seeking to maintain a stable NAV per share, is not guaranteed, and it is possible for the Fund to lose money by investing in these and other types of money market funds. If the liquidity of a money market fund’s portfolio deteriorates below certain levels, the money market fund may suspend redemptions (i.e., impose a redemption gate) and thereby prevent the Fund from selling its investment in the money market fund or impose a fee of up to 2% on amounts the Fund redeems from the money market fund (i.e., impose a liquidity fee).

Convertible Securities. Convertible securities are bonds, debentures, notes, preferred stocks and other securities that pay interest or dividends and are convertible into or exchangeable for common stocks. Convertible securities generally have some features of common stocks and some features of debt securities. In general, a convertible security performs more like a stock when the underlying stock’s price is high relative to the conversion price (because it is assumed that it will be converted into the stock) and performs more like a debt security when the underlying stock’s price is low relative to the conversion price (because it is assumed that it will mature without being converted). Convertible securities typically pay an income yield that is higher than the dividend yield of the issuer’s common stock, but lower than the yield of the issuer’s debt securities.
Derivatives. A derivative is generally a financial contract the value of which depends on, or is derived from, changes in the value of one or more “reference instruments,” such as underlying assets (including securities), reference rates, indices or events. Derivatives may relate to stocks, bonds, credit, interest rates, commodities, currencies or currency exchange rates, or related indices. A derivative may also contain leverage to magnify the exposure to the reference instrument. Derivatives may be traded on organized exchanges and/or through clearing organizations, or in private transactions with other parties in the over-the-counter (“OTC”) market with a single dealer or a prime broker acting as an intermediary with respect to an executing dealer. Derivatives may be used for hedging purposes and non-hedging (or speculative) purposes. Some derivatives require one or more parties to post “margin,” which means that a party must deposit assets with, or for the benefit of, a third party, such as a futures commission merchant, in order to initiate and maintain the derivatives position. Margin is typically adjusted daily, and adverse market movements may require a party to post additional margin.

- **Call Options.** A call option gives the purchaser the right to buy an underlying asset or other reference instrument at a specified price, regardless of the instrument’s market price at the time. Writing (selling) a call option obligates the writer (seller) to sell the underlying asset or other reference instrument to the purchaser at a specified price if the purchaser decides to exercise the option. A call option is “covered” if the writer (seller) simultaneously holds an equivalent position in the security underlying the option. The writer (seller) receives a premium when it writes a call option. Purchasing a call option gives the purchaser the right to buy the underlying asset or other reference instrument from the writer (seller) at a specified price if the purchaser decides to exercise the option. The purchaser pays a premium when it purchases a call option.

- **Forward Foreign Currency Contracts ("Forward Contracts").** A forward contract is a contract for the purchase or sale of a specific foreign currency at a future date at a fixed price. Forward contracts are not required to be traded on organized exchanges or cleared through regulated clearing organizations.

- **Futures.** A futures contract is a standardized agreement to buy or sell a set quantity of an underlying asset at a future date, or to make or receive a cash payment based on the value of a securities index or other reference instrument at a future date.

- **Put Options.** A put option gives the purchaser the right to sell an underlying asset or other reference instrument at a specified price, regardless of the instrument’s market price at the time. Writing (selling) a put option obligates the writer (seller) to buy the underlying asset or other reference instrument from the purchaser at a specified price if the purchaser decides to exercise the option. A put option is “covered” if the writer (seller) simultaneously holds an equivalent position in the security underlying the option. The writer (seller) receives a premium when it writes a put option. Purchasing a put option gives the purchaser the right to sell the underlying asset or other reference instrument to the writer (seller) at a specified price if the purchaser decides to exercise the option. The purchaser pays a premium when it purchases a put option.

- **Swaps.** In a standard swap transaction, two parties agree to exchange one or more payments based, for example, on the returns (or differentials in rates of return) earned or realized on particular predetermined reference instruments. Swap transactions generally may be used to obtain exposure to a reference instrument without owning or taking physical custody of the reference instrument and generally do not involve delivery of the notional amount of the agreement. Swaps have historically been OTC instruments; however, recent legislation requires many swaps to be executed through an organized exchange or regulated facility and cleared through a regulated clearing organization.

There are various types of swaps including, but not limited to, the following: interest rate swaps (exchanging a floating interest rate for a fixed interest rate); total return swaps (exchanging a floating interest rate for the total return of a reference instrument); credit default swaps (buying or selling protection against certain designated credit events); and options on swaps (options to enter into a swap agreement).

The SEC recently voted to adopt Rule 18f-4 under the 1940 Act which will regulate the use of derivatives for certain funds registered under the Investment Company Act (“Rule 18f-4”). Unless the Fund qualifies as a “limited derivatives user” as defined in Rule 18f-4, Rule 18f-4 would, among other things, require the Fund to establish a comprehensive derivatives risk management program, to comply with certain value-at-risk based leverage limits, to appoint a derivatives risk manager and to provide additional disclosure both publicly and to the SEC regarding its derivatives positions. For funds that qualify as limited derivatives users, Rule 18f-4 requires a fund to have policies and procedures to manage its aggregate derivatives risk. These requirements could have an impact on the Fund,
including a potential increase in cost to enter into derivatives transactions. The full impact of Rule 18f-4 on the Fund remains uncertain, however, due to the compliance timeline within Rule 18f-4, it is unlikely that the Fund will be required to fully comply with the requirements until 2022.

**Distressed Securities.** The Fund may invest in distressed securities, including loans, bonds and notes that may involve a substantial degree of risk. Distressed securities include securities of companies that are in financial distress and that may be in or about to enter bankruptcy.

In certain periods, there may be little or no liquidity in the markets for distressed securities or other instruments. In addition, the prices of such securities may be subject to periods of abrupt and erratic market movements and above-average price volatility. It may be difficult to obtain financial information regarding the financial condition of a borrower or issuer, and its financial condition may be changing rapidly. It may be more difficult to value such securities and the spread between the bid and asked prices of such securities may be greater than normally expected.

**Equity Securities.** Equity securities in which the Fund may invest include common stocks, preferred stocks, convertible securities and warrants. Preferred stocks usually have specific dividends and rank after bonds and before common stock in claims on assets of the corporation should it be dissolved. Increases and decreases in earnings are usually reflected in a corporation’s stock price. Convertible securities are debt or preferred equity securities convertible into common stock. Usually, convertible securities pay dividends or interest at rates higher than common stock, but lower than other securities. Convertible securities usually participate to some extent in the appreciation or depreciation of the underlying stock into which they are convertible. Warrants are options to buy a stated number of shares of common stock at a specified price anytime during the life of the warrants.

**ETFs and Other Exchange-Traded Investment Vehicles.** The Fund may invest, subject to applicable regulatory limits, in the securities of ETFs and other pooled investment vehicles that are traded on an exchange and that hold a portfolio of securities or other financial instruments (collectively, “exchange-traded investment vehicles”). When investing in the securities of exchange-traded investment vehicles, the Fund will be indirectly exposed to all the risks of the portfolio securities or other financial instruments they hold. The performance of an exchange-traded investment vehicle will be reduced by transaction and other expenses, including fees paid by the exchange-traded investment vehicle to service providers. ETFs are investment companies that are registered as open-end management companies or unit investment trusts. The limits that apply to the Fund’s investment in securities of other investment companies generally apply also to the Fund’s investment in securities of ETFs.

Shares of exchange-traded investment vehicles are listed and traded in the secondary market. Many exchange-traded investment vehicles are passively managed and seek to provide returns that track the price and yield performance of a particular index or otherwise provide exposure to an asset class (e.g., currencies or commodities). Although such exchange-traded investment vehicles may invest in other instruments, they largely hold the securities (e.g., common stocks) of the relevant index or financial instruments that provide exposure to the relevant asset class. The share price of an exchange-traded investment vehicle may not track its specified market index, if any, and may trade below its NAV. An active secondary market in the shares of an exchange-traded investment vehicle may not develop or be maintained and may be halted or interrupted due to actions by its listing exchange, unusual market conditions, or other reasons. There can be no assurance that the shares of an exchange-traded investment vehicle will continue to be listed on an active exchange.

**Fixed Income Securities.** Debt securities may consist of fixed and floating rate obligations of various credit quality and duration and may be issued by: corporate entities; trusts; domestic issuers, including securities issued or guaranteed as to principal or interest by the U.S. government or any of its agencies or instrumentalities; foreign issuers, including in emerging markets, and including foreign governments and supranational entities; and municipal issuers, including within the U.S. and its territories. Such obligations may include: bonds, loans, inflation-linked debt securities, when-issued and forward-settling securities, commercial paper, mortgage-backed securities and other asset-backed securities, and hybrid securities (including convertible securities).

**Loans.** Loans are a type of debt security that may be made in connection with, among other things, recapitalizations, acquisitions, leveraged buyouts, dividend issuances and refinancings. The loans in which the Fund typically invests are structured and administered by a third party that acts as agent for a group of lenders that make or hold interests in the loan. The Fund may acquire interests in such loans by taking an assignment of all or a portion of a direct interest in a loan previously held by another institution or by acquiring a participation in an interest in a loan that continues to be held by another institution.
Lower-Rated Debt Securities. Lower-rated debt securities (commonly known as “junk” or “junk bonds”) typically offer investors higher yields than other fixed income securities. The higher yields are usually justified by the weaker credit profiles of these issuers as compared to investment grade issuers. Lower-rated debt securities may include debt obligations of all types issued by U.S. and non-U.S. corporate and governmental entities, including bonds, debentures and notes, loan interests and preferred stocks that have priority over any other class of stock of the entity as to the distribution of assets or the payment of dividends.

