¹This Portfolio is available only through a wrap fee or similar program sponsored by a third-party intermediary ("Financial Intermediary") that has engaged Neuberger Berman Investment Advisers LLC ("NBIA") to manage certain of the Financial Intermediary's client accounts on a discretionary basis or to provide the Financial Intermediary with recommendations in the form of model portfolio. Please refer to the attached GIPS® compliant composite presentation, which reflects NBIA's calculations with respect to the Portfolio that are not specific to any Financial Intermediary or client account ("Composite"). Specific client account performance is reflected in the official books and records maintained by the Financial Intermediary or other custodian selected by the Financial Intermediary or client. Performance reflects reinvestment of any dividends and distributions. Representative portfolio information (characteristics, holdings, weightings, etc.) is based upon the Composite. Gross return is shown as supplemental and does not reflect the deduction of advisory fees and other expenses. Investing entails risks, including possible loss of principal. **Past performance is no guarantee of future results.**

² As of January 20, 2021: Benjamin Segal is retiring effective June 2021. Elias Cohen will take over leadership as Senior Portfolio Manager and Head of the International Equity team, with the transition starting immediately.

Please see Additional Disclosures on page 2, which are a required part of this factsheet.

Management Team²

Compliance Statement

Neuberger Berman Group LLC ("NB", "Neuberger Berman" or the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Neuberger Berman has been independently verified for the period January 1, 2011 to December 31, 2019. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not ensure the accuracy of any specific composite presentation. The verification reports are available upon request.

The GIPS® firm definition was redefined effective January 1, 2011. For prior periods there were two separate firms for GIPS® firm definition purposes and such firms were independently verified for the periods January 1, 1997 to December 31, 2010 and January 1, 1996 to December 31, 2010, respectively.

Definition of the Firm

The firm is currently defined for GIPS® purposes as Neuberger Berman Group LLC, ("NB", "Neuberger Berman" or the "Firm"), and includes the following subsidiaries and affiliates: Neuberger Berman Investment Advisers LLC, Neuberger Berman Europe Ltd., Neuberger Berman Asia Ltd., Neuberger Berman East Asia Ltd., Neuberger Berman Singapore Pte. Ltd., Neuberger Berman Taiwan Ltd., Neuberger Berman Australia Pty. Ltd., Neuberger Berman Trust Company N.A., Neuberger Berman Trust Company of Delaware N.A., NB Alternatives Advisers LLC, Neuberger Berman Breton Hill ULC, Neuberger Berman Loan Advisers LLC and Neuberger Berman Loan Advisers II LLC.

Policies

Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Composite Description

The Managed Account Group ("MAG") International ADR Composite (the "Composite") includes Neuberger's calculations with respect to all wrap fee or similar client accounts of third-party intermediaries (each, a "Financial Intermediary") that are managed on a discretionary basis by Neuberger in the MAG International ADR investment style ("MAG Portfolio"). The Composite is not specific to any Financial Intermediary or client account. Specific client account performance is reflected in the official books and records maintained by the Financial Intermediary or other custodian selected by the Financial Intermediary or the client. The MAG Portfolio is available only through Financial Intermediaries that have engaged Neuberger to manage client accounts on a discretionary basis or to provide non-discretionary investment recommendations in the form of a model portfolio. The MAG Strategy seeks to invest in a broadly diversified portfolio of foreign companies that are listed on U.S. exchanges. The Composite was created in July 2005 and performance inception is April 1994. From April 1994 to July 2005 performance represents the International ADR Institutional Composite.

Primary Benchmark Description

The benchmark is the MSCI EAFE (Net) Index (Europe, Australasia and Far East). The index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US & Canada. The MSCI EAFE Index consists of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. Effective June 2016, the primary benchmark was changed from the MSCI EAFE Index (Gross) to the MSCI EAFE Index (Net) to better reflect the holdings held in the composite.

Secondary Benchmark Description

The benchmark is the S&P ADR Index. The index is constructed from the non-U.S. components of the S&P Global 1200. These include the S&P Europe 350, S&P/TOPIX 150 (Japan), S&P/TSX 60 (Canada), S&P/ASX All Australian 50, S&P Asia 50, and S&P Latin America 40. All Level II and Level III ADRs or ordinary share listings in the U.S. issued by the constituents of these indices are included.

Reporting Currency

Valuations are computed and performance is reported in U.S. Dollars.

Fees

Pure "gross" returns, are presented as supplemental information, and do not reflect the deduction of any trading costs. Fees, or expenses, are presented for comparison purposes only. The Separately Managed Account ("SMA") fee charged by each sponsor typically include all charges for trading costs, portfolio management, custody and other administrative fees. Net returns are calculated by subtracting the hypothetical highest SMA fee charged by each sponsor (300 bps on an annual basis, or 75 bps quarterly) from the "pure" gross composite return.

