Schedule of Investments Mid Cap Intrinsic Value Portfolio[^] (Unaudited) (cont'd)

The following is a summary, categorized by Level (see the Notes to Schedule of Investments), of inputs used to value the Fund's investments as of March 31, 2024:

Asset Valuation Inputs	Level 1	Level 2	Level 3	Total
Investments:				
Common Stocks [#]	\$131,780,472	\$ —	\$—	\$131,780,472
Short-Term Investments	—	151,573	—	151,573
Total Investments	\$131,780,472	\$151,573	\$—	\$131,932,045

The Schedule of Investments provides information on the industry or sector categorization.

[^] A balance indicated with a "—", reflects either a zero balance or an amount that rounds to less than 1.

Total Investments	\$803,948,899	\$10,688,418	\$7,516,433	\$822,153,750

The Schedule of Investments provides information on the industry or sector categorization.

(a) The following is a reconciliation between the beginning and ending balances of investments in which significant unobservable inputs (Level 3) were used in determining value:

(000's omitted)	Beginning balance as of 1/1/2024	Accrued discounts/ premiums	Realized gain/(loss)	Change in unrealized appreciation/ (depreciation)	Purchases	Sales	Transfers into Level 3	Transfers out of Level 3	Balance as of 3/31/2024	Net change in unrealized appreciation/ (depreciation) from investments still held as of 3/31/2024
Investments in Securities:										
Common Stocks ⁽¹⁾	\$4,191	\$—	\$—	\$—	\$—	\$—	\$—	\$—	\$4,191	\$—
Preferred Stocks ⁽¹⁾	3,325	—	—	—	—	—	—	—	3,325	—
Total	\$7,516	\$—	\$—	\$—	\$—	\$—	\$—	\$—	\$7,516	\$—

(1) Quantitative Information about Level 3 Fair Value Measurements:

Investment type	Fair value at 3/31/2024	Valuation approach	Significant unobservable input(s)	Input value/ range	Weighted average ^(a)	Impact to valuation from increase in input ^(b)
Common Stocks	\$4,191,273	Market Approach	Transaction Price	\$97.00	\$97.00	Increase
Preferred Stocks	3,325,160	Market Approach	Transaction Price	\$97.00	\$97.00	Increase

(a) The weighted averages disclosed in the table above were weighted by relative fair value.

(b) Represents the expected directional change in the fair value of the Level 3 investments that would result from an increase or decrease in the corresponding input. Significant changes in these inputs could result in significantly higher or lower fair value measurements.

^ A balance indicated with a "—", reflects either a zero balance or an amount that rounds to less than 1.

Notes to Schedule of Investments Advisers Management Trust (Unaudited)

In accordance with Accounting Standards Codification 820 "Fair Value Measurement" ("ASC 820"), all investments held by each of Neuberger Berman Advisers Management Trust: International Equity Portfolio, Mid Cap Growth Portfolio, Mid Cap Intrinsic Value Portfolio, Short Duration Bond Portfolio, and Sustainable Equity Portfolio (each individually a "Fund," and collectively, the "Funds") are carried at the value that Management believes a Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Funds' investments, some of which are discussed below. At times, Management may need to apply significant judgment to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 – unadjusted quoted prices in active markets for identical investments
- Level 2 – other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)
- Level 3 – unobservable inputs (including a Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Funds' investments in equity securities, for which market quotations are available, is generally determined by Management by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price ("NOCP") provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of the Funds' investments in debt securities is determined by Management primarily by obtaining valuations from independent pricing services based on bid quotations, or if quotations are not available, by methods that include various considerations based on security type (generally Level 2 inputs). In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Funds:

Corporate Bonds. Inputs used to value corporate debt securities generally include relevant credit information, observed market movements, sector news, U.S. Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities, and reference data, such as market research publications, when available ("Other Market Information").

Collateralized Loan Obligations (CLOs). The value of collateralized loan obligations is primarily determined by cash flow data, relevant loan pricing data and market color, and research from market participants and trading desks (Level 2 or 3 inputs).

Asset-Backed Securities and Mortgage-Backed Securities. Inputs used to value asset-backed securities and mortgage-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

For information on the Funds' significant accounting policies, please refer to the Funds' most recent shareholder reports.

Notes to Schedule of Investments Advisers Management Trust (Unaudited) (cont'd)

The value of loan assignments is determined by Management primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of futures contracts is determined by Management by obtaining valuations from independent pricing services at the settlement price at the market close (Level 1 inputs).

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Certificates of deposit are valued at amortized cost (Level 2 inputs).