Private Investments in Public Equity (PIPEs). The Fund may invest in securities issued in private investments in public equity transactions, commonly referred to as “PIPEs.” A PIPE investment involves the sale of equity securities, or securities convertible into equity securities, in a private placement transaction by an issuer that already has outstanding, publicly traded equity securities of the same class.

Repurchase Agreements. In a repurchase agreement, the Fund purchases securities from a bank that is a member of the Federal Reserve System or also from a foreign bank or from a securities dealer that agrees to repurchase the securities from the Fund at a higher price on a designated future date. Repurchase agreements generally are for a short period of time, usually less than a week. Costs, delays, or losses could result if the selling party to a repurchase agreement becomes bankrupt or otherwise defaults. The Adviser monitors the creditworthiness of sellers. If the Fund enters into a repurchase agreement subject to foreign law and the counter-party defaults, the Fund may not enjoy protections comparable to those provided to certain repurchase agreements under U.S. bankruptcy law and may suffer delays and losses in disposing of the collateral as a result.

Responsible Avoidance Policy. The Adviser had adopted the following policies with respect to new Private Market Assets investment opportunities made by the Fund from April 2021 onwards (the “Responsible Avoidance Policy”):

- **Human Rights, Labor, Environment and Anti-Corruption.** The Adviser will not knowingly invest in a company in violation of the United Nations Global Compact (UNGC) Principles in regards to human rights, labor, the environment and anti-corruption - whether through child labor, human trafficking, forced labor or otherwise.

- **Sanction-related.** The Adviser is committed to complying with all applicable economic sanctions to safeguard the future value of any investments, including those issued by the United States through the Office of Foreign Assets Control (OFAC), European Union, United Nations Security Council and Her Majesty’s Treasury (U.K.).

- **Controversial Weapons.** The Adviser will not knowingly invest in companies that are involved in the manufacture of controversial weapons as such involvement presents material risks to the future value of the investment. The Adviser defines involvement in the manufacture of controversial weapons as either being responsible for end manufacture and assembly of controversial weapons, or being responsible for the manufacture of intended use components for controversial weapons. The Adviser does not include dual-use component manufacturers or delivery platform manufacturers. The Adviser defines controversial weapons as:
  - Anti-Personnel Mines, Weapons that signatories agreed to prohibit the use, stockpiling, production or transfer of under the 1997 Anti-personnel Landmines Convention.
  - Cluster Munitions, Weapons that signatories agreed to restrict the manufacture, use and stockpiling of, as well as components of these weapons, under the 2008 Convention on Cluster Munitions.
  - Depleted Uranium Weapons, Depleted uranium (DU) weapons, ammunition and armor.
  - **Thermal Coal.** The Adviser will not knowingly invest in companies that derive more than 25% of revenue from thermal coal mining or are expanding new thermal coal power generation (each, a “Thermal Coal Company”), as determined by internal screens. With respect to Secondary Investments, the Adviser will seek to avoid any material exposure to Thermal Coal Companies (and for these purposes, material shall mean companies which represent greater than 1% of the capital commitments of the respective funds managed by the Adviser which participate in such Secondary Investment).
Restricted Securities and Rule 144A Securities. The Fund may invest in “restricted securities,” which generally are securities that may be resold to the public only pursuant to an effective registration statement under the Securities Act or an exemption from registration. Regulation S under the Securities Act is an exemption from registration that permits, under certain circumstances, the resale of restricted securities in offshore transactions, subject to certain conditions, and Rule 144A under the Securities Act is an exemption that permits the resale of certain restricted securities to qualified institutional buyers.

Since its adoption by the SEC in 1990, Rule 144A has facilitated trading of restricted securities among qualified institutional investors. To the extent restricted securities held by the Fund qualify under Rule 144A and an institutional market develops for those securities, the Fund expects that it will be able to dispose of the securities without registering the resale of such securities under the Securities Act. However, to the extent that a robust market for such 144A securities does not develop, or a market develops but experiences periods of illiquidity, investments in Rule 144A securities could increase the level of the Fund's illiquidity.

Where an exemption from registration under the Securities Act is unavailable, or where an institutional market is limited, the Fund may, in certain circumstances, be permitted to require the issuer of restricted securities held by the Fund to file a registration statement to register the resale of such securities under the Securities Act. In such case, the Fund will typically be obligated to pay all or part of the registration expenses, and a considerable period may elapse between the decision to sell and the time the Fund may be permitted to resell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, or the value of the security were to decline, the Fund might obtain a less favorable price than prevailed when it decided to sell. Restricted securities for which no market exists are priced by a method that the Portfolio Fund Managers believe accurately reflects fair value.

Reverse Repurchase Agreements. In a reverse repurchase agreement, the Fund sells portfolio securities to another party and agrees to repurchase the securities at an agreed-upon price and date, which reflects an interest payment. Reverse repurchase agreements involve the risk that the other party will fail to return the securities in a timely manner, or at all, which may result in losses to the Fund. The Fund could lose money if it is unable to recover the securities and the value of the collateral held by the Fund is less than the value of the securities. These events could also trigger adverse tax consequences to the Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold will decline below the price at which the Fund is obligated to repurchase them. Reverse repurchase agreements may be viewed as a form of borrowing by the Fund. When the Fund enters into a reverse repurchase agreement, any fluctuations in the market value of either the securities transferred to another party or the securities in which the proceeds may be invested would affect the market value of the Fund’s assets. During the term of the agreement, the Fund may also be obligated to pledge additional cash and/or securities in the event of a decline in the fair value of the transferred security. The Adviser monitors the creditworthiness of counterparties to reverse repurchase agreements.

Special Purpose Acquisition Companies (SPACs). The Fund may invest in stock, warrants or other securities of special purpose acquisition companies (“SPACs”) or similar special purpose entities that pool funds to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC or similar entity generally maintains assets (less a portion retained to cover expenses) in a trust account comprised of U.S. Government securities, money market securities, and cash. If an acquisition is not completed within a pre-established period of time, the invested funds are returned to the entity’s shareholders.
ADDITIONAL RISK FACTORS

BDC Risk

A BDC is a type of closed-end investment company that typically invests in small and medium-sized companies. A BDC’s portfolio is subject to the risks inherent in investing in smaller companies, including that portfolio companies may be dependent on a small number of products or services and may be more adversely affected by poor economic or market conditions. Some BDCs invest substantially, or even exclusively, in one sector or industry group and therefore the BDC may be susceptible to adverse conditions and economic or regulatory occurrences affecting the sector or industry group, which tends to increase volatility and result in higher risk. The Small Business Credit Availability Act, which was signed into law in March 2018, permits BDCs to adopt a lower asset coverage ratio, thereby enhancing their ability to use leverage. Investments in BDCs that use greater leverage may be subject to heightened risks.

The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by BDCs in which it invests, in addition to the fees and expenses regularly borne by the Fund. Fees and expenses of BDCs are generally higher than those of other RICs.

Convertible Securities Risk

The value of a convertible security, which is a form of hybrid security (i.e., a security with both debt and equity characteristics), typically increases or decreases with the price of the underlying common stock. In general, a convertible security is subject to the market risks of stocks, and its price may be as volatile as that of the underlying stock, when the underlying stock’s price is high relative to the conversion price, and a convertible security is subject to the market risks of debt securities, and is particularly sensitive to changes in interest rates, when the underlying stock’s price is low relative to the conversion price. The general market risks of debt securities that are common to convertible securities include, but are not limited to, interest rate risk and credit risk. Convertible securities generally have less potential for gain or loss than common stocks. Securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities that are convertible only at the option of the holder.

Many convertible securities have credit ratings that are below investment grade and are subject to the same risks as an investment in lower-rated debt securities (commonly known as “junk bonds”). Lower-rated debt securities involve greater risks than investment grade debt securities. Lower-rated debt securities may fluctuate more widely in price and yield and may fall in price during times when the economy is weak or is expected to become weak. The credit rating of a company’s convertible securities is generally lower than that of its non-convertible debt securities. Convertible securities are normally considered “junior” securities—that is, the company usually must pay interest on its non-convertible debt securities before it can make payments on its convertible securities. If the issuer stops paying interest or principal, convertible securities may become worthless and the Fund could lose its entire investment.

Derivatives Risk

Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments, such as stocks and bonds. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways. Derivatives can create leverage, which can magnify the impact of a decline in the value of the reference instrument underlying the derivative, and the Fund could lose more than the amount it invests. Derivatives have the potential for unlimited losses, for example, where the Fund may be called upon to deliver a security it does not own. Derivatives may at times be highly illiquid, and the Fund may not be able to close out or sell a derivative at a particular time or at an anticipated price. Derivatives can be difficult to value and valuation may be more difficult in times of market turmoil. There may be imperfect correlation between the behavior of a derivative and that of the reference instrument underlying the derivative, and the reference instrument may not perform as anticipated. An abrupt change in the price of a reference instrument could render a derivative worthless. Derivatives may involve risks different from, and possibly greater than, the risks associated with investing directly in the reference instrument. Suitable derivatives may not be available in all circumstances, and there can be no assurance that the Fund will use derivatives to reduce exposure to other risks when that might have been beneficial. Derivatives may involve fees, commissions, or other costs that may reduce the Fund’s gains or exacerbate losses from the derivatives. In addition, the Fund’s use of derivatives may have different tax consequences for the Fund than an investment in the reference instruments, and those differences may increase the amount and affect the timing of income recognition and character of taxable distributions payable to shareholders. Thus, the Fund could be required at times to liquidate other investments in
order to satisfy its distribution requirements. Certain aspects of the regulatory treatment of derivative instruments, including federal income tax, are currently unclear and may be affected by changes in legislation, regulations, or other legally binding authority.