Presented risk measures are calculated using gross-of-fee composite returns.

To the extent that a composite contains fund(s) whereby performance is calculated based on changes in monthly NAV's, net returns reflect miscellaneous fund expenses (admin, legal, etc.), in addition to investment management fees for the portion of composite containing these vehicles.

Fee Schedule

The standard fee schedule in effect is as follows: 3.00% on total assets.

Internal Dispersion

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the Composite for the entire year. Internal dispersion is not calculated if the Composite does not contain at least 6 portfolios for the entire year.

Annualized Standard Deviation

The three-year annualized standard deviation measures the variability of the Composite and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

Availability and Benchmark Disclosures

The firm's list of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled fund descriptions are available upon request.

Additional Disclosures

This material is intended as a broad overview of the portfolio managers' current style, philosophy and process. This material is presented solely for informational purposes and nothing herein constitutes investment, legal, accounting or tax advice, or a recommendation to buy, sell or hold a security. No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Information is obtained from sources deemed reliable, but there is no representation or warranty as to its accuracy, completeness or reliability. All information is current as of the date of this material and is subject to change without notice. Any views or opinions expressed may not reflect those of the firm as a whole. Third-party economic, market or security estimates or forecasts discussed herein may or may not be realized and no opinion or representation is being given regarding such estimates or forecasts. Certain products and services may not be available in all jurisdictions or to all client types. Unless otherwise indicated, returns shown reflect reinvestment of dividends and distributions. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. **Past performance is no guarantee of future results.**

Representative portfolio information (characteristics, holdings, weightings, etc.) is based upon the Composite, as of the date indicated, and is subject to change without notice. This Portfolio is available only through a wrap fee or similar program sponsored by a Sponsor that has engaged NBIA to manage certain of the Sponsor's client accounts on a discretionary basis or to provide the Sponsor with recommendations in the form of model portfolio. The Composite includes NBIA's calculations with respect to all wrap fee or similar client accounts of Sponsors that are managed on a discretionary basis by NBIA in the MAG International ADR investment style. The Composite is not specific to any Sponsor or client account. Specific securities identified and described do not represent all of the securities purchased, sold or recommended for advisory clients. It should not be assumed that any investments in securities identified and described were or will be profitable.

Weighted average market capitalization: Market capitalization is the price of the security multiplied by the number of shares. The weighted average market capitalization is the sum of the market caps divided by the percentage weight of the holdings.

Price-to-earnings ratio (P/E): The Price to earnings ratio is calculated by dividing the price of the security by the earnings per share. The higher the PE ratio the more the investor is willing to pay for earnings. A higher PE ratio would imply that earnings will grow higher in the future.

Long-term growth rate: The long-term growth rate is calculated weekly by taking the median of all First Call and IBES contributing broker estimates of a company's projected earnings growth over a period of two to five years. FactSet calculates a dollar-weighted figure at the beginning of each month based on the fund's portfolio holdings. The long-term growth rate is based on projections, which may or may not be realized.

Dividend Yield: Dividend Yield is the weighted average of the dividend yields of all the stocks currently held in the Portfolio. The dividend yield of a stock is the sum of the dividends paid per share during the last 12 months divided by the current price. Please note this represents gross yields of the current holdings in the Portfolio. It does not include expenses and does not reflect the actual yield an investor in the Portfolio would receive over time. Past yields are no guarantee of future yields.

Return on equity (ROE): It is a percent yield that indicates a company's profitability accruing to equity holders. ROE reveals how much profit a company generates with the money shareholders have invested. Return on equity is determined by dividing net income by total common equity.

Investing in the stocks of even the largest companies involves all the risks of stock market investing, including the risk that they may lose value due to overall market or economic conditions. Mid-capitalization stocks are more vulnerable to financial risks and other risks than larger stocks. They are generally less liquid than larger stocks, so their market prices tend to be more volatile.

Investing in foreign securities involves greater risks than investing in securities of U.S. issuers, including currency fluctuations, potential political instability, restrictions on foreign investors, less regulation and less market liquidity.

An ADR, or American Depositary Receipt, is a security issued by a U.S. bank representing a specific number of shares of a foreign stock traded on a U.S. stock exchange and held in trust by that bank. ADRs allow U.S. investors to buy shares in foreign-based companies in U.S. dollars from domestic stock exchanges.

This material is general in nature and is not directed to any category of investors and should not be regarded as individualized, a recommendation, investment advice or a suggestion to engage in or refrain from any investment-related course of action. Investment decisions and the appropriateness of this material should be made based on an investor's individual objectives and circumstances and in consultation with his or her advisors.