Investments in non-exchange traded investment companies are valued using the respective fund's daily calculated net asset value per share (Level 2 inputs), when available.

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount a Fund might reasonably expect to receive on a current sale in an orderly transaction, Management seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not available, the security is valued using methods Management has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security. Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended, the Funds' Board of Trustees designated Management as the Funds' valuation designee. As the Funds' valuation designee, Management is responsible for determining fair value in good faith for all Fund investments. Inputs and assumptions considered in determining fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers or pricing services; information obtained from the issuer and analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

The value of the Funds' investments in foreign securities is generally determined using the same valuation methods and inputs as other Fund investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into U.S. dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange is open for business. Management has approved the use of ICE Data Services ("ICE") to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that a Fund could expect to receive for those securities or when foreign markets are closed and U.S. markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). In the absence of precise information about the market values of these foreign securities as of the time at which a Fund's share price is calculated, Management has determined based on available data that prices adjusted or evaluated in this way are likely to be closer to the prices a Fund could realize on a current sale than the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or traded.

S&P 500 Index	6	(3,152,610)	5,255.00	4/26/2024	(33,000)
Total options written (premium received \$227,376)					\$(114,595)

At March 31, 2024, the Fund had securities pledged in the amount of \$4,899,722 to cover collateral requirements for options written.

The following is a summary, categorized by Level (See the Notes to Schedule of Investments), of inputs used to value the Fund's investments as of March 31, 2024:

Asset Valuation Inputs	Level 1	Level 2	Level 3	Total
Investments:				
U.S. Government Agency Securities	\$—	\$12,366,845	\$—	\$12,366,845
U.S. Treasury Obligations	—	7,499,668	—	7,499,668
Rights ^{(a)(b)(c)}	—	—	—	—
Short-Term Investments	—	826,706	—	826,706
Total Long Positions	\$—	\$20,693,219	\$—	\$20,693,219

(a) The Schedule of Investments provides information on the industry or sector categorization.

(b) The reconciliation between beginning and ending balances of investments in which unobservable inputs (Level 3) were used is not presented as all values rounded to less than \$1.

(c) At March 31, 2024, these investments were valued in accordance with procedures approved by the valuation designee. These investments did not have a material impact on the Fund's net assets and, therefore, disclosure of unobservable inputs used in formulating valuations is not presented.

Schedule of Investments U.S. Equity Index PutWrite Strategy Portfolio^(Unaudited) (cont'd)

The following is a summary, categorized by level (See the Notes to Schedule of Investments), of inputs used to value the Fund's derivatives as of March 31, 2024:

Other Financial Instruments	Level 1	Level 2	Level 3	Total
Options Written				
Liabilities	\$(114,595)	\$—	\$—	\$(114,595)

^ A balance indicated with a "-", reflects either a zero balance or an amount that rounds to less than 1.

Notes to Schedule of Investments U.S. Equity Index PutWrite Strategy Portfolio (Unaudited)

In accordance with ASC 820 “Fair Value Measurement” (“ASC 820”), all investments held by Neuberger Berman Advisers Management Trust U.S. Equity Index PutWrite Strategy Portfolio (the “Fund”) are carried at the value that Neuberger Berman Investment Advisers LLC (“Management”) believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund’s investments, some of which are discussed below. At times, Management may need to apply significant judgment to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 – unadjusted quoted prices in active markets for identical investments
- Level 2 – other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)
- Level 3 – unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund’s investments in equity securities, exchange traded options written and rights, for which market quotations are available, is generally determined by Management by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price (“NOCP”) provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the “inside” bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of the Fund’s investments in debt securities is determined by Management primarily by obtaining valuations from independent pricing services based on bid quotations, or if quotations are not available, by methods that include various considerations based on security type (generally Level 2 inputs). In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Fund:

U.S. Treasury Obligations. Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and other market information which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities and reference data, such as market research publications, when available (“Other Market Information”).

U.S. Government Agency Securities. Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund’s daily calculated net asset value per share (Level 2 inputs), when available.

Notes to Schedule of Investments U.S. Equity Index PutWrite Strategy Portfolio (Unaudited) (cont'd)

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount the Fund might reasonably expect to receive on a current sale in an orderly transaction, Management seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not available, the security is valued using methods Management has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security. Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended, the Board designated Management as the Fund's valuation designee. As the Fund's valuation designee, Management is responsible for determining fair value in good faith for all Fund investments. Inputs and assumptions considered in determining fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers or pricing services; information obtained from the issuer and analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or traded.