Derivatives involve counterparty risk, which is the risk that the other party to the derivative will fail to make required payments or otherwise comply with the terms of the derivative. Counterparty risk may arise because of market activities and developments, the counterparty’s financial condition (including financial difficulties, bankruptcy, or insolvency), or other reasons. Not all derivative transactions require a counterparty to post collateral, which may expose the Fund to greater losses in the event of a default by a counterparty. Counterparty risk is generally thought to be greater with OTC derivatives than with derivatives that are exchange traded or centrally cleared. However, derivatives that are traded on organized exchanges and/or through clearing organizations involve the possibility that the futures commission merchant or clearing organization will default in the performance of its obligations.

When the Fund uses derivatives, it will likely be required to provide margin or collateral and/or segregate cash or other liquid assets; these practices are intended to satisfy contractual undertakings and regulatory requirements and will not prevent the Fund from incurring losses on derivatives. The need to provide margin or collateral and/or segregate assets could limit the Fund’s ability to pursue other opportunities as they arise. Segregated assets are not available to meet redemptions. The amount of assets required to be segregated will depend on the type of derivative the Fund uses and the nature of the contractual arrangement. If the Fund is required to segregate assets equal to only the current market value of its obligation under a derivative, the Fund may be able to use derivatives to a greater extent, which would increase the degree of leverage the Fund could undertake through derivatives and otherwise, than if it were required to segregate assets equal to the full notional value of such derivative. Derivatives that have margin requirements involve the risk that if the Fund has insufficient cash or eligible margin securities to meet daily variation margin requirements, it may have to sell securities or other instruments from its portfolio at a time when it may be disadvantageous to do so. The Fund normally will remain obligated to meet margin requirements until a derivatives position is closed.

Ongoing changes to regulation of the derivatives markets and potential changes in the regulation of funds using derivative instruments could limit the Fund’s ability to pursue its investment strategies. New regulation of derivatives may make them more costly, or may otherwise adversely affect their liquidity, value or performance.

Although the Fund may use derivatives to attempt to hedge against certain risks, the hedging instruments may not perform as expected and could produce losses.

Additional risks associated with certain types of derivatives are discussed below:

- **Forward Contracts.** There are no limitations on daily price movements of forward contracts. Changes in foreign exchange regulations by governmental authorities might limit the trading of forward contracts on currencies. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices with an unusually wide spread (the difference between the price at which the counterparty is prepared to buy and the price at which it is prepared to sell).

- **Futures.** There can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold and this may result in the inability to close a futures position when desired. This could be the case if, for example, a futures price has increased or decreased by the maximum allowable daily limit and there is no buyer (or seller) willing to purchase (or sell) the futures contract that the Fund needs to sell (or buy) at that limit price.

- **Options.** The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility of the underlying instrument (known as implied volatility), which in turn are affected by fiscal and monetary policies and by national and international political and economic events, as well as the performance of the issuer of the underlying instrument. As such, prior to the exercise or expiration of the option, the Fund is exposed to implied volatility risk, meaning the value, as based on implied volatility, of an option may increase due to market and economic conditions or views based on the sector or industry in which issuers of the underlying instrument participate, including company-specific factors. By writing put options, the Fund takes on the risk of declines in the value of the underlying instrument, including the possibility of a loss up to the entire strike price of each option it sells, but without the corresponding opportunity to benefit from potential increases in the value of the underlying instrument. When the Fund writes a put option, it assumes the risk
that it must purchase the underlying instrument at a strike price that may be higher than the market price of the instrument. If there is a broad market decline and the Fund is not able to close out its written put options, it may result in substantial losses to the Fund. By writing a call option, the Fund may be obligated to deliver instruments underlying an option at less than the market price. In the case of an uncovered call option, there is a risk of unlimited loss. When an uncovered call is exercised, the Fund must purchase the underlying instrument to meet its call obligations and the necessary instruments may be unavailable for purchase. When the Fund writes a covered call option, it gives up the opportunity to profit from a price increase in the underlying instrument above the strike price. If a covered call option that the Fund has written is exercised, the Fund will experience a gain or loss from the sale of the underlying instrument, depending on the price at which the Fund purchased the instrument and the strike price of the option. The Fund will receive a premium from writing options, but the premium received may not be sufficient to offset any losses sustained from exercised options. In the case of a covered call, the premium received may be offset by a decline in the market value of the underlying instrument during the option period. If an option that the Fund has purchased is never exercised or closed out, the Fund will lose the amount of the premium it paid and the use of those funds.

- **Swaps.** Swap transactions generally do not involve delivery of reference instruments or payment of the notional amount of the contract. Accordingly, the risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make or, in the case of the other party to a swap defaulting, the net amount of payments that the Fund is contractually entitled to receive. If the Fund sells a credit default swap, however, the risk of loss may be the entire notional amount of the swap. Some swaps are now executed through an organized exchange or regulated facility and cleared through a regulated clearing organization. The absence of an organized exchange or market for swap transactions may result in difficulties in trading and valuation, especially in the event of market disruptions. The use of an organized exchange or market for swap transactions is expected to result in swaps being easier to trade or value, but this may not always be the case.

**Distressed Securities Risk**

Distressed securities are securities of companies that are in financial distress and that may be in or about to enter bankruptcy or some other legal proceeding. These securities may present a substantial risk of default, including the loss of the entire investment, or may be in default. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal of or interest on its portfolio holdings. Distressed securities include loans, bonds and notes, many of which are not publicly traded, and may involve a substantial degree of risk. In certain periods, there may be little or no liquidity in the markets for distressed holdings meaning that the Fund may be unable to exit its position. Distressed securities and any securities received in an exchange for such securities may be subject to restrictions on resale. In addition, the prices of such securities may be subject to periods of abrupt and erratic market movements and above-average price volatility. It may be difficult to obtain information regarding the financial condition of a borrower or issuer, and its financial condition may change rapidly. Also, it may be difficult to value such securities and the spread between the bid/ask prices of such securities may be greater than expected. The Fund may lose a substantial portion or all of its investment in distressed securities or may be required to accept cash, securities or other property with a value less than its original investment.

**ETFs Risk**

Subject to the limitations set forth in the Investment Company Act or as otherwise permitted by the SEC, the Fund may acquire shares in ETFs. The market value of the shares of other investment companies may differ from their net asset value. As an investor in ETFs, the Fund would bear its ratable share of that entity’s expenses, including its investment advisory and administration fees, while continuing to pay its own advisory and administration fees and other expenses. As a result, shareholders will be absorbing duplicate levels of fees with respect to investments in ETFs. Many ETFs are not actively managed and may be affected by a general decline in market segments relating to an index. An index ETF typically invests in securities included in, or representative of, its index regardless of their investment merits and does not attempt to take defensive positions in declining markets.

**Preferred Securities Risk**

Preferred securities, which are a form of hybrid security (i.e., a security with both debt and equity characteristics), may pay fixed or adjustable rates of return. Preferred securities are subject to issuer-specific and market risks
applicable generally to equity securities, however, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred securities are generally payable at the discretion of the issuer’s board of directors and after the company makes required payments to holders of its bonds and other debt securities. For this reason, the value of preferred securities will usually react more strongly than bonds and other debt securities to actual or perceived changes in the company’s financial condition or prospects. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred securities of larger companies. Preferred securities may be less liquid than common stocks. Preferred securities may include provisions that permit the issuer, at its discretion, to defer or omit distributions for a stated period without any adverse consequences to the issuer. Preferred shareholders may have certain rights if distributions are not paid but generally have no legal recourse against the issuer and may suffer a loss of value if distributions are not paid. Generally, preferred shareholders have no voting rights with respect to the issuer unless distributions to preferred shareholders have not been paid for a stated period, at which time the preferred shareholders may elect a number of directors to the issuer’s board. Generally, once all the distributions have been paid to preferred shareholders, the preferred shareholders no longer have voting rights.

**PIPEs Risk**

Shares acquired in PIPEs are commonly sold at a discount to the current market value per share of the issuer’s publicly traded securities. Securities acquired in PIPEs generally are not registered with the SEC until after a certain period of time from the date the private sale is completed, which may be months and perhaps longer. PIPEs may contain provisions that require the issuer to pay penalties to the holder if the securities are not registered within a specified period. Until the public registration process is completed, securities acquired in PIPEs are restricted and, like investments in other types of restricted securities, may be illiquid. Any number of factors may prevent or delay a proposed registration. Prior to or in the absence of registration, it may be possible for securities acquired in PIPEs to be resold in transactions exempt from registration under the Securities Act. There is no guarantee, however, that an active trading market for such securities will exist at the time of disposition, and the lack of such a market could hurt the market value of the Fund’s investments. Even if the securities acquired in PIPEs become registered, or the Fund is able to sell the securities through an exempt transaction, the Fund may not be able to sell all the securities it holds on short notice and the sale could impact the market price of the securities.

**Private Placements and Other Restricted Securities Risk**

Private placements and other restricted securities are securities that are subject to legal and/or contractual restrictions on their sales. These securities may not be sold to the public unless certain conditions are met, which may include registration under the applicable securities laws. These securities may not be listed on an exchange and may have no active trading market. As a result of the absence of a public trading market, the prices of these securities may be more volatile and more difficult to determine than publicly traded securities and these securities may involve heightened risk as compared to investments in securities of publicly traded companies. Private placements and other restricted securities may be illiquid, and it frequently can be difficult to sell them at a time when it may otherwise be desirable to do so or the Fund may be able to sell them only at prices that are less than what the Fund regards as their fair market value. A security that was liquid at the time of purchase may subsequently become illiquid. In addition, transaction costs may be higher for private placements and other restricted securities. The Fund may have to bear the expense of registering such securities for sale and there may be substantial delays in effecting the registration. If, during such a delay, adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed at the time it decided to seek registration of the securities. In addition, the Fund may get only limited information about the issuer of a private placement or other restricted security, so it may be less able to anticipate a loss.

**Repurchase Agreement Risk**

Repurchase agreements generally are for a short period of time and involve the risk that the counterparty may default on its obligation to repurchase the underlying instruments collateralizing the repurchase agreement, which may result in costs, delays, and/or losses to the Fund. In such a case, the Fund may incur expenses in enforcing its rights under the repurchase agreement. Repurchase agreements also involve the risk that the Fund could lose money if the underlying instruments used as collateral lose their value before they can be sold, or if the Fund is required to return collateral to a borrower at a time when it may realize a loss on the investment of that collateral.

**SPACs Risk**

Because SPACs and similar entities are in essence blank-check companies without an operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the
entity’s management to identify and complete a profitable acquisition. SPACs may allow shareholders to redeem their pro rata investment immediately after the SPAC announces a proposed acquisition, which may prevent the entity’s management from completing the transaction. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. In addition, SPACs may trade in the over-the-counter market and, accordingly, may be considered illiquid and/or be subject to restrictions on resale.

**Variable and Floating Rate Instruments Risk**

The market prices of instruments with variable and floating interest rates are generally less sensitive to interest rate changes than are the market prices of instruments with fixed interest rates. Variable and floating rate instruments may decline in value if market interest rates or interest rates paid by such instruments do not move as expected. Certain types of floating rate instruments, such as interests in bank loans, may be subject to greater liquidity risk than other debt securities.

**Warrants and Rights Risk**

Warrants and rights do not carry with them the right to dividends or voting rights with respect to the securities that they entitle their holder to purchase, and they do not represent any rights in the assets of the issuer. As a result, warrants and rights may be considered more speculative than certain other types of investments. In addition, the value of a warrant or right does not necessarily change with the value of the underlying securities. The Fund could lose the value of a warrant or right if the right to subscribe to additional shares is not exercised prior to the warrant’s or right’s expiration date. The market for warrants and rights may be very limited and there may at times not be a liquid secondary market for warrants and rights.
Further Information Regarding Management of the Fund

Information regarding the Managers and Officers of the Fund, including brief biographical information, is set forth below.

Board of Managers

The Managers of the Fund, their ages, addresses, positions held, lengths of time served, their principal business occupations during the past five years, the number of portfolios in the “Fund Complex” (defined below) overseen by each Independent Manager and other directorships, if any, held by the Managers, are shown below.

As to each Independent Manager and his or her immediate family members, no person owned beneficially or of record securities of an investment adviser or principal underwriter of the Fund, or a person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with an investment adviser or principal underwriter of the Fund.

As of December 31, 2020, none of the Managers and Officers of the Fund owned any Shares of the Fund.
Manager Compensation

Currently, the Independent Managers are each paid an annual retainer of $175,000 for serving on the boards of the funds in the Fund Complex. The Independent Managers are also reimbursed for out-of-pocket expenses in connection with providing services to the Fund. The Board does not have a compensation committee. The Fund does not have any retirement plan for the Fund’s Managers.

* Estimated for the fiscal year ending March 31, 2022 as the Fund has not yet completed a full first year of operations.

** The total compensation estimated to be paid to such persons by the Fund and Fund Complex for the fiscal year ending March 31, 2022. The parenthetical number represents the number of investment companies (including the Fund) from which such person receives compensation.

Compensation of the Portfolio Managers

Neuberger Berman’s compensation philosophy is one that focuses on rewarding performance and incentivizing our employees. Neuberger Berman is focused on creating a compensation process that it believes is fair, transparent and competitive with the market.

Compensation for the Fund’s Portfolio Management Team consists of fixed (salary) and variable compensation but is more heavily weighted on the variable portion of total compensation and is paid from a team compensation pool made available to the portfolio management team with which the portfolio manager is associated. The size of the team compensation pool is determined based on a formula that takes into consideration a number of factors including the pre-tax revenue that is generated by that particular portfolio management team, less certain adjustments. The bonus portion of the compensation for a portfolio manager is discretionary and is determined on the basis of a variety of criteria, including investment performance (including the aggregate multi-year track record), utilization of central resources (including research, sales and operations/support), business building to further the longer term sustainable success of the investment team, effective team/people management, and overall contribution to the success of Neuberger Berman.

The terms of our long-term retention incentives are as follows:

- **Employee-Owned Equity.** Certain employees (i.e., senior leadership and investment professionals) participate in Neuberger Berman’s equity ownership structure, which was designed to incentivize and retain key personnel. Most equity issuances are subject to vesting. In addition, in prior years certain employees may have elected to have a portion of their compensation delivered in the form of equity, which, in certain instances, is vested upon issuance and in other instances vesting aligns with the vesting of Neuberger Berman’s Contingent Compensation Plan (vesting over 3 years).

  For confidentiality and privacy reasons, Neuberger Berman cannot disclose individual equity holdings or program participation.

- **Contingent Compensation.** Neuberger Berman established the Neuberger Berman Group Contingent Compensation Plan (the “CCP”) to serve as a means to further align the interests of our employees with the success of the firm and the interests of our clients, and to reward continued employment. Under the CCP, a percentage of a participant’s total compensation is contingent and tied to the performance of a portfolio of Neuberger Berman investment strategies as specified by the firm on an employee-by-employee basis. By having a participant’s contingent compensation tied to Neuberger Berman investment strategies, each employee is given further incentive to operate as a prudent risk manager and to collaborate with colleagues to maximize performance across all business areas. In the case of portfolio managers, the CCP
is currently structured so that such employees have exposure to the investment strategies of their respective teams as well as the broader Neuberger Berman portfolio. Subject to satisfaction of certain conditions of the CCP (including conditions relating to continued employment), contingent compensation amounts vest over three years. Neuberger Berman determines annually which employees participate in the program based on total compensation for the applicable year.

- **Restrictive Covenants.** Most investment professionals, including portfolio managers, are subject to notice periods and restrictive covenants which include employee and client non-solicit restrictions as well as restrictions on the use of confidential information. In addition, depending on participation levels, certain senior professionals who have received equity have also agreed to additional notice and transition periods and, in some cases, non-compete restrictions.

### Other Accounts Managed by the Portfolio Managers

The following table lists the number and types of accounts, other than the Fund, managed by the Fund’s Portfolio Management Team and assets under management in those accounts, as of March 31, 2021.

* Registered investment companies in a “master-feeder” structure are counted as one investment company for purposes for determining the number of accounts managed.

As of March 31, 2021, the following members of the Portfolio Management Team that owned Shares were: Peter J. Von Lehe, who owned $100,001-$500,000 worth of Shares; David Morse, who owned $100,001-$500,000 worth of Shares; Joana P. Rocha Scaff, who owned $100,001-$500,000 worth of Shares; Jonathan D. Shofet, who owned $100,001-$500,000 worth of Shares; and Anthony D. Tutrone, who owned over $1,000,000 worth of Shares.

**Codes of Ethics**

The Fund and the Adviser have adopted codes of ethics pursuant to Rule 17j-1 under the Investment Company Act. These codes permit personnel subject to the codes to invest in securities, including securities that may be purchased or held by the Fund, subject to a number of controls. These codes may be obtained by calling the SEC at (202) 551-8090. These codes of ethics are available on the EDGAR Database on the SEC’s website (http://www.sec.gov).
Proxy Voting Policies

The Fund’s private equity investments do not typically convey traditional voting rights, and the occurrence of corporate governance or other consent or voting matters for this type of investment is substantially less than that encountered in connection with registered equity securities. On occasion, however, the Fund may receive notices or proposals from the Portfolio Funds seeking the consent of or voting by holders, and may also vote on matters relating to the other private equity investments. The Board has delegated the voting of proxies for to the securities held in the Fund’s portfolio to the Investment Adviser pursuant to the Investment Adviser’s proxy voting policies and procedures. Under these policies, the Investment Adviser will vote proxies, amendments, consents or resolutions related to Fund securities in the best interests of the Fund and its Shareholders. The Investment Adviser’s proxy voting procedures are included in Appendix B of this SAI. Information regarding how the Investment Adviser voted proxies related to the Fund’s portfolio holdings during the 12-month period ending June 30 will be available, without charge, upon request by calling collect (212) 476-8800, and on the SEC’s website at www.sec.gov.
PORTFOLIO TRANSACTIONS AND BROKERAGE

In effecting securities transactions, the Fund seek to obtain the best price and execution of orders. While affiliates of the Investment Adviser are permitted to act as brokers for the Funds in the purchase and sale of their portfolio securities (other than certain securities traded on the OTC market) where such brokers are capable of providing best execution (“Affiliated Brokers”), the Funds generally will use unaffiliated brokers. For Fund transactions which involve securities traded on the OTC market, the Fund purchases and sells OTC securities in principal transactions with dealers who are the principal market makers for such securities.

Purchases and sales of certain debt securities generally are transacted with issuers, underwriters, or dealers that serve as primary market-makers, who act as principals for the securities on a net basis. The Fund typically does not pay brokerage commissions for such purchases and sales. Instead, the price paid for newly issued securities usually includes a concession or discount paid by the issuer to the underwriter, and the prices quoted by market-makers reflect a spread between the bid and the asked prices from which the dealer derives a profit.

For Fund transactions which involve securities traded on the OTC market, the Fund purchases and sells OTC securities in principal transactions with dealers who are the principal market makers for such securities. Loans will be purchased in individually negotiated transactions with commercial banks, thrifts, insurance companies, finance companies and other financial institutions. In determining whether to purchase loans from these financial institutions, the Investment Adviser may consider, among other factors, the financial strength, professional ability, level of service and research capability of the institution. While financial institutions generally are not required to repurchase loans which they have sold, they may act as principal or on an agency basis in connection with the Fund’s disposition of loans.

In most instances, the Fund will purchase interests in a Portfolio Fund directly from the Portfolio Fund, and such purchases by the Fund may be, but are generally not, subject to transaction expenses. Nevertheless, the Fund anticipates that some of its portfolio transactions (including investments in Portfolio Funds by the Fund) may be subject to expenses.

Portfolio Turnover

Portfolio turnover may vary significantly from year to year due to a variety of factors, including market conditions, investment strategy changes, and/or changes in the Adviser’s investment outlook. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in an increased realization of net short-term capital gains by the Fund which, when distributed to common shareholders, will be taxable as ordinary income. Additionally, in a declining market, portfolio turnover may create realized capital losses.

ERISA CONSIDERATIONS

Persons who are fiduciaries with respect to an employee benefit plan or other arrangements or entities subject to ERISA (an “ERISA Plan”), and persons who are fiduciaries with respect to an IRA or Keogh Plan, which is not subject to ERISA but is subject to the prohibited transaction rules of Section 4975 of the Code (together with ERISA Plans, “Benefit Plans”) should consider, among other things, the matters described below before determining whether to invest in the Fund.

ERISA imposes certain general and specific responsibilities on persons who are fiduciaries with respect to an ERISA Plan, including prudence, diversification, an obligation not to engage in a prohibited transaction and other standards. In determining whether a particular investment is appropriate for an ERISA Plan, U.S. Department of Labor (“DOL”) regulations provide that a fiduciary of an ERISA Plan must give appropriate consideration to, among other things, the role that the investment plays in the ERISA Plan’s portfolio, taking into consideration whether the investment is designed reasonably to further the ERISA Plan’s purposes, an examination of the risk and return factors, the portfolio’s composition with regard to diversification, the liquidity and current return of the total portfolio relative to the anticipated cash flow needs of the ERISA Plan, the income tax consequences of the investment and the projected return of the total portfolio relative to the ERISA Plan’s funding objectives. Before investing the assets of an ERISA Plan in the Fund, a fiduciary should determine whether such an investment is consistent with its fiduciary responsibilities and the foregoing regulations. For example, a fiduciary should consider whether an investment in the Fund may be too illiquid or too speculative for a particular ERISA Plan, and whether the assets of the ERISA Plan would be sufficiently diversified. Fiduciaries of such plans or arrangements also should confirm that investment in
the Fund is consistent, and complies, with the governing provisions of the plan or arrangement, including any eligibility and nondiscrimination requirements that may be applicable under law with respect to any “benefit, right or feature” affecting the qualified status of the plan or arrangement, which may be of particular importance for participant-directed plans given that the Fund sells Shares only to Eligible Investors, as described herein. If a fiduciary with respect to any such ERISA Plan breaches its responsibilities with regard to selecting an investment or an investment course of action for such ERISA Plan, the fiduciary itself may be held liable for losses incurred by the ERISA Plan as a result of such breach. Fiduciaries of plans or arrangements subject to Section 4975 of the Code (such as IRAs and Keoghs) should consider carefully these same factors.

The DOL has adopted regulations, which, along with provisions adopted by Congress (collectively, the “b”), treat the assets of certain pooled investment vehicles as “plan assets” for purposes of, and subject to, Title I of ERISA and Section 4975 of the Code (“Plan Assets”). The Plan Assets Rules provide, however, that, in general, funds registered as investment companies under the 1940 Act are not deemed to be subject to the fiduciary responsibility provisions of ERISA or Section 4975 of the Code merely because of investments made in the fund by Benefit Plans. Accordingly, the underlying assets of the Fund should not be considered to be the Plan Assets of the Benefit Plans investing in the Fund for purposes of ERISA’s (or the Code’s) fiduciary responsibility and prohibited transaction rules. Thus, the Adviser should not be considered a fiduciary within the meaning of ERISA or the Code by reason of its authority with respect to the Fund.

The Fund will require a Benefit Plan (and each person causing such Benefit Plan to invest in the Fund) to represent that it, and any such fiduciaries responsible for such Benefit Plan’s investments (including in its individual or corporate capacity, as may be applicable), are aware of and understand the Fund’s investment objective, policies and strategies, that the decision to invest Plan Assets in the Fund was made with appropriate consideration of relevant investment factors with regard to the Benefit Plan and is consistent with the duties and responsibilities imposed upon fiduciaries with regard to their investment decisions under ERISA and/or the Code.

Certain prospective investors that are Benefit Plans may currently maintain relationships with the Adviser, the Sub-Adviser or other entities that are affiliated with the Adviser or the Sub-Adviser. Each of such persons may be deemed to be a party in interest (or disqualified person) to and/or a fiduciary of any Benefit Plan to which it provides investment management, investment advisory or other services. ERISA prohibits (and the Code penalizes) the use of ERISA and Benefit Plan assets for the benefit of a party in interest (or disqualified person) and also prohibits (or penalizes) an ERISA or Benefit Plan fiduciary from using its position to cause such Plan to make an investment from which it or certain third parties in which such fiduciary has an interest would receive a fee or other consideration. Shareholders that are Benefit Plans should consult with counsel to determine if participation in the Fund is a transaction which is prohibited by ERISA or the Code. Fiduciaries of Shareholders that are Benefit Plans will be required to represent (including in their individual or corporate capacity, as applicable) that the decision to invest in the Fund was made by them as fiduciaries that are independent of such affiliated persons, that such fiduciaries are duly authorized to make such investment decision, that they have not relied on any advice or recommendation of such affiliated persons as a basis for the decision to invest in the Fund and that any information provided by the Fund and the affiliated persons is not a recommendation to invest in the Fund.

Benefit Plan Investors may be required to report certain compensation paid by the Fund (or by third parties) to the Fund’s service providers as “reportable indirect compensation” on Schedule C to IRS Form 5500 (“Form 5500”). To the extent that any compensation arrangements described herein constitute reportable indirect compensation, any such descriptions are intended to satisfy the disclosure requirements for the alternative reporting option for “eligible indirect compensation,” as defined for purposes of Schedule C to Form 5500.

The provisions of ERISA and the Code are subject to extensive and continuing administrative and judicial interpretation and review. The discussion of ERISA and the Code contained in this SAI is general, does not purport to be a thorough analysis of ERISA or the Code, may be affected by future publication of regulations and rulings and should not be considered legal advice. Potential investors that are Benefit Plans and their fiduciaries should consult their legal advisers regarding the consequences under ERISA and the Code of the acquisition and ownership of Shares.

Employee benefit plans that are not subject to the requirements of ERISA or Section 4975 of the Code (such as governmental plans, foreign plans and certain church plans) may be subject to similar rules under other applicable laws or documents, and should consult their own advisers as to the propriety of an investment in the Fund. In particular, “governmental plans” (as defined in Section 3(32) of ERISA) are not subject to Title I of ERISA or
Section 4975 of the Code. However, state laws applicable to certain governmental plans have provisions that impose restrictions on the investments and management of the assets of such plans that are, in some cases, similar to those under ERISA and the Code discussed above. It is uncertain whether exemptions and interpretations under ERISA would be recognized by the respective state authorities in such cases. Also, some state laws prohibit, or impose percentage limitations on investments of a particular type, in obligations or securities of foreign governments or entities, or bar investments in particular countries or businesses operating in such countries. Fiduciaries of governmental plans, in consultation with their advisers, should consider the impact of their respective state pension laws and regulations on investments in the Fund, as well as the considerations discussed above to the extent applicable.

By acquiring Shares of the Fund, a Shareholder acknowledges and agrees that: (i) any information provided by the Fund, the Adviser, the Sub-Adviser or any affiliates thereof (including information set forth in the Prospectus and this SAI) is not a recommendation to invest in the Fund and that none of the Fund, the Adviser, the Sub-Adviser or any affiliates thereof is undertaking to provide any investment advice to the Shareholder (impartial or otherwise), or to give advice to the Shareholder in a fiduciary capacity in connection with an investment in the Fund and, accordingly, no part of any compensation received by the Adviser or the Sub-Adviser is for the provision of investment advice to the Shareholder; and (ii) the Adviser and the Sub-Adviser have a financial interest in the Investor’s investment in the Fund on account of the fees they expect to receive from the Fund as disclosed herein, the LLC Agreement and any other Fund governing documents.

**CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS**

The Fund commenced investment operations on the Initial Closing Date. Except as noted below, no persons owned of record or beneficially 5% or more of any class of the Fund’s outstanding Shares as of March 31, 2021:

Shareholders who beneficially own 25% or more of the outstanding Shares of the Fund may be deemed to be a “control person” of the Fund for purposes of the Investment Company Act.

**FINANCIAL STATEMENTS**

The financial statements of the Fund for the period indicated follow.
Report of Independent Registered Public Accounting Firm

To the Members and Board of Managers
NB Crossroads Private Markets Access Fund LLC:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of NB Crossroads Private Markets Access Fund LLC (the Fund), as of November 25, 2020, the related statement of operations for the period July 10, 2020 (commencement of operations) through November 25, 2020, and the related notes (collectively, the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of November 25, 2020, and the results of its operations for the period from July 10, 2020 to November 25, 2020, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on these financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the auditor of one or more NB Private Markets/NB Crossroads Private Markets investment companies since 2016.

* The Fund has had no operations to date other than matters relating to its organization, its registration under the Investment Company Act of 1940, registration of the Fund’s shares of limited liability company interest (“Shares”) under the Securities Act of 1933 and the sale of 10,000 Institutional Class Shares for $100,000 to Neuberger Berman Europe Holdings LLC on November 25, 2020.

See accompanying notes which are an integral part of these financial statements
1. Organization

NB Crossroads Private Markets Access Fund LLC (the “Fund”) was organized on July 10, 2020 as a limited liability company under the laws of the state of Delaware. The Fund is a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund is offered only to investors that are both “accredited investors,” as defined in Section 501(a) of Regulation D promulgated under the Securities Act of 1933 (the “Securities Act”) and “qualified clients” as defined in Rule 205-3 under the Investment Advisers Act of 1940, as amended (the “Advisers Act”).

The Fund’s investment objective is to seek to provide attractive, long-term capital appreciation by investing primarily in an actively managed portfolio of private equity investments. The Fund’s private equity investments are expected to focus on private equity strategies including: (i) buyouts; (ii) special situations; (iii) venture and growth capital; (iv) infrastructure and real assets; and (v) private credit.

The Fund is managed by Neuberger Berman Investment Advisers LLC, an investment adviser registered under the Advisers Act that serves as the Fund’s investment adviser (the “Registered Investment Adviser”). The Registered Investment Adviser has engaged NB Alternatives Advisers LLC (the “Sub-Adviser”) to assist with investment decisions. The Fund’s Board of Managers (the “Board”) has overall responsibility for the management and supervision of the operations of the Fund. Certain Officers of the Registered Investment Adviser are also officers of the Fund.

The Fund has been inactive except for matters relating to the Fund’s organization, registration under the 1940 Act, registration of the Fund’s shares of limited liability company interest (the “Shares”) under the Securities Act and the sale of 10,000 Institutional Class Shares for $100,000 to Neuberger Berman Europe Holdings LLC on November 25, 2020. The Fund will offer two separate classes of Shares designated Institutional Class and Class A. As of November 25, 2020, only Institutional Class Shares of the Fund are currently operational.

2. Significant Accounting Policies

The Fund meets the definition of an investment company and follows the accounting and reporting guidance as issued through Accounting Standards Codification (“ASC”) Topic 946, Financial Services – Investment Companies. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

A. Basis of Accounting

The Fund’s policy is to prepare its financial statements on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“GAAP”). Consequently, income and the related assets are recognized when earned, and expenses and the related liabilities are recognized when incurred. The books and records of the Fund are maintained in U.S. dollars.

B. Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and the differences could be material.

C. Cash

Cash at November 25, 2020 is on deposit with UMB Bank N.A., who serves as the Fund’s custodian. Cash, at times, may exceed the insurance limit guaranteed by the Federal Deposit Insurance Corporation and could expose the Fund to credit risk.

D. Valuation

The Fund will value investments monthly at fair value consistent with the principles of ASC Topic 820, Fair Value Measurements.
E. Expense Recognition
Expenses are recognized on an accrual basis.

F. Federal Income Taxes
The Fund intends to qualify and elect to be treated for U.S. federal income tax purposes as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), with a tax year end of September 30. If the Fund were to fail to meet the requirements of Subchapter M to qualify as a RIC, and if the Fund were ineligible to or otherwise unable to cure such failure, the Fund would be subject to tax on its taxable income at corporate rates, whether or not distributed to shareholders, and all distributions out of earnings and profits would be taxable to shareholders as ordinary income. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before re-qualifying as a RIC under Subchapter M. The Fund intends to comply with the requirements under Subchapter M and to distribute substantially all of its taxable income and gains to shareholders and to meet certain diversification and income requirements with respect to its underlying investments. Accordingly, no provision for federal income or excise taxes has been made in the accompanying financial statements.

G. Organizational and Offering Costs
Organizational and offering costs are costs incidental to the organization, issuing and marketing of interests and are non-recurring in nature. The Fund’s organizational costs of $24,823, which have been incurred through November 25, 2020, and any additional organizational costs incurred prior to the commencement of operations, have been and will continue to be paid by the Registered Investment Adviser. These costs will be subject to recoupment in accordance with the Fund’s expense limitation agreement (the “Expense Limitation and Reimbursement Agreement”, as further discussed in Note 3) after the Fund commences operations. The Fund expenses organizational costs as incurred.

The Fund’s offering costs of $171,341, which have been incurred through November 25, 2020, and any additional offering costs incurred prior to the commencement of operations, have been and will continue to be paid by the Registered Investment Adviser, subject to reimbursement by the Fund. The Fund treats offering costs as deferred charges until the Fund commences operations and thereafter will amortize such costs over a 12-month period using the straight-line method.

H. Purchase of Shares
Shares will generally be offered for purchase as of the first business day of each month, or at such other times as determined in the discretion of the Board.

I. Repurchase of Shares
The Fund expects to conduct repurchase offers quarterly pursuant to written tenders to shareholders. The Registered Investment Adviser anticipates recommending to the Board that, under normal market circumstances, the Fund conduct repurchase offers of no more than 5% of the Fund’s net assets quarterly on or about each February 1, May 1, August 1 and November 1. The Registered Investment Adviser currently expects to recommend to the Board that the Fund conducts its first repurchase offer following the second full quarter of Fund operations (or such earlier or later date as the Board may determine).

3. Advisory Fee, Incentive Fee and Other Expenses
The Registered Investment Adviser provides investment advisory services to the Fund and incurs research, travel and other expenses related to the selection and monitoring of underlying investments. Further, the Registered Investment Adviser provides certain management and administrative services including providing office space and other support services, maintaining files and records, and preparing and filing various regulatory materials. In consideration for such services, the Fund pays the Registered Investment Adviser an investment advisory fee (the “Advisory Fee”) at an annual rate of 1.50%, based on the Fund’s net asset value calculated and accrued monthly as of the last business day of each month, and payable quarterly in arrears within five (5) business days after the completion of the net asset value computation for the quarter.

At the end of each calendar quarter of the Fund, the Registered Investment Adviser will be entitled to receive an Incentive Fee equal to 10% of the difference, if positive, between (i) the net profits of the Fund for the relevant period
and (ii) the then balance, if any, of the Loss Recovery Account (as defined below). For the purposes of the Incentive Fee, the term “net profits” shall mean (i) the amount by which the net asset value of the Fund on the last day of the relevant period exceeds the net asset value of the Fund as of the commencement of the same period, including any net change in unrealized appreciation or depreciation of investments and realized income and gains or losses and expenses (including offering and organizational expenses) plus (ii) the aggregate distributions accrued during the period.

The Fund will maintain a memorandum account (the “Loss Recovery Account”), which will have an initial balance of zero and will be (i) increased upon the close of each calendar quarter of the Fund by the amount of the net losses of the Fund for the quarter, and (ii) decreased (but not below zero) upon the close of each calendar quarter by the amount of the net profits of the Fund for the quarter. Net losses are defined as the amount by which the net asset value of the Fund on the last day of the relevant period is less than the net asset value of the Fund as of the commencement of the same period, including any net change in unrealized appreciation or depreciation of investments and realized income and gains or losses and expenses (including offering and organizational expenses).

The Fund has entered into an expense limitation agreement with the Registered Investment Adviser (the “Expense Limitation Agreement”) for a one-year term from the date the Fund commences operations (the “Limitation Period”). The Registered Investment Adviser may extend the Limitation Period for a period of one year on an annual basis. Pursuant to the Expense Limitation Agreement, the Registered Investment Adviser agrees to waive and/or reimburse certain annual operating expenses (excluding the advisory fee, incentive fee, distribution and servicing fee, interest, taxes, brokerage commissions, acquired fund fees and expenses, dividend and interest expenses relating to short sales, and extraordinary expenses, if any) (“Other Expenses”) of the Fund so they are limited to 0.30% (30bps) per annum, of the average monthly net assets (“Expense Limitation”).

The Fund agrees to repay the Registered Investment Adviser any fees waived by under the Expense Limitation or any Other Expenses the Registered Investment Adviser reimburses in excess of the Expense Limitation, provided the repayments do not cause the Fund’s Other Expenses to exceed the expense limitation in place at the time the fees were waived and/or the expenses were reimbursed, or the expense limitation in place at the time the Fund repays the Registered Investment Adviser, whichever is lower. Any such repayments must be made within three years after the year in which the Registered Investment Adviser incurred the expense.

As of November 25, 2020, the waived organization costs, in the amount of $24,823, are subject to possible recoupment by the Registered Investment Adviser up to 36 months from the date of commencement of operations.

Pursuant to an Administration, Fund Accounting and Recordkeeping Agreement, the Fund retains UMB Fund Services, Inc. ("UMBFS") a subsidiary of UMB Financial Corporation, to provide administration, accounting and transfer agency services to the Fund. In consideration for these services, the Fund will pay UMBFS tiered fees based on the average monthly net asset value of the Fund, subject to a minimum annual fee, as well as certain other fixed, per-account or transactional fees. The Fund also reimburses UMBFS for certain out-of-pocket expenses.

4. Indemnifications

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund’s maximum exposure under these agreements is dependent on future claims that may be made against the Fund, and therefore cannot be established; however, based on the Registered Investment Adviser’s experience, the risk of loss from such claims is considered remote.

5. Risks

The recent outbreak of the novel coronavirus in many countries, which is a rapidly evolving situation, has disrupted global travel and supply chains, and has adversely impacted global commercial activity, the transportation industry and commodity prices in the energy sector. The rapid development and fluidity of this situation precludes any prediction as to its ultimate impact, which may have a continued adverse effect on economic and market conditions and trigger a period of global economic slowdown. Such conditions (which may be across industries, sectors or geographies) may impact operating performance at the Fund’s portfolio in the near term.

6. Subsequent Events

The Fund has evaluated all events subsequent to November 25, 2020, through the date these financial statements were issued and has determined that there were no subsequent events that require disclosure.
APPENDIX A – SECURITIES RATING DESCRIPTIONS

Long-Term and Short-Term Debt Securities Rating Descriptions

S&P Global Ratings — Long-Term Issue Credit Ratings*: 

The following descriptions have been published by Standard & Poor’s Financial Services LLC.

AAA – An obligation rated ‘AAA’ has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

AA – An obligation rated ‘AA’ differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

A – An obligation rated ‘A’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

BBB – An obligation rated ‘BBB’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C – Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’, and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB – An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

B – An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

CCC – An obligation rated ‘CCC’ is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC – An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C – An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D – An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days, in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

NR – This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that S&P Global Ratings does not rate a particular obligation as a matter of policy.

* The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.
Moody’s Investors Service, Inc. ("Moody’s") — Global Long-Term Rating Scale: 
The following descriptions have been published by Moody’s Investors Service, Inc.

Aaa – Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.
Aa – Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
A – Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
Baa – Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
Ba – Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.
B – Obligations rated B are considered speculative and are subject to high credit risk.
Baa – Obligations rated Baa are judged to be speculative, of poor standing and are subject to very high credit risk.
Ba – Obligations rated Ba are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
C – Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a “(hyb)” indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.*

Fitch Ratings (“Fitch”) — Corporate Finance Obligations — Long-Term Rating Scale: 
The following descriptions have been published by Fitch, Inc. and Fitch Ratings Ltd. and its subsidiaries.

AAA – Highest credit quality. ‘AAA’ ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
AA – Very high credit quality. ‘AA’ ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
A – High credit quality. ‘A’ ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
BBB – Good credit quality. ‘BBB’ ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.
BB – Speculative. ‘BB’ ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.
B – Highly speculative. ‘B’ ratings indicate that material credit risk is present. For performing obligations, default risk is commensurate with an Issuer Default Risk (“IDR”) in the ranges ‘BB’ to ‘C’. For issuers with an IDR below ‘B’, the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above ‘B’, the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have extremely high recovery rates consistent with a Recovery Rating of ‘RR1’.

* By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.
**CCC** – Substantial credit risk. ‘CCC’ ratings indicate that substantial credit risk is present. For performing obligations, default risk is commensurate with an IDR in the ranges ‘B’ to ‘C’. For issuers with an IDR below ‘CCC’, the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above ‘CCC’, the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a superior recovery rate consistent with a Recovery Rating of ‘RR2’.

**CC** – Very high levels of credit risk. ‘CC’ ratings indicate very high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges ‘B’ to ‘C’. For issuers with an IDR below ‘CC’, the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above ‘CC’, the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a good recovery rate consistent with a Recovery Rating of ‘RR3’.

**C** – Exceptionally high levels of credit risk. ‘C’ indicates exceptionally high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges ‘B’ to ‘C’. The overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, and the rated obligation is expected to have an average, below-average or poor recovery rate consistent with a Recovery Rating of ‘RR4’, ‘RR5’ or ‘RR6’.

Defaulted obligations typically are not assigned ‘RD’ or ‘D’ ratings, but are instead rated in the ‘B’ to ‘C’ rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

**Note:** The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ obligation rating category, or to corporate finance obligation ratings in the categories below ‘CCC’.

The subscript ‘emr’ is appended to a rating to denote embedded market risk which is beyond the scope of the rating. The designation is intended to make clear that the rating solely addresses the counterparty risk of the issuing bank. It is not meant to indicate any limitation in the analysis of the counterparty risk, which in all other respects follows published Fitch criteria for analyzing the issuing financial institution. Fitch does not rate these instruments where the principal is to any degree subject to market risk.

**DBRS — Long Term Obligations Rating Scale:**

*The following descriptions have been published by Dominion Bond Rating Service.*

**AAA** – Highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

**AA** – Superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from AAA only to a small degree. Unlikely to be significantly vulnerable to future events.

**A** – Good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable.

**BBB** – Adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

**BB** – Speculative, non investment-grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

**B** – Highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

**CCC, CC, C** – Very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although CC and C ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the CCC to B range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the C category.
D – When the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to D may occur. DBRS may also use SD (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange.”

All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category.

S&P Global Ratings — Short-Term Issue Credit Ratings:

The following descriptions have been published by Standard & Poor’s Financial Services LLC.

A-1 – A short-term obligation rated ‘A-1’ is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2 – A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3 – A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B – A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

C – A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D – A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, ‘AAA/A-1+’ or ‘A-1+/A-1’). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, ‘SP-1+/A-1+’).

Moody’s — Global Short-Term Rating Scale:

The following descriptions have been published by Moody’s Investors Service, Inc.

P-1 – Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 – Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 – Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.
Fitch — Short-Term Ratings Assigned to Issuers or Obligations in Corporate, Public and Structured Finance:

The following descriptions have been published by Fitch Inc. and Fitch Ratings Ltd. and its subsidiaries.

**F1** – Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

**F2** – Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3** – Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B** – Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C** – High short-term default risk. Default is a real possibility.

**RD** – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

**D** – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

DBRS—Commercial Paper and Short-Term Debt Rating Scale:

The following descriptions have been published by Dominion Bond Rating Service.

**R-1 (high)** – Highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

**R-1 (middle)** – Superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from R-1 (high) by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

**R-1 (low)** – Good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favourable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

**R-2 (high)** – Upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

**R-2 (middle)** – Adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

**R-2 (low)** – Lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

**R-3** – Lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

**R-4** – Speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

**R-5** – Highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

**D** – When the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to D may occur. DBRS may also use SD (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange.”
APPENDIX B – PROXY VOTING POLICIES AND PROCEDURES

PROXY VOTING POLICIES AND PROCEDURES

1. INTRODUCTION AND GENERAL PRINCIPLES

A. Certain subsidiaries of Neuberger Berman Group LLC (“NB”) have been delegated the authority and responsibility to vote the proxies of their respective investment advisory clients.

B. NB understands that proxy voting is an integral aspect of investment management. Accordingly, proxy voting must be conducted with the same degree of prudence and loyalty accorded any fiduciary or other obligation of an investment manager.

C. NB believes that the following policies and procedures are reasonably expected to ensure that proxy matters are conducted in the best interest of clients, in accordance with NB’s fiduciary duties, applicable rules under the Investment Advisers Act of 1940, fiduciary standards and responsibilities for ERISA clients set out in Department of Labor interpretations, the UK Stewardship Code, the Japan Stewardship Code and other applicable laws and regulations.

D. In instances where NB does not have authority to vote client proxies, it is the responsibility of the client to instruct the relevant custody bank or banks to mail proxy material directly to such client.

E. In all circumstances, NB will comply with specific client directions to vote proxies, whether or not such client directions specify voting proxies in a manner that is different from NB’s policies and procedures.

F. NB will seek to vote all shares under its authority so long as that action is not in conflict with client instructions. There may be circumstances under which NB may abstain from voting a client proxy, such as when NB believes voting would not be in clients’ best interests (e.g., not voting in countries with share blocking or meetings in which voting would entail additional costs). NB understands that it must weigh the costs and benefits of voting proxy proposals relating to foreign securities and make an informed decision with respect to whether voting a given proxy proposal is prudent and solely in the interests of the clients and, in the case of an ERISA client and other accounts and clients subject to similar local laws, a plan’s participants and beneficiaries. NB’s decision in such circumstances will take into account the effect that the proxy vote, either by itself or together with other votes, is expected to have on the value of the client’s investment and whether this expected effect would outweigh the cost of voting.

II. RESPONSIBILITY AND OVERSIGHT

A. NB has designated a Governance & Proxy Committee (“Proxy Committee”) with the responsibility for: (1) developing, authorizing, implementing and updating NB’s policies and procedures; (2) administering and overseeing the governance and proxy voting processes; and (3) engaging and overseeing any third-party vendors as voting delegates to review, monitor and/or vote proxies. NB, at the recommendation of the Proxy Committee, has retained Glass, Lewis & Co., LLC (“Glass Lewis”) as its voting delegate.

B. The Proxy Committee will meet as frequently and in such manner as necessary or appropriate to fulfill its responsibilities.

C. The members of the Proxy Committee will be appointed from time to time and will include the Chief Investment Officer (Equities), the Head of Global Equity Research, the Head of ESG Investing, and senior portfolio managers. A senior member of the Legal and Compliance Department will advise the Proxy Committee and may be included for purposes of ensuring a quorum.

D. In the event that one or more members of the Proxy Committee are not independent with respect to a particular matter, the remaining members of the Proxy Committee shall constitute an ad hoc independent subcommittee of the Proxy Committee, which will have full authority to act upon such matter.

III PROXY VOTING GUIDELINES

A. The Proxy Committee developed the Governance and Proxy Voting Guidelines (“Voting Guidelines”) based on our Governance and Engagement Principles. These Guidelines are updated as appropriate and generally on an annual basis. With
input from certain of our investment professionals, the modifications are intended to reflect emerging corporate governance issues and themes. The Proxy Committee recognizes that in certain circumstances it may be in the interests of our clients to deviate from our Voting Guidelines.

B. Our views regarding corporate governance and engagement, and the related stewardship actions, are led by our ESG Investing group, in consultation with professionals in the Legal & Compliance and Global Equity Research groups, among others. These insightful, experienced and dedicated groups enable us to think strategically about engagement and stewardship priorities.

C. We believe NB’s Voting Guidelines generally represent the voting positions most likely to support our clients’ best economic interests across a range of sectors and contexts. These guidelines are not intended to constrain our consideration of the specific issues facing a particular company on a particular vote, and so there will be times when we deviate from the Voting Guidelines.

D. In the event that a senior investment professional at Neuberger Berman believes that it is in the best interest of a client or clients to vote proxies in a manner inconsistent with NB’s Voting Guidelines, the investment professional will submit in writing the basis for his or her recommendation. The Proxy Committee will review this recommendation in the context of the specific circumstances of the situation and with the intention of remaining consistent with our Engagement Principles.

IV. PROXY VOTING PROCEDURES

A. NB will vote client proxies in accordance with a client’s specific request even if it is in a manner inconsistent with NB’s policies and procedures. Such specific requests should be made in writing by the individual client or by an authorized officer, representative or named fiduciary of a client.

B. NB has engaged Glass Lewis as its advisor and voting agent to: (1) provide research on proxy matters; (2) vote proxies in accordance with NB’s Voting Guidelines or as otherwise instructed and submit such proxies in a timely manner; (3) handle other administrative functions of proxy voting; (4) maintain records of proxy statements received in connection with proxy votes and provide copies of such proxy statements promptly upon request; and (5) maintain records of votes cast.

C. Except in instances where clients have retained voting authority, NB will instruct custodians of client accounts to forward all proxy statements and materials received in respect of client accounts to Glass Lewis.

D. Notwithstanding the foregoing, NB retains final authority and fiduciary responsibility for proxy voting.

V. CONFLICTS OF INTEREST

A. Glass Lewis will vote proxies in accordance with the Voting Guidelines described in Section III or, in instances where a material conflict has been determined to exist, as Glass Lewis recommends. NB believes that this process is reasonably designed to address material conflicts of interest that may arise in conjunction with proxy voting decisions. Potential conflicts considered by the Proxy Committee when it is determining whether to deviate from NB’s Voting Guidelines include, among others: a material client relationship with the corporate issuer being considered; personal or business relationships between the portfolio managers and an executive officer; director, or director nominee of the issuer; joint business ventures; or a direct transactional relationship between the issuer and senior executives of NB.

B. In the event that an NB Investment Professional believes that it is in the best interest of a client or clients to vote proxies in a manner inconsistent with the Voting Guidelines described in Section III, such NB Investment Professional will contact a member of the Legal & Compliance Department advising the Proxy Committee and complete and sign a questionnaire in the form adopted from time to time. Such questionnaires will require specific information, including the reasons the NB Investment Professional believes a proxy vote in this manner is in the best interest of a client or clients and disclosure of specific ownership, business or personal relationship, or other matters that may raise a potential material conflict of interest with respect to the voting of the proxy. The Proxy Committee will review the completed questionnaire and consider such other matters as it deems appropriate to determine that there is no material conflict of interest with respect to the voting of the proxy in the requested manner. The Proxy Committee shall document its consideration of such other matters. In the event that the Proxy Committee determines that such vote will not present a material conflict, the Proxy Committee will make a determination whether to vote such proxy as recommended by the NB Investment Professional.
In the event of a determination to vote the proxy as recommended by the NB Investment Professional, an authorized member of the Legal & Compliance Department advising the Proxy Committee will instruct Glass Lewis to vote in such manner with respect to the client or clients. In the event that the Proxy Committee determines that the voting of a proxy as recommended by the NB Investment Professional would not be appropriate, the Proxy Committee will:

(i) take no further action, in which case Glass Lewis shall vote such proxy in accordance with the Voting Guidelines;

(ii) disclose such conflict to the client or clients and obtain written direction from the client with respect to voting the proxy;

(iii) suggest that the client or clients engage another party to determine how to vote the proxy; or

(iv) engage another independent third party to determine how to vote the proxy. A record of the Proxy Committee’s determinations shall be prepared and maintained in accordance with applicable policies.

C. In the event that the Voting Guidelines described in Section III do not address how a proxy should be voted and Glass Lewis refrains from making a recommendation as to how such proxy should be voted, the Proxy Committee will make a determination as to how the proxy should be voted. The Proxy Committee will consider such matters as it deems appropriate to determine how such proxy should be voted including whether there is a material conflict of interest with respect to the voting of the proxy in accordance with its decision. The Proxy Committee shall document its consideration of such matters, and an authorized member of the Legal & Compliance Department advising the Proxy Committee will instruct Glass Lewis to vote in such manner with respect to such client or clients.

D. Material conflicts cannot be resolved by simply abstaining from voting.

VI. RECORDKEEPING

NB will maintain records relating to the implementation of the Voting Guidelines and these procedures, including: (1) a copy of the Voting Guidelines and these procedures, which shall be made available to clients upon request; (2) proxy statements received regarding client securities (which will be satisfied by relying on EDGAR or Glass Lewis); (3) a record of each vote cast (which Glass Lewis maintains on NB’s behalf); (4) a copy of each questionnaire completed by any NB Investment Professional under Section V above; and (5) any other document created by NB that was material to a determination regarding the voting of proxies on behalf of clients or that memorializes the basis for that decision. Such proxy voting books and records shall be maintained in an easily accessible place, which may include electronic means, for a period of five years, the first two by the Legal & Compliance Department.

VII. ENGAGEMENT AND MONITORING

Consistent with the firm’s active management strategies, NB portfolio managers and members of the Global Equity Research team continuously monitor material investment factors at portfolio companies. NB professionals remain informed of trends and best practices related to the effective fiduciary administration of proxy voting. NB will make revisions to its Voting Guidelines and related procedures document when it determines it is appropriate or when we observe the opportunity to materially improve outcomes for our clients. Additionally, we will regularly undertake a review of selected voting and engagement cases to better learn how to improve the monitoring of our portfolio companies and the effectiveness of our stewardship activities.

VIII. SECURITIES LENDING

Some NB products may participate in a securities lending program. Where a security on loan is subject to a proxy event and a determination has been made that the shares on loan may have a meaningful impact on the vote outcome and the potential value of the security, a portfolio manager, in consultation with relevant investment professionals, will restrict the security from lending, or will make best efforts to recall the security from the lending program, in the best interest of the client. NB maintains the list of securities restricted from lending and receives daily updates on upcoming proxy events from the custodian.

IX. DISCLOSURE

Neuberger Berman will publicly disclose all voting records of its co-mingled funds (Undertakings for Collective Investment in Transferable Securities [UCITS] and mutual funds). Neuberger Berman cannot publicly disclose vote level records for separate accounts without express permission of the client. Neuberger Berman will publicly disclose aggregate reporting on at least an annual basis for all votes cast across co-mingled and separate accounts. Neuberger Berman welcomes the opportunity to discuss the rationale for a given vote with investee companies after the meeting has taken place as part of our ongoing engagement activities. Neuberger
Berman may also choose to provide broad explanations for its voting positions on important or topical issues (e.g., climate change or gender diversity). Additionally, our current and ongoing activities can be viewed through regular publication of case studies and thematic papers on NB’s ESG Investing website: www.nb.com/esg

Proxy Committee Membership as of March 2019:
Joseph Amato, President and Chief Investment Officer (Equities)
Jonathan Bailey, Head of ESG Investing
Timothy Creedon, Director of Global Equity Research
Ingrid Dyott, Portfolio Manager
Richard Glasebrook, Portfolio Manager
Benjamin Nahum, Portfolio Manager
Corey Issing*, Legal and Compliance
Dina Lee*, Legal and Compliance
Caitlyn McSherry*, ESG Investing

* Corey Issing, Dina Lee and Jake Walko serve in advisory roles to the Committee. Mr. Issing is an ex officio member of the Committee. Mr. Issing will only vote as a full member of the Committee if his vote is needed to establish a quorum or in the event that his vote is needed to break a tie vote. In Mr. Issing’s absence, Ms. Lee will assume Mr. Issing’s responsibilities as an ex officio Committee member.
